Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More

vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

 An award-winning scientist offers his unorthodox approach to childrearing: " Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions " (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids

with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

 NASCAR is more popular in America than any racing series has ever been, and leading the way within the NASCAR ranks is the Ford Taurus. The Taurus is one of the best-selling cars in

the U.S., but the street version bears little resemblance to the Taurus that races on Sundays. The racing Taurus is the result of Ford and NASCAR working together to create a two-door version that would comply with NASCAR rules. It is campaigned by legendary drivers such as Dale Jarrett, Mark Martin, Ricky Rudd, Jeff Burton, and 2003 series champion Matt Kenseth. This book explains in technical detail all the nuances and differences between the street version and race version, including the chassis and roll cage, the suspension, steering and brakes, the engine and drive train, engine support systems, and the interior and body. The new RaceCarTech Series of books features a level of very useful technical detail sought not only by the enthusiast, but also by the model car builder. Detailed photos and accurately scaled shots provide a resource not found anywhere else. 70 percent of plastic model kit sales in the US are cars, and the majority of those are race car models. The RaceCarTech series is a long-awaited resource for model car builders. Paperbound Books in Print Dundurn Each edition includes information for that year and several previous

years.
