Willie G. Davidson likes to say that he was born with gasoline in his veins and a crayon in each hand. A designer at heart, Davidson combined his passions for art and motorcycles to extend a multi-generational unbroken thread from Harley-Davidson Motorcycle Company's birth in a wooden shed in the early twentieth century to today. The grandson of one of the company's founders and the son of one of its longtime presidents, Davidson created a series of iconic designs that defined Harley-Davidson "factory custom" bikes and cemented its standing as the premier motorcycle company in the world. Davidson was instrumental in saving the company from bankruptcy and then helping it explode into a global phenomenon. For more than five decades, Davidson was more than a namesake of the founders; he was the heart and soul of Harley-Davidson and a personal connection to millions of riders around the world who knew him simply as "Willie G." Throughout his life Davidson has embodied a close-to-the-customer relationship, by attending motorcycle rallies, rides, and races with his late wife, Nancy, the "First Lady of Motorcycling," and son and daughter Bill and Karen Davidson who recently joined their famous parents by being inducted into the Sturgis Motorcycle Hall of Fame and play key roles in the Motor Company today. In Ride Free, Davidson recounts his memories of family, relationships, and events that defined his extraordinary life

and legacy of power, passion, and purpose. Davidson gives readers a behind-the-scenes look at the planning, design, and conception of legendary bikes that inspired millions of riders over the past half-century; stories of his unforgettable rides around the world; the people he encountered while navigating thousands of miles on the roads; and the legacy that he and his family have created which will carry on the most famous name in motorcycles.

Donny is the Winner of the 2012 International Book Awards. Donny Petersen has been educating motorcycle enthusiasts about Harley-Davidson bikes for years. Now, he has combined all his knowledge into a twelve-volume series masterpiece and this third book is one that every rider will treasure. Petersen, who has studied privately with Harley-Davidson engineers and has spent thirty-six years working on motorcycles, is sharing all of his secrets! As the founder of Toronto's Heavy Duty Cycles in 1974, North America's premier motorcycle shop, the dean of motorcycle technology teaches about the theory, design, and mechanical aspects of Harleys. In this third volume, discover: 1. How to identify the Evolution models. 2. Why the Evolution models are better. 3. Everything you need to know about engines. 4. Troubleshooting every facet of the Evolution. And so much more! The Harley-Davidson Evolution The Japanese had more than quality. Their arsenal included acceleration and speed combining with good braking and handling. They could design, tool-up and build a new motorcycle in a mere eighteen months. The flavor of the day could easily be accomplished with this organizational skill and dexterity. On top of this they had lower prices. The Gang of 13 took over a failing company or did they? By 1982, Harley-Davidson sales went into a tailspin with plunging production. The USA was in a deep recession. Adding to the perfect storm was the flood of Asian imports that many believe were being sold in the U.S. below their manufactured costs. Whether this was true or not, how did a small country a half-world away manufacture a quality product that was faster, handled better, and was less expensive? Furthermore, these import motorcycles were more functional. Well, of course they did because USA motorcycle manufacturing offered old clunker styling that was slower, did not handle well, and broke down all the time! And for all of this, Harley-Davidson's cost more. Insulting if one thinks about it. It is not that the Evolution was that good relative to their competitors because in my opinion it was not. However, the Evolution was stellar relative to what went before. I was a loyal Shovelhead rider, necessarily becoming a mechanic along the way. I like the rest of my ilk would never consider riding any other product. I did not care that a Honda might be functionally better, less expensive, and not require my newfound mechanical skills. Honda simply did not give what my psyche craved. Importantly, H-D dropped its lackadaisical attitude towards copyright infringement, particularly with knock-off products. Harley-Davidson became extremely aggressive against the counterfeiting of their trademarks. It licensed use of its logos with all manner merchandise that was embraced by mainstream America followed by the world including the Japanese. H-D then saw the birth of HOG, the

most successful marketing and loyalty campaign in the annals of corporate sustenance. The world embraced this pasteurized version of the outlaw subculture. You might meet the nicest people on a Honda but Harley riders are all about cool. They adapt a pseudo-outlaw lifestyle that emulates freedom and individualism. They spend much of their time adopting one charity or another to prove they really aren't bad. Many charities benefitted greatly during the Harley boom. Can these riders be contesting the Honda mantra of niceness? The previous owners AMF deserve much credit for the success of Harley-Davidson. They gave the Gang of 13 a platform from, which to launch. These new guys were brighter than bright. They put a management team together that knew no bounds in success. I am sure that Marketing 101 in every business school teaches and will continue to teach their brilliant story. Harley-Davidson became the epitome of American manufacturing and marketing, the darling of capitalism at its finest. Think about it! How could a rusty old manufacturer whose time had drifted by reach such pinnacles of success? Well, H-D had a little help along the way with two main sociological factors: 1. The post World War II baby boom, the aging bulge in American demographics looking for adventure and whatever (safely) came their way. 2. A generation that worked hard; raised families and then looked back at what they had missed in their youth. Harley-Davidson embodied the freedom and adventure they lacked. Harley-Davidson was granted two decades, in which to plan a lasting and viable future. It sought to be the motorcycle of mainstream America. The world would follow. This venerable company almost pulled it off. The Motor Company updated technology both in their manufacturing venue and in the product itself. H-D balanced on a near-impossible fulcrum, maintaining tradition on one side and complying with environmental dictates on the other. The Evolution's successor, the air-cooled Twin Cam introduced in 1999 with great success. H-D continued to grow and prosper. I have always viewed the Twin Cam as a transitional model embracing the past but leading into a future of overhead cams and water jackets. The new H-D V-Rod's technological marvels are a wonderful attempt but as much as the Factory hoped, mainstream Harley riders did not take the bait en masse. After all they had their psychological needs. These attempts did not prevent dark clouds from appearing on the horizon: 1. Inexorably, the post World War II baby boom's bulge has grown older, losing interest in reclaiming youth with interests shifting elsewhere. Who is to take over this downsizing market? Who will be left to support the Motor Company in the style it has become accustomed? 2. In my humble opinion, the masters of marketing did not fill the coming void of consumers. I think H-D is good at pretty much everything except lowering prices for the incoming generations. Nor have they developed affordable and desirable product lines for the youth. Certainly, the Factory began to enjoy economies of scale in manufacturing. I for one do not think they have used their profits wisely for continued prosperity. Will I continue to ride a Harley at age 62? Sure I will but I was riding them before they became cool. I am not a dentist looking for a safe walk on the wild side or a movie star acquiring the in-bauble of the day. The Evolution motorcycle saved the Hog's bacon but a new savior is now required.

Harley-Davidson 100 Years Motorbooks International

From the appearance of the first single cylinder engine, followed by its twin cylinders, the Harley-Davidson has distinguished itself by its imposing models, known for their trustworthiness and endurance, and by their many wins on the racetrack. The motorcycles, powered by V-Twin Harley-Davidson engines, have forged the legend of this American brand - already in business for over a century - through families of highly prestigious names: Hydra Glide, then Duo Glide and finally Electra Glide, and also Softail, Dyna, V-Rod and Sportster--names that exist and have persisted, in the case of certain models, for more than 50 years. In spite of competition that in late years from America and

then from the UK and Japan, Harley-Davidson has prevailed because of the innovations it has introduced - at times belatedly, but always the fruit of sensible reflections - and because it has diversified its family of motorcycles to make them correspond to the public's expectations. Without falling into the trap of expanding technological innovations to an exaggerated level, the new Harley-Davidsons have become motorcycles offering modern performance while at the same time conserving the spirit of the brand and, above all, that special Harley-Davidson character. All you need to do is climb onto the saddle and rev up a Harley-Davidson to discover a new motorcycling universe, where the concept of pleasure reveals new meaning. This is the universe that this book invites you to discover, through the history of the brand's main models, embodying nearly 110 years of motorcycling adventures, and touching upon touring, sport, customisation and a simple and outright passion for motorcycles.
