What would you do if you knew that you had been given a second chance to sail away from life 's safe harbour? Each of us has dreams of doing something that takes us out of our comfort zone but few of us take the plunge and actually do it. In this book Mervyn Smith describes a point in his life when he was facing

the question of his own mortality as he recovered from a serious life-saving surgery. This is the story of how he responded to that challenge and followed a life-long dream to ride a motorcycle from his Shropshire home to a destination way above the Arctic Circle and who he did it for. Read what brought him to that decision, what difficulties he overcame to pursue his dream and the adventures he had on the journey riding through the hottest European summer on record. This book will inspire you, challenge you and hopefully motivate you to realise that everyone has a skill set unique to them which, with faith, imagination, and creativity, can be released. And that age is never a barrier to doing something extra ordinary.

You can find in this book the development of highly and fully automatic driving and the increasing electrification of the powertrain now face chassis development with new challenges too. Innovative chassis systems have to provide solutions for automated driving. The efficient chassis of the future also has to keep an eye on CO2 targets, comfort and customer focus at all times. A modern chassis has to provide for this in the form of

innovations while taking the physical and mechanical interdependencies into account. Confronting these new developments is a challenge for simulation and testing.

« No44 (908) 2013 W. W. Norton & Company From the UK 's youngest grumpy man, who brought you A Certain Point of View, comes another hilarious collection of rants. Eddie Hall ' s one-man crusade against the forces of stupidity continues in his second journal. In this book, Eddie tries to uncover the answers to more important worldly questions, like why cinema seats are designed to paralyse people from the waist down (why in the name of Dumbledore ' s danglies do they make the seats so uncomfortable?) as well as offer useful insights; if people who drive Nissan Micras are the herpes of the road, people who ride Mopeds are the gonorrhoea (they are slow, ugly, unsafe and could make even Keira

Knightley look ridiculous and unattractive) and why no man will ever understand what a woman is talking about (I ' ve yet to fully master this bizarre language). Like Eddie ' s previous book, this is a collection of satirical articles covering a wide range of topics that will be enjoyed by fans of humorous books. Eddie, whose writing style is comparable to that of Jeremy Clarkson, adopts an informal, conversational style that draws the reader in and allows them to relate to his (very valid) points. Warning: This book contains sarcastic material. Do not read if you suffer from any of the following conditions: A sense of humor deficiency, Humorphobia, Easilyoffendeditis or Americanitis. “ A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic. ”

—Bethany McLean, New York Times Book Review

Faster, Higher, Farther chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install “ defeat devices ” in diesel vehicles that unlawfully lowered CO2 levels during emissions

testing, and how the fraud was committed, covered up, and finally detected. Faster, Higher, Farther is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.
