AS Level Mathematics June 2019 Potential Papers Boydell & Brewer
Leading global experts in the field of politics and mathematics bring forth key insights on how voting power should be allocated between EU member states, and what the policy consequences are of any given institutional design. Close attention is paid to the practical implications of decision-making rules, the nature and distribution of power, and the most equitable ways to represent the preoccupations of European citizens both in the Council and European Parliament. Highly theoretical and methodologically advanced, this volume is set to enrich the debate on the future of the EU's institutional design. A valuable source of information to scholars of political science, European studies and law, as well as to people working on game theory, theory of voting and, in general, applications of mathematics to social science.

Maths Olympiad Workbook – Class 1 CGP 13+ ISEB Common Entrance
Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the OCR specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

Teaching and Learning in Nineteenth-century Cambridge Nelson Thornes
It was in the 19th and early 20th centuries that Cambridge, characterised in the previous century as a place of indolence and complacency, underwent the changes which produced the institutional structures which persist today. Foremost among them was the rise of mathematics as the

dominant subject within the university, with the introduction of the Classical Tripos in 1824, and Moral and Natural Sciences Triposes in 1851. Responding to this, Trinity was notable in preparing its students for honours examinations, which came to seem rather like athletics competitions, by working them hard at college examinations. The admission of women and dissenters in the 1860s and 1870s was a major change ushered in by the Royal Commission of 1850, which finally brought the colleges out of the middle ages and strengthened the position of the university, at the same time laying the foundations of the new system of lectures and supervisions.
