For the first time since 1984, we have a new edition of the classic book that Field & Stream called “the Hiker’s Bible.” For this version, the celebrated writer and hiker Colin Fletcher has taken on a coauthor, Chip Rawlins, himself an avid outdoorsman and a poet from Wyoming. Together, they have made this fourth edition of The Complete Walker the most informative, entertaining, and thorough version yet. The eighteen years since the publication of The Complete Walker III have seen revolutionary changes in hiking and camping equipment: developments in waterproofing technology, smaller and more durable stoves, lighter boots, more manageable tents, and a wider array of food options. The equipment recommendations are therefore not

merely revised and tweaked, but completely revamped. During these two decades we have also seen a deepening of environmental consciousness. Not only has backpacking become more popular, but a whole ethic of responsible outdoorsmanship has emerged. In this book the authors confidently lead us through these technological, ethical, and spiritual changes. Fletcher and Rawlins’s thorough appraisal and recommendation of equipment begins with a “Ground Plan,” a discussion of general hiking preparedness. How much to bring? What are the ideal clothes, food, boots, and tents for your trip? They evaluate each of these variables in detail—including open, honest critiques and endorsements of brand-name equipment. Their equipment searches are exhaustive; they talk in detail about everything from socks to freeze-dried trail curries. They end as they began, with a philosophical and literary disquisition on the reasons to walk, capped off with a delightful collection of quotes about walking and the outdoor life. After a thoughtful and painstaking analysis of hiking gear from hats to boots, from longjohns to tent flaps, they remind us that ultimately hiking is about the experience of being outdoors and seeing the green world anew. Like its predecessors, The Complete Walker IV is an essential purchase for anyone

captivated by the outdoor life.

The right of governments to employ capital controls has always been the official orthodoxy of the International Monetary Fund, and the organization's formal rules providing this right have not changed significantly since the IMF was founded in 1945. But informally, among the staff inside the IMF, these controls became heresy in the 1980s and 1990s, prompting critics to accuse the IMF of indiscriminately encouraging the liberalization of controls and precipitating a wave of financial crises in emerging markets in the late 1990s. In *Capital Ideas*, Jeffrey Chwieroth explores the inner workings of the IMF to understand how its staff's thinking about capital controls changed so radically. In doing so, he also provides an important case study of how international organizations work and evolve. Drawing on original survey and

archival research, extensive interviews, and scholarship from economics, politics, and sociology, Chwioroth traces the evolution of the IMF's approach to capital controls from the 1940s through spring 2009 and the first stages of the subprime credit crisis. He shows that IMF staff vigorously debated the legitimacy of capital controls and that these internal debates eventually changed the organization's behavior--despite the lack of major rule changes. He also shows that the IMF exercised a significant amount of autonomy despite the influence of member states. Normative and behavioral changes in international organizations, Chwioroth concludes, are driven not just by new rules but also by the evolving makeup, beliefs, debates, and strategic agency of their staffs.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary

theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Expanded and revised, the Second Edition of the Algebra Survival Guide unleashes its power for a new generation of students. Now that the Common Core Standards have changed how math is taught, this 2nd edition aligns its content to these broad new guidelines. The new Edition also adds advanced content. In its XTREME ALGEBRA section, the new edition tackles the topics of Functions, Inequalities and the Advanced Coordinate Plane, and it teaches story problems in all three areas. These additions update the book for today's elementary and secondary students; they also provide additional support for adults taking algebra in their return to college. Plus, with its newly expanded index and glossary, the 2nd Edition makes all of its content easy to find. The book retains the cartoons, analogies and conversational format that brought out praise from all corners and garnered the book both a Parents Choice Commendation and a Golden Porch Award for pedagogical excellence.

There has long been a gap of misunderstanding between the police and the public they serve. Street Stories takes a major step in bridging that gap. Kevin Lackey entertains us with his first hand account of a fascinating compilation of

stories taken straight from his beat, making us feel as though we are right beside him wearing the badge and gun ourselves! Street Stories enables all of us to get a glimpse of what police officers all over the country are faced with every day. In addition to doing a masterful job of conveying the life of a beat cop on the streets, Kevin Lackey takes us behind the scenes with a wealth of information not typically revealed to the general public. Does radar work in the rain? Why do police officers speed even without lights and sirens? What can we do to protect ourselves and our family? You will have all of these answers and many more after reading this entertaining and informative treasure. Step inside the patrol car and answer calls that will have you laughing and crying, cringing and gasping, but always anxious for the next one! Street Stories is certain to become one of America's favorites!

In this adventure motorsports memoir, the first Canadian motorcycle racer to complete the infamous Paris-Dakar Rally recounts his incredible journey. The Paris-Dakar Rally is without question the most arduous and notorious off-road motorsports event on the planet. Since its inception in 1979, it has attracted more than three thousand adventurers from all walks of life. The men and women who have taken up the "Dakar challenge" have at least one thing in common: a desire to measure themselves against the desolate sands of the Sahara. In 2001, Canadian adventure racer Lawrence Hacking entered what would be the last rally on the iconic route from Paris to Dakar. In *To Dakar and Back*, Hacking, in collaboration with motorsport journalist Wil De Clercq, recounts the three weeks of blood, sweat, and tears that took him on that ten thousand kilometer journey in the heat of competition from the glitzy streets of the French capital through the hinterland of North

Western Africa and the triumph of self-realization.

At nineteen, Ashley Fiolek is already the top female competitor in a tough men's sport:

motocross, a form of off-road motorcycle racing that is one of the most competitive and dangerous extreme sports in the world. Since going pro in late 2007, Fiolek has taken gold at the X Games, won the American Women's Motocross Championship twice, and become the first woman in American motocross history to be signed to a factory team—the highest echelon of industry backing. But Fiolek's rise has not come without obstacles. Fiolek was born profoundly deaf, a handicap that makes everyday life difficult—and competition on the track downright dangerous. Originally misdiagnosed as "mildly retarded," she was a painfully shy and introverted child—until her parents introduced her to the world of dirt bikes, which helped her escape the silence in her head and connect with others who shared her passion. She began racing at seven, and as her successes grew through hard work and no small number of broken bones, so did her confidence. Fiolek has never believed her disability should stand in the way of her dreams. Nor has she allowed her gender to limit her career—motocross historically has been a men's sport, but with the love and support of her dirt-obsessed family, including her "Grandpa Motorcycle," her little brother, Kicker, and her dogs, Turbo and Rocco, Ashley has emerged as one of the sport's most talked-

about stars, changing the way the entire industry views women. Armed with her extraordinary talent, contagious grin, and deep faith in God, Fiolek continues to venture into unknown territory, relentlessly pushing herself—and women's motocross—to ever-greater heights. *Kicking Up Dirt* is a remarkable, inspiring tale of a young woman's courage and determination to succeed in the face of truly challenging obstacles.
