MacBook For Dummies John Wiley & Sons

Our future hinges on a set of elements that few of us have even heard of. In this surprising and revealing book, David S. Abraham unveils what rare metals are and why our electronic gadgets, the most powerful armies, and indeed the fate of our planet depend on them. These metals have become the building blocks of modern society; their properties are now essential for nearly all our electronic, military, and “green” technologies. But their growing use is not without environmental, economic, and geopolitical consequences. Abraham traces these elements’ hidden paths from mines to our living rooms, from the remote hills of China to the frozen Gulf of Finland, providing vivid accounts of those who produce, trade, and rely on rare metals. He argues that these materials are increasingly playing a significant role in global affairs, conferring strength to countries and companies that can ensure sustainable supplies. Just as oil, iron, and bronze revolutionized previous eras, so too will these metals. The challenges this book reveals, and the plans it proposes, make it essential reading for our rare metal age.

In Production House Cinema: Starting and Running Your Own Cinematic Storytelling Business, renowned video storyteller Kurt Lancaster offers both students and professionals a practical guide to starting their own video production company and creating cinematic, client-based video content. Utilizing practical know-how along with in-depth analysis and interviews with successful independent production houses like Stillmotion and Zandrak, Lancaster follows the logistics and inspiration of creating production house cinema from the initial client pitch all the way through financing and distribution. The book includes: An examination of the cinematic and narrative style and how to create it; A discussion of the legal procedures and documents necessary for starting and operating a production house; Advice on crafting a portfolio, reel, and website that both demonstrates your unique style and vision and attracts clients; A guide to the financial business of running an independent production house, including invoicing, accounting, and taxes—and how much you should charge clients; Tips for how to better communicate with clients, and how to develop and shape a client’s story; A breakdown of how to select the right gear and equipment for a shoot, on budget; Cinematic case studies that offer detailed coverage of several short films made for clients.

Accidental Genius Pebble

This updated and expanded edition of Persuasive Communication offers a comprehensive introduction to persuasion and real-world decision making. Drawing on empirical research from social psychology, neuroscience, business communication research, cognitive science, and behavioral economics, Young reveals the thought processes of many different audiences—from investors to CEOs—to help students better understand why audiences make the decisions they make and how to influence them. The book covers a broad range of communication techniques, richly illustrated with compelling examples, including resumes, speeches, and slide presentations, to help students recognize persuasive methods that do, and do not, work.

A detailed analysis of the emotions and biases that go into decision making arms students with perceptive insights into human behavior and helps them apply this understanding with various decision-making aids. Students will learn how to impact potential employers, clients, and other audiences essential to their success. This book will prove fascinating to many, and especially useful for students of persuasion, rhetoric, and business communication.

Macs For Dummies Springer

The three-volume set LNCS 12771-12773 constitutes the refereed proceedings of the 13th International Conference on Cross-Cultural Design, CCD 2021, which was held as part of HCI International 2021 and took place virtually during July 24-29, 2021. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers included in the HCII-CCD volume set were organized in topical sections as follows: Part I: Cross-cultural experience design; cross-cultural product design; cultural differences and cross-cultural communication; Part II: Culture, arts and creativity; culture, learning and well-being; social change and social development; Part III: CCD in cultural heritage and tourism; CCD in autonomous vehicles and driving; CCD in virtual agents, robots and intelligent assistants.

Up and Running with AutoCAD 2022 Scientific e-Resources

There is no product on the planet that enjoys the devotion of a Macintosh computer. Famously dedicated to their machines, many Mac fans eat, sleep, and breathe Macintosh. The Cult of Mac is the first book about Macintosh culture, arguably the largest distinct subculture in computing. Written by Wired News managing editor Leander Kahney, The Cult of Mac is an in-depth look at Mac users and their unique, creative, and often very funny culture. Like fans of a football team or a rock group, Macintosh fans have their own customs, with clearly defined obsessions, rites and passages. From people who get Mac tattoos and haircuts, to those who furnish their apartments with empty Mac boxes, this book details Mac fandom in all of its forms. The paperback edition includes an all-new chapter about the iPod, updates throughout, and new photos that reflect current Apple technology.

Macbook Pro MIT Press

Our thermal environment is as rich in cultural associations as our visual, acoustic, olfactory, and tactile environments. This book explores the potential for using thermal qualities as an expressive element in building design. Until quite recently, building technology and design has favored high-energy-consuming mechanical methods of neutralizing the thermal environment. It has not responded to the various ways that people use, remember, and care about the thermal environment and how they associate their thermal sense with their other senses. The hearth fire, the sauna, the Roman and Japanese baths, and the Islamic garden are discussed as archetypes of thermal delight about which rituals have developed—reinforcing bonds of affection and ceremony forged in the thermal experience. Not only is thermal symbolism now obsolete but the modern emphasis on central heating systems and air conditioning and hermetically sealed buildings has actually damaged our thermal coping and sensing mechanisms. This book for the solar age could help change all that and open up for us a new dimension of architectural experience. As the cost of energy continues to skyrocket, alternatives to the use of mechanical force must be developed to meet our thermal needs. A major alternative is the use of passive solar energy, and the book will provide those interested in solar design with a reservoir of ideas.

Advanced Communication and Control Methods for Future Smartgrids In Easy Steps Limited

The DSLR cinema revolution began over ten years ago. Professional filmmakers, students, video journalists, event video shooters, production houses, and others jumped at the opportunity to shoot cinematic images on these low budget cameras. The first edition of the book mapped the way focusing exclusively on DSLRs. This new edition shows how you can create stunning cinematic images using low budget cinema cameras, from iPhones to the C200. The author examines new cameras and new projects as filmmakers shoot action movies with the Panasonic GH5, craft personal stories with Blackmagic ' s Pocket Cinema Camera, make documentaries and short films with the Canon C100 Mark II, and create music videos with the 5D Mark IV. This book, like the previous edition, takes the wisdom of some of the best shooters and empowers you to create visually stunning images with low budget cinema cameras. It includes six all new case studies, as well as updated examples from short films and documentaries. This book contains the essential tools to make you a better visual storyteller. FEATURES An examination of the creative and technical choices filmmakers face—everything from why we move cameras to shooting flat in order to widen the dynamic range of cameras Case studies from documentary filmmakers, news shooters, fiction makers, a visual anthropologist, and recent film school graduates An updated list of gear for low-budget filmmakers, including a section on what to look for in the gear you need to shoot and edit your projects
