Research skills are as critical to social work practitioners as skills in individual and group counselling, policy analysis, and community development. Adopting strategies similar to those used in direct practice courses, this book integrates research with social work practice, and in so doing promotes an understanding and appreciation of the research process. The third edition of Practising Social Work Research comprises twenty-seven case studies that illustrate different research

approaches, including quantitative, qualitative, single-subject, and mixed methods. The third edition also adopts a greater equity, diversity, and inclusivity focus than the previous editions. Through the use of applied, real-life examples, the authors demonstrate the processes of conceptualization, operationalization, sampling, data collection and processing, and implementation. Designed to help the student and practitioner become more comfortable with research procedures, Practising Social Work Research capitalizes on the strengths that social work students bring to assessment and problem solving.
