The world's superlative road
trips—scenic, thrilling, and
memorable—in both natural
and urban settings. For
anyone who has fallen under
its spell, a car represents
freedom and adventure. For
decades, the American
tradition of the road trip has
been bound up with the idea
of new possibilities and new
horizons. This book is an
indispensable guide to the

most beautiful, breathtaking, extraordinary, and fun road trips the world has to offer. Complete with road trips varying in length and level of challenge, from an epic transglobal route inspired by Ewan McGregor and Charley Boorman's Long Way Round documentary series to a two-mile blast around Monaco's F1 street circuit, there is something for any adventurer. Each entry provides information about distance, start and finish points, road surfaces, must-see stop-offs, detours, and other details to plan an unforgettable trip. Entries are organized into three categories: Scenic, Adventure, and Culture. One can marvel at the views from Cape Town's scenic Chapman's Peak Drive or central California's Pacific Coast Highway, but the thrill seeker might opt for the hair-raising ride through Montenegro's coastal mountains to reach the medieval walled town of Sveti Stefan on the Adriatic. The culture category features routes inspired by film, literature, and history: re-create Thelma and Louise's heart-pounding joyride (minus the final leap), savor Japan's "Romance Road" through unspoiled small

towns, or follow Jack Kerouac's path from On the Road.

Automotive News Henry Holt and Company This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it

that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.
