Publishing

This book gathers the
proceedings of the 2nd
International Conference on

Advanced Intelligent Systems and Informatics (AISI2016), which took place in Cairo, Egypt during October 24–26, 2016. This international interdisciplinary conference, which highlighted essential research and developments in the field of informatics and intelligent systems, was organized by the Scientific Research Group in Egypt (SRGE) and sponsored by the IEEE Computational Intelligence Society (Egypt chapter) and the IEEE Robotics and Automation Society (Egypt Chapter). The book's content is divided into four main sections:

Intelligent Language Processing, Intelligent Systems, Intelligent Robotics Systems, and Informatics. Arabic and Chinese Handwriting Recognition Hodder Education This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems (DAS 2004) held during September 8 – 10, 2004 at the University of Florence, Italy. Several papers represent the state of the art in a broad range of “ traditional ” topics such as layout analysis, applications to graphics recognition, and handwritten

documents. Other contributions address the description of complete working systems, which is one of the strengths of this workshop. Some papers extend the application domains to other media, like the processing of Internet documents. The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents, a taste which frequently requires the analysis of color documents. A total of 17 papers are associated with these topics, whereas two years ago (in DAS 2002) only a couple of

papers dealt with these problems. In our view there are three main reasons for this new wave in the DAS community. From the scientific point of view, several research fields reached a thorough knowledge of techniques and problems that can be effectively solved, and this expertise can now be applied to new domains. Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries.

This book presents the original articles that have been accepted in the 2019 INNS Big Data and Deep Learning (INNS BDDL) international conference, a major event for researchers in the field of artificial neural networks, big data and related topics, organized by the International Neural Network Society and hosted by the University of Genoa. In 2019 INNS

BDDL has been held in Sestri Levante (Italy) from April 16 to April 18. More than 80 researchers from 20 countries participated in the INNS BDDL in April 2019. In addition to regular sessions, INNS BDDL welcomed around 40 oral communications, 6 tutorials have been presented together with 4 invited plenary speakers. This book covers a broad range of topics in big data and deep learning, from theoretical aspects to state-of-the-art

applications. This book is directed to both Ph.D. students and Researchers in the field in order to provide a general picture of the state-of-the-art on the topics addressed by the conference.

Essential GCSE Latin is a practical and accessible guide for students. Covering all the linguistic requirements (grammar, syntax and vocabulary) for GCSE Latin, the book is closely linked to OCR's current syllabus. This immensely useful textbook provides straightforward and easy to understand explanations of every grammatical construction needed for GCSE, from ablative absolutes to result

clauses. Each point of grammar is generously illustrated with examples and practice sentences. The book concentrates on understanding the principles behind accident and syntax, reducing the need for rote learning. 650 practice sentences provide ample opportunity for the student to get to grips with every point of grammar as it is introduced. Essential GCSE Latin can be used on its own, or a revision guide for a fast but comprehensive recap of the language. Helpful, concise and clear, the book has an easily navigable structure which breaks down the language into

bite-sized sections. Essential GCSE Latin also includes a list of all the vocabulary needed for the exam and a glossary of grammar terms for quick and easy reference. An appendix of 15 practice passages provides further experience and helps equip the student for the current Language 2 paper. This new edition includes revised exercises throughout the book and updated vocabulary.

Guide to OCR for Arabic Scripts Bloomsbury Publishing
Building on and updating some of the issues addressed in *Starting to Teach Latin*, Steven Hunt provides a guide for novice and more

experienced teachers of Latin in schools and colleges, who work with adapted and original Latin prose texts from beginners' to advanced levels. It draws extensively on up-to-date theories of second language development and on multiple examples of the practices of real teachers and students. Hunt starts with a detailed look at deductive, inductive and active teaching methods, which support teachers in making the best choices for their students' needs and for their own personal preferences, but goes on to organise the book around the principles of listening, reading, speaking and writing

Latin. It is designed to be informative, experimental and occasionally provocative. The book closes with two chapters of particular contemporary interest: 'Access, Diversity and Inclusion' investigates how the subject community is meeting the challenge of teaching Latin more equitably in today's schools; and 'The Future' offers some thoughts on lessons that have been learnt from the experiences of online teaching practices during the Covid-19 lockdowns. Practical examples, extensive references and a companion website at www.stevenhuntclassics.com are included. Teachers of Latin

will find this book an invaluable tool inside and outside of the classroom.

The Fundamentals of Typography

Nelson Thornes
The two-volume set LNCS 11233 and LNCS 11234 constitutes the proceedings of the 19th International Conference on Web Information Systems Engineering, WISE 2018, held in Dubai, United Arab Emirates, in November 2018. The 48 full papers and 21 short papers presented were carefully reviewed and selected from 209 submissions. The papers are organized in topical sections on blockchain, security, social

network and security, social network, microblog data analysis, graph data, information extraction, text mining, recommender systems, medical data analysis, Web services and cloud computing, data stream and distributed computing, data mining techniques, entity linkage and semantics, Web applications, and data mining applications.

Publishing

This collection of tests provides practice for

students preparing to take the new Latin language examinations at the WJEC examination board Levels 1 and 2. It also includes tests similar to those used in the OCR examination board GCSE examinations. The book is divided into five sections, each devoted to a different format or level of tests. Words that are not expected to be known at each level are glossed. The range of grammatical and syntactical features is similar to that found in the public examinations. The tests are designed to cover translation

and comprehension of specially constructed stories in Latin. Readers are not expected to have familiarity with any particular course book, and the stories may also be used simply as a graduated Latin reader, if desired. Also available from Bloomsbury: Latin Language Tests, by Mark Schemes 9781853997525

The Times Index

Bloomsbury Publishing
This book constitutes the thoroughly refereed post-conference proceedings of the Second International Symposium on Intelligent Informatics (ISI 2013) held in Mysore, India during August 23-24, 2013. The 47 revised papers presented were carefully reviewed and selected from 126 initial submissions. The papers are organized in topical sections on pattern recognition, signal and image processing; data

mining, clustering and intelligent information systems; multi agent systems; and computer networks and distributed systems. The book is directed to the researchers and scientists engaged in various fields of intelligent informatics.

Greek to GCSE: Part 1

Bloomsbury Publishing
A classic anthology for GCSE. The eight thematic sections of poetry include works by Catullus, Horace, Lucretius, Martial, Ovid, Petronius, Seneca and

Virgil. The eight sections of adapted prose include sections from Apuleius, Caesar, Cicero, Pliny, Sallust, Tacitus, and the Acts of the Apostles in the Vulgate. Glosses and other explanations are provided opposite each of the texts, and the writing is illustrated throughout by paintings and photographs of artifacts in the Roman world. For the student, there is a complete vocabulary at the end of the book. For the teacher, there is an accompanying handbook giving additional suggestions for discussions

in the classroom.

Virgil: Aeneid Book XI

Cambridge University Press
Designed for North American students, this special version of the Oxford Latin Course combines the best features of both modern and traditional methods of Latin teaching, providing an exciting, stimulating introduction and approach to Latin based on the reading of original texts. In this four-volume North American edition, the order of declensions corresponds to customary U.S. usage,

and the spelling has been Americanized. In addition, it offers full-color illustrations and photographs throughout Parts I and II and an expanded Teacher's Book with translations for each part. Parts I-III (now available in hardcover editions) are built around a narrative detailing the life of Horace, now based more closely on historical sources, which helps students to get to know real Romans--with their daily activities, concerns, and habits--and to develop an understanding of Roman civilization during the

time of Cicero and Augustus. Part IV (paperback) is a reader consisting of extracts from Caesar, Cicero, Catullus, Virgil, Livy, and Ovid. The second edition of the Oxford Latin Course has been carefully designed to maximize student interest, understanding, and competence. It features a clearer presentation of grammar, revised narrative passages, new background sections, more emphasis on daily life and on the role of women, a greater number and variety of exercises, and review chapters and tests.

Each chapter opens with a set of cartoons with Latin captions that illustrate new grammar points. A Latin reading follows, with new vocabulary highlighted in the margins and follow-up exercises that focus on reading comprehension and grammatical analysis. A background essay in English concludes each chapter. Covering a variety of topics--from history to food, from slavery to travel, these engaging essays present a well-rounded picture of Augustan Rome. The Oxford Latin Course, Second

Edition offers today's students and teachers an exceptionally engaging and attractive introduction to the language, literature, and culture of Rome--one that builds skills effectively and is exciting to use.

Recent Advances in Big Data and Deep Learning
Springer

This book constitutes the refereed proceedings of the 13th European Conference on Research and Advanced Technology for Digital Libraries, ECDL 2009,

held in Corfu, Greece, in September/October 2009. The 28 revised full papers and 6 revised short papers presented together with 2 panel description, the extended abstracts of 20 revised poster and 16 demo papers were carefully reviewed and selected from a total of 181 submissions. The papers are organized in topical sections on services, infrastructures, interaction, knowledge organization systems, interfaces, resource

discovery, architectures, information retrieval, preservation, and evaluation.

Latin to GCSE A&C Black New 2017 Cambridge A Level Maths and Further Maths resources help students with learning and revision. Written for the OCR AS/A Level Mathematics specifications for first teaching from 2017, this print Student Book covers the content for AS and the first year of A Level. It balances accessible

exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study. Essential GCSE Latin OUP Oxford

Latin Stories is an ideal first reader for students of Latin. It offers 100 self-contained passages of manageable length, chosen for their intrinsic interest and adapted from a wide range of ancient authors. Generous help is given, with a short introduction to each story and glossing of all proper names and non-GCSE vocabulary. The collection will also be attractive to older students beginning or returning to the language. Updated to

match the 2016 OCR specification, this edition has been restructured to reflect the new examinations, which now have a single language paper. Section 1 provides 30 passages, starting with very short and simple stories and building up to the level of the current OCR GCSE. Section 2 provides 30 differentiated passages of increasing difficulty on historical and miscellaneous topics. Section 3 provides 20 shorter passages of

uniform length on mythological topics, with comprehension questions, in the style of Section A of the new GCSE language paper. Section 4 provides 20 passages on historical topics, with comprehension and unseen sections, in the style of Section B of the new GCSE language paper. The new edition is supported by a companion website with an answer key and additional passages.

Text, Speech, and

Dialogue Bloomsbury Publishing
Introduces the fundamental principles of typographic theory and practice. This title offers an essential guide to the subject of typography and its role within graphic design.

Government Reports Index Cambridge University Press
Latin Beyond GCSE covers all the linguistic requirements for the OCR AS and A Level in Latin. It aims to bring students to a point where they can

tackle original Latin texts with confidence. Although designed as a continuation of Latin to GCSE, it is self-contained and can be used independently. This new edition is brought in line with the new OCR specifications and benefits from a completely redesigned layout, with added colour and images. The answer key is available on a companion website. The first part of the book introduces new constructions and the translation of sentences

from English to Latin, with reading passages at AS standard. The next sections provide translation and comprehension passages at AS and A-level, including verse unseens, scansion, and a list of 300 common poetic words. Next come longer unadapted extracts from a range of authors. Finally there is a reference section including a summary of all constructions, a comprehensive grammar,

and a general vocabulary of about 1200 Latin words. Cambridge Latin Anthology Springer
This Guide to OCR for Arabic Scripts is the first book of its kind, specifically devoted to this emerging field. Topics and features: contains contributions from the leading researchers in the field; with a Foreword by Professor Bente Maegaard of the University of Copenhagen; presents a detailed overview of Arabic character recognition technology, covering a range of different aspects of

pre-processing and feature extraction; reviews a broad selection of varying approaches, including HMM-based methods and a recognition system based on multidimensional recurrent neural networks; examines the evaluation of Arabic script recognition systems, discussing data collection and annotation, benchmarking strategies, and handwriting recognition competitions; describes numerous applications of Arabic script recognition technology, from historical Arabic manuscripts to online

Arabic recognition.

Independent Schools Yearbook 2012-2013

Bloomsbury Publishing

A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen

understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the

preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

Oxford Latin Course Focus

Vergil Aeneid Commentaries

A complete treatment of Aeneid XI, with a thorough introduction to key characters, context, and metre, and a detailed line-by-line commentary which will aid readers' understanding of Virgil's language and syntax. Indispensable for students and instructors reading this

important book, which includes the funeral of Pallas and the death of Camilla.
