The two-volume set LNCS 11233 and LNCS 11234 constitutes the proceedings of the 19th International Conference on Web Information Systems Engineering, WISE 2018, held in Dubai, United Arab Emirates, in November 2018. The 48 full papers and 21 short papers presented were carefully reviewed and selected from 209 submissions. The papers are

organized in topical sections on blockchain, security, social network and security, social network, microblog data analysis, graph data, information extraction, text mining, recommender systems, medical data analysis, Web services and cloud computing, data stream and distributed computing, data mining techniques, entity linkage and semantics, Web applications, and data mining applications. Reading Medieval Latin Bristol Classical Press
A companion to

Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote

learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

This book is part of a series of individual volumes covering Books 1-6 of Vergil's Aeneid.

Each book will include an introduction, notes, bibliography, commentary and glossary, and be edited by an expert in the field. These individual volumes will form a combined Vol 1-6 book as well.
Livy XXIX
Cambridge University Press
This course was written in response to a JACT (Joint Association of Classical Teachers) survey of over 100 schools. It offers a fast-track route to GCSE for those with limited time. It is based on experience of what pupils find difficult, concentrating on the essentials and

on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study. The course has been tested and refined in 15 schools over the last three years. Part 1 covers the basics: the main declensions, a range of active tenses and a vocabulary of 275 Greek words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the

preliminaries, each chapter concentrates on stories with one source or subject: Aesop, the "Odyssey" and Alexander the Great. Part 1 is self-contained, with its own reference section. *Latin Momentum Tests for GCSE* Bloomsbury Publishing Like Carl Darling Buck's *Comparative Grammar of Greek and Latin* (1933), this book is an explanation of the similarities and differences between Greek and Latin morphology and lexicon through an account of their prehistory. It also aims to discuss the principal features of Indo-European linguistics. Greek and

Latin are studied as a pair for cultural reasons only; as languages, they have little in common apart from their Indo-European heritage. Thus the only way to treat the historical bases for their development is to begin with Proto-Indo-European. The only way to make a reconstructed language like Proto-Indo-European intelligible and intellectually defensible is to present at least some of the basis for reconstructing its features and, in the process, to discuss reasoning and methodology of reconstruction (including a weighing of alternative reconstructions). The result is a compendious

handbook of Indo-European phonology and morphology, and a vade mecum of Indo-European linguistics--the focus always remaining on Greek and Latin. The non-classical sources for historical discussion are mainly Vedic Sanskrit, Hittite, and Germanic, with occasional but crucial contributions from Old Irish, Avestan, Baltic, and Slavic.

Aeneid 2

Ovid Unseens provides a bank of 80 practice passages of Latin verse, half elegiac and half hexameter. Taken from across Ovid's works, including the Metamorphoses,

Fasti, Heroides, Amores and Tristia, the passages help build students' knowledge and confidence in a notoriously difficult element of Latin language learning. Every passage begins with an introduction, outlining the basic story and theme of the passage, followed by a 'lead-in' sentence, paraphrasing the few lines before the passage begins. The first set of passages are translation exercises of 12-16 lines, each accompanied by a

Discendum box which highlights a key feature of poetic Latin, equipping students further with the skills to tackle ever more difficult verse passages at first sight. These are followed by longer passages with scansion exercises and questions on comprehension and stylistic analysis, replicating unseen verse exam questions in full. The comprehensive introduction provides an overview of Ovid's life and work, an account of some of

the stylistic features of his poetry, and practical help in the form of tips on how to approach the more challenging lines of Latin verse and produce a fluent translation. A step-by-step guide to scansion, with practice exercises and answers, covers the essential principles for scanning lines of Latin verse, from the basics of understanding syllables, feet and types of metres, to coping with elision and caesurae. A guideline verse vocabulary list is provided which

covers words particularly common in Ovid's works. Broken down into small 'checklists', each corresponding to a group of four passages, the vocabulary is learnt cumulatively and as it is encountered.

Frankish Rural Settlement in the Latin Kingdom of Jerusalem
Springer

This Guide to OCR for Arabic Scripts is the first book of its kind, specifically devoted to this emerging field. Topics and features: contains contributions from

the leading researchers in the field; with a Foreword by Professor Bente Maegaard of the University of Copenhagen; presents a detailed overview of Arabic character recognition technology, covering a range of different aspects of pre-processing and feature extraction; reviews a broad selection of varying approaches, including HMM-based methods and a recognition system based on multidimensional recurrent neural networks;

examines the evaluation of Arabic script recognition systems, discussing data collection and annotation, benchmarking strategies, and handwriting recognition competitions; describes numerous applications of Arabic script recognition technology, from historical Arabic manuscripts to online Arabic recognition.

GCSE Latin Anthology for OCR Teacher's Handbook Hodder Education

Cicero composed his supposedly sordid incendiary sex life to a Philippic only a sustained critique of few months after what Cicero saw as Rome was rocked by the brutal Antony's tyrannical ambitions. assassination of Vituperatively brilliant and Julius Caesar. In the politically tumultuous committed, it is both aftermath of a carefully crafted Caesar's death, literary artefact and Cicero and Mark an explosive Antony found themselves on example of crisis opposing sides of an rhetoric. It increasingly bitter ultimately led to and dangerous battle Cicero's own for control. gruesome death. Philippic 2 was a This course book weapon in that war. offers a portion of Conceived as the original Latin Cicero's response to text, vocabulary a verbal attack from aids, study Antony in the questions, and an Senate, Philippic 2 extensive commentary. is a rhetorical Designed to stretch firework that ranges and stimulate from abusive readers, Ingo references to Gildenhard's Antony's

volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Cicero, his oratory, the politics of late-republican Rome, and the transhistorical import of Cicero's politics of verbal (and physical) violence.

The Fundamentals of Typography

Springer

In AD 8 Ovid's brilliant career was abruptly ruined when the Emperor Augustus banished him, for reasons never satisfactorily explained, to Tomis

(Constanta) on the Black Sea. The five books of *Tristia* (Sorrrows) express his reaction to this savage and, as he clearly regarded it, unjust sentence. Though their ostensible theme is the misery and loneliness of exile, their real message, if they are read with the care they deserve, is one of affirmation. With a wit and irony that borders on defiance, Ovid repeatedly asserts the injustice of his sentence and of the preeminence of the eternal values of poetry over the ephemeral dictates of an earthly power. In technical skill and inventiveness these elegies rank with the *Art of Love* or the *Fasti*. For this new translation Alan Melville has

reproduced, in rhyming stanzas, the virtuosity, wit, and elegance of the original.

Latin to GCSE Part I Bloomsbury

Publishing

Latin Beyond

GCSE covers all the

linguistic

requirements for the

OCR AS and A

Level in Latin. It

aims to bring

students to a point

where they can

tackle original Latin

texts with

confidence.

Although designed

as a continuation of

Latin to GCSE, it is

self-contained and

can be used

independently. This

new edition is

brought in line with

the new OCR

specifications and

benefits from a completely redesigned layout, with added colour and images. The answer key is available on a companion website. The first part of the book introduces new constructions and the translation of sentences from English to Latin, with reading passages at AS standard. The next sections provide translation and comprehension passages at AS and A-level, including verse unseens, scansion, and a list of 300 common poetic words. Next come longer unadapted extracts from a range of authors. Finally

there is a reference section including a summary of all constructions, a comprehensive grammar, and a general vocabulary of about 1200 Latin words.

Latin Stories

Springer

First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the

ancient Greeks.

Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics and is self-contained, with its own reference section. It covers the main declensions, a range of active tenses and a vocabulary of 250 Greek words to be learned. Pupil confidence is built up by constant consolidation of the material

covered. After the preliminaries, each chapter concentrates on stories with one source or subject: Aesop, Homer's Odyssey and Alexander the Great, providing an excellent introduction to Greek culture alongside the language study. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of

principles in both accident and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study. Greek to GCSE: Part 1 A&C Black Latin Stories is an ideal first reader for students of Latin. It offers 100 self-contained passages of manageable length, chosen for their intrinsic interest and adapted from a wide range of ancient authors. Generous help is given, with a short

introduction to each story and glossing of all proper names and non-GCSE vocabulary. The collection will also be attractive to older students beginning or returning to the language. Updated to match the 2016 OCR specification, this edition has been restructured to reflect the new examinations, which now have a single language paper. Section 1 provides 30 passages, starting with very short and simple stories and building up to the level of the current OCR GCSE. Section 2 provides 30 differentiated passages of increasing difficulty on historical and

miscellaneous topics. Section 3 provides 20 shorter passages of uniform length on mythological topics, with comprehension questions, in the style of Section A of the new GCSE language paper. Section 4 provides 20 passages on historical topics, with comprehension and unseen sections, in the style of Section B of the new GCSE language paper. The new edition is supported by a companion website with an answer key and additional passages.

Recent Advances in Big Data and Deep Learning A&C Black
This book presents the original articles that have been

accepted in the 2019 INNS Big Data and Deep Learning (INNS BDDL) international conference, a major event for researchers in the field of artificial neural networks, big data and related topics, organized by the International Neural Network Society and hosted by the University of Genoa. In 2019 INNS BDDL has been held in Sestri Levante (Italy) from April 16 to April 18. More than 80 researchers from 20 countries participated in the INNS BDDL in April 2019. In addition to regular sessions, INNS BDDL welcomed around 40 oral communications, 6 tutorials have been presented together with 4 invited plenary speakers. This book covers a broad range

of topics in big data and deep learning, from theoretical aspects to state-of-the-art applications. This book is directed to both Ph.D. students and Researchers in the field in order to provide a general picture of the state-of-the-art on the topics addressed by the conference.

Prose Unseens for A-Level Latin
Bloomsbury Publishing
This three-volume set (CCIS 1367-1368) constitutes the refereed proceedings of the 5th International Conference on Computer Vision and Image Processing, CVIP 2020, held in Prayagraj, India, in

December 2020. Due to the COVID-19 pandemic the conference was partially held online. The 134 papers were carefully reviewed and selected from 352 submissions. The papers present recent research on such topics as biometrics, forensics, content protection, image enhancement/super-resolution/restoration, motion and tracking, image or video retrieval, image, image/video processing for autonomous vehicles, video scene understanding, human-computer interaction, document image

analysis, face, iris, emotion, sign language and gesture recognition, 3D image/video processing, action and event detection/ recognition, medical image and video analysis, vision-based human GAIT analysis, remote sensing, and more. **Model-Driven Organizational and Business Agility** Springer Nature Caribbean countries have had to navigate multiple crises, which have tested their collective resolve through time. In this regard, the region's landscape has been shaped by an interplay of vulnerability and

resilience which has brought to the fore possibilities and contradictions. It is within this context that the effects of the COVID-19 pandemic must be considered. **Interdisciplinary Perspectives on COVID-19 and the Caribbean, Volume 2: Society, Education and Human Behaviour** provides a comprehensive, multi- and interdisciplinary assessment of the impact of the COVID-19 pandemic, using the Caribbean as the site of enquiry. The edited collection mobilises critical perspectives brought to bear on research

produced within and beyond the boundaries and boundedness of conventional academic disciplinary divides, in response to the multi-dimensional crises of our time. This volume is divided into four (4) parts consisting of twenty-three (23) chapters and weaves together four broad thematic strands: COVID-19 and Caribbean Society; COVID-19 Religion and Rights; Psycho-social Impacts of COVID-19; and Education, Innovation, and Technology. Authors working within and across the human, social, physical and life sciences consider the myriad effects of the health crisis in the region, interrogating these experiences from the granular to macro level, utilising inter and multidisciplinary lenses. Collectively, the chapters which constitute Volume II expose the fault lines in Caribbean societies, which are deeply rooted in the region's history and delineate the precise ways in which the pandemic has transformed lives and livelihoods in the region. The culmination of this collection offers a reimagining of our Caribbean contemporary futures in the hope of finding home-grown solutions, avenues and possibilities.

Document Analysis Systems VI
Cambridge University Press
This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems (DAS 2004) held during September 8–10, 2004 at the University of Florence, Italy. Several papers represent the state of the art in a broad range of “traditional” topics such as layout analysis, applications to graphics recognition, and handwritten documents. Other

contributions address of papers dealt with the description of these problems.
