This book provides a unique analysis and description of the linguistic challenges faced by school students as they move from primary to secondary school, a major transition, which some students struggle with emotionally and academically. The study:

- draws on a bespoke corpus of 2.5 million words of written materials and transcribed classroom recordings, provided by the project's partner schools;
- combines quantitative and qualitative approaches to the corpus data to explore linguistic variation across school levels, registers and subjects;
- describes the procedures of corpus compilation and analysis of written and spoken academic language, showing how modern corpus tools can be applied to this far-reaching social and educational issue;
- uncovers differences and similarities between the academic language that school children are exposed to at primary and secondary school, contrasting this against the backdrop of the non-academic language that they encounter outside school.

This book is important reading for advanced students and researchers in corpus linguistics, applied linguistics and teacher education. It carries implications for policymakers and schools looking to support students at this critical point in their schooling. Learning and teaching is an integrated process, and theory and practice cannot be separated. As in the previous Australasian edition, *Educational Psychology 3e* continues to emphasise the educational implications and applications of child development, cognitive science, learning

and teaching. Recurring themes throughout the text include ideas about education; social and socio-cultural aspects of education; schools, families and community; development, learning and curriculum; and effective teaching. Author Kay Margetts incorporates Australasian perspectives and applications using the work of Australasian researchers and teachers. Numerous examples, case studies, guidelines and practical tips from experienced teachers are used in the text to explore the connections between knowledge, understanding and practice.

A number of important issues form the basis of this book: How can the Information Technology (IT) standardization process, leading to unified products which are needed on the market, be made more efficient? Which current IT standards are of high quality, what factors have led to that high quality, and can those factors be re-created for other IT standards? What improvements to the quality of IT standards are needed? Which organizations should be involved? What permanent changes in the IT standardization scene are necessary? At what point in the evolution of a

technology is it appropriate to produce standards? Is strategic planning feasible in the current standardization approach? Diverse disciplines contributed to the findings in this book: computer scientists, standardization leaders and professionals, users and vendors, economists, auditors, software implementors, and communication specialists.

On the Write Track puts teachers' autonomy and their knowledge of what is right for their pupils at the heart of teaching writing. It explores a set of research-based principles, before illustrating these with case studies and examples of classroom practice. Writing is about communication. Learning to write gives children a voice that others will listen to – a voice they can use to share their ideas, articulate their feelings, amuse and delight their readers and argue for what they believe in. While every child, every teacher and every classroom are different, approaches to teaching writing can sometimes feel prescriptive, whether they are based on a particular curriculum model, commercial scheme, assessment system or underlying philosophy. This book provides freedom and choice by introducing a series of 'tracks' for writing teaching, including practical approaches to: Building a community of writers in the classroom Employing a process-led sequence for teaching writing Encouraging children to write for pleasure and share their own interests Exploring the use of rich and diverse texts as fuel for writing Drawing on spoken language and oracy to develop written communication Teaching grammar and punctuation to support writing Utilising feedback to help children develop their writing voice Using drama and play as starting points for writing Through considering these different tracks and thinking about how to weave them together into a coherent whole, teachers can help every child to make the journey to being a confident, skilled, keen writer.
