For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

The Guardian Index John Benjamins Publishing

This book provides a unique analysis and description of the linguistic challenges faced by school students as they move from primary to secondary school, a major transition, which some students struggle with emotionally and academically. The study: • draws on a bespoke corpus of 2.5 million words of written materials and transcribed classroom recordings, provided by the project's partner schools; • combines quantitative and qualitative approaches to the corpus data to explore linguistic variation across school levels, registers and subjects; • describes the procedures of corpus compilation and analysis of written and spoken academic language, showing how modern corpus tools can be applied to this far-reaching social and educational issue; • uncovers differences and similarities between the academic language that school children are exposed to at primary and secondary school, contrasting this against the backdrop of the non-academic language that they encounter outside school. This book is important reading for advanced students and researchers in corpus linguistics, applied linguistics and teacher education. It carries implications for policymakers and schools looking to support students at this critical point in their schooling. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

With chapter sequencing following the new Curriculum, this book supports you to make use of the opportunities presented in the National Curriculum for effective and engaging Primary English teaching. Covering all areas of the new National Curriculum for primary English and offering insight into effective teaching, it helps you connect what you need to teach, to how it can be taught. It opens up the opportunities in the new curriculum for creative and imaginative teaching and covers all areas of children's literacy from poetry and literature to SPAG. Throughout the text, case studies of teaching are used as a starting point for learning and guidance on practical teaching strategies is included in all chapters. A comprehensive guide to the teaching of primary English that will help you secure your subject knowledge and transform your teaching. Includes the full National Curriculum Programme of Study for English, key stages 1 and 2 as a useful reference for trainee teachers. Other books in this series include: Primary Science for Trainee Teachers and Primary Mathematics for Trainee Teachers

Robotica Elsevier Science & Technology

On the Write Track puts teachers' autonomy and their knowledge of what is right for their pupils at the heart of teaching writing. It explores a set of research-based principles, before illustrating these with case studies and examples of classroom practice. Writing is about communication. Learning to write gives children a voice that others will listen to - a voice they can use to share their ideas, articulate their feelings, amuse and delight their readers and argue for what they believe in. While every child, every teacher and every

classroom are different, approaches to teaching writing can sometimes feel prescriptive, whether they are based on a particular curriculum model, commercial scheme, assessment system or underlying philosophy. This book provides freedom and choice by introducing a series of 'tracks' for writing teaching, including practical approaches to: Building a community of writers in the classroom Employing a process-led sequence for teaching writing Encouraging children to write for pleasure and share their own interests Exploring the use of rich and diverse texts as fuel for writing Drawing on spoken language and oracy to develop written communication Teaching grammar and punctuation to support writing Utilising feedback to help children develop their writing voice Using drama and play as starting points for writing Through considering these different tracks and thinking about how to weave them together into a coherent whole, teachers can help every child to make the journey to being a confident, skilled, keen writer.

An Analysis of the Information Technology Standardization Process Taylor & Francis

Language researchers and practitioners often adopt tools and techniques without testing whether they really work as they should. This is understandable because most scholars do not have the time or expertise to properly evaluate the usefulness of all instruments, measures, and methods they need. It is therefore critical to have problem solvers in the field who gain the necessary expertise and take the time to scrutinize existing methods, identify problems, and offer new solutions. This volume represents the work of scholars who have done this; it is a collection of the latest advances, developments, and innovations regarding the modeling and measurement of learners' vocabulary growth curves, current levels of vocabulary knowledge and lexical proficiency, and the patterns of lexical diversity found in their language production. Several of the contributors also address the complex but important relationship between automated indices and human judgments of learners' lexical patterns and abilities.

Journal of Periodontology Oxford University Press

A number of important issues form the basis of this book: How can the Information Technology (IT) standardization process, leading to unified products which are needed on the market, be made more efficient? Which current IT standards are of high quality, what factors have led to that high quality, and can those factors be re-created for other IT standards? What improvements to the quality of IT standards are needed? Which organizations should be involved? What permanent changes in the IT standardization scene are necessary? At what point in the evolution of a technology is it appropriate to produce standards? Is strategic planning feasible in the current standardization approach? Diverse disciplines contributed to the findings in this book: computer scientists, standardization leaders and professionals, users and vendors, economists, auditors, software implementors, and communication specialists.

"In this eBook, you'll learn the principles of grammar and how to manipulate your words until they're just right. Strengthen your revising and editing skills and become a clear and consistent writer." --

The Linguistic Challenge of the Transition to Secondary School

This textbook is endorsed by OCR and supports the specification for GCSE Ancient History (first teaching September 2017). It covers the whole of Component 2, both the compulsory longer Period Study and the three optional Depth Studies: Longer Period Study: The Foundations of Rome: From Kingship to Republic, 753-440 BC by Paul Fowler Depth Study: Hannibal and the Second Punic War, 218-201 BC by Paul Fowler Depth Study: Cleopatra: Rome And Egypt, 69-30 BC by James Melville Depth Study: Britannia: From Conquest to Province, AD 43-c. 84 by Christopher Grocock How did reactions to the

---

exploitation of women and the poor make Rome great? How did Rome survive a fourteen-year invasion? Was Cleopatra a great queen? What was the impact of Roman invasion on Britain's diverse and prosperous culture? This book raises these and other key questions. GCSE students and their teachers will explore the foundation of Rome, the rise of its empire, and its interactions with neighbouring cultures, through the eyes of its historians and archaeology. This book invites us to look at Ancient Rome and the modern world in a new light. The ideal preparation for the final examinations, all content is presented by experts and experienced teachers in a clear and accessible narrative. Ancient literary and visual sources are described and analysed, with supporting images. Helpful student features include study questions, further reading, and boxes focusing in on key people, events and terms. Practice questions and exam guidance prepare students for assessment.
