Over the past forty years, state/provincial and local governments in the United States and Canada have provided foreign automakers with approximately \$4.80 billion in incentives in order to lure light vehicles assembly plants to their areas. This has included tax abatements, infrastructure construction, land giveaways, job training programs, and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light vehicles in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern—first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America—each has followed its own specific historical development path and has created its own unique growth trajectory. This book provides a unique historical and qualitative review of these ten vehicle makers, from their early beginnings to their export entry into the United States and/or Canada through early 2015. In addition, it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada. This includes the first foreign automaker to build its cars in the United States, De Dion-Bouton of France in July 1900, the early 20th Century endeavors of Fiat, Mercedes, and Rolls Royce, and the present day hopes of Chinese and Indian automakers. In the process, the text also provides an assessment of the top competing states and sites for any future plants, the possible incentives packages governments may offer to attract such facilities, and an estimated incentive value for each automaker. Overall, the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI. It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant. Its findings should also prove informative to urban and regional planning, political science, sociology, economics, labor, and international development scholars and students in North America and worldwide.

A new breed of investing that combines making more money and making a difference First there were the "Profiteers," investors who sought to make money regardless of the cost to society. Then came the "Do-Gooders," investors who avoided "bad" companies and supported "good" ones, based on philosophy over financials. Now this book introduces a brand new breed of investor: The HIP Investor. Written for those who want to profit handsomely while also building a better world, it will help you discover companies that are boosting the bottom line by solving key human needs through innovative products and services-benefiting customers, engaging employees, and delivering sustainable, profitable growth for their investors. That's the Human Impact + Profit, or HIP, approach. In *The HIP Investor*, R. Paul Herman-creator of the HIP methodology-introduces a revolutionary system that allows investors to profit and make a positive impact. It values measurable results over policies and philosophies, and shows how higher-performing companies can deliver both human impact and profit for shareholders. This book Provides a compelling, easy to use "investor tool-kit" so you can quickly "HIP" your portfolio Reveals the three questions you should ask when looking for a company to invest in Illustrates how world problems can be solved for profit by companies and investors making informed decisions You can make money while making a difference, and *The HIP Investor* is here to show you how.
