Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition) W. W. Norton & Company

On 24 October 1964, the Republic of Zambia was formed, replacing the territory which had formerly been known as Northern Rhodesia. Fifty years on, Andrew Sardanis provides a

---

sympathetic but critical insider's account of Zambia, from independence to the present. He paints a stark picture of Northern Rhodesia at decolonisation and the problems of the incoming government, presented with an immense uphill task of rebuilding the infrastructure of government and administration – civil service, law, local government and economic development. Sardanis was a minister at the heart of the government and later a highly successful entrepreneur. As a friend and colleague of many of the most prominent names in post-independence Zambia – from the presidencies of founding leader Kenneth Kaunda to the incumbent Michael Sata – he uses his unique eyewitness experience to provide an inside view of a country in transition. He looks at the highs and lows of Zambia's political development: a purposeful beginning followed by many blunders; confusion, at times bordering on

chaos, interspersed with flashes of sensible action and good work. This book provides a detailed examination of the major events in Zambia's history since independence and their effect on the country's development and progress, based on Sardanis's in-depth knowledge of Zambia and its people and the inner workings of its government.

Motivate pupils to develop their geographical skills, knowledge and understanding as they become engaged and accomplished geographers, ready for the demands of GCSE. Specifically designed to provide a solid foundation for the 2016 GCSE specifications, this Student Book takes an enquiry-based approach to learning within each unit and lesson. - Easily and cost-effectively implement a new KS3 scheme of work: this coherent single-book course covers the latest National

---

Curriculum content, providing 150 ready-made lessons that can be used flexibly for a two or three-year KS3 - Build and improve the geographical knowledge and skills that pupils need: every double-page spread represents a lesson, with rich geographical data and place contexts for pupils to interpret, analyse and evaluate - Lay firm foundations for GCSE: key vocabulary, command words and concepts are introduced gradually, preparing pupils for the content and question types they will encounter at GCSE, with a particular focus on analysis and evaluation questions - Effectively assess, measure and demonstrate progress: formative assessments throughout each lesson and summative end-of-unit reviews include questions that show whether pupils are 'working towards', 'meeting' or 'exceeding' expectations - Encourage pupils to check and drive their own progress: learning objectives and end-of-unit learning outcomes help pupils

reflect on their learning and make connections between key concepts and skills throughout the course

Geography

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates  
In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and

---

environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.
