The breakout star of Discovery's hit automotive restoration show Fast N' Loud takes readers on an entertaining ride through his wild life and behind the scenes of his hit show in this memoir and automotive handbook, revving with outrageous details and jaw-dropping stories, and injected with the quick-witted, foul-mouthed charm viewers love. "If we're gonna have fun, it better have a motor!" In Fast N' Loud, Richard Rawlings pushes into high gear, sharing the story of his rise to success, his show, and the automotive know-how that has made him famous. He begins with his own story--how he went from flat broke to a seat at the table with some of history's most iconic car guys. His road to the top is full of dangerous twists and hilarious turns, with a few precipitous cliffs in between, including getting shot defending his beloved 1965 Mustang fastback from carjackers, blowing out of town Fear-and-Loathing style, and picking up chicks and vagrants along the way. Rawlings then takes readers behind the scenes of Fast N' Loud, the series, sharing details on everything from the toughest car to restore to the easiest, his favorite restorations, travel and war anecdotes, and the best and worst cars to make it to the small screen. He finishes with a handy guide for classic and antique car enthusiasts that includes insider tricks of the trade. Want to know how to find a Model-T in mint condition? Need a carburetor for your '73 Ford Mustang? Want to meet other '60s Porsche owners? The answers are all here.

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

[How to Make Your Car Handle](#) Franklin Watts

With the heart of Stand By Me and the genius horror of Christine, MILE 81 is Stephen King unleashing his imagination as he drives past one of those road signs . . . At Mile 81 on the Maine Turnpike is a boarded up rest stop, a place where high school kids drink and get into the kind of trouble high school kids have always gotten into. It's the place where Pete Simmons goes when his older brother heads off to the gravel pit to play 'paratroopers over the side'. Pete, armed with only the magnifying glass he got for his tenth birthday, finds a discarded bottle of vodka in the boarded up burger shack and drinks enough to pass out. That's why he doesn't notice a freshly mud-spattered station wagon (which is strange because

there hadn't been any rain in New England for over a week) which veers into the Mile 81 rest area, ignoring the sign that reads 'closed, no services'. The driver's door opens but nobody gets out . . .

After Ford unsuccessfully attempted to buy Ferrari, in 1963, the American car giant instead embarked on its own racing programme in a bid to beat the famous Italian marque at the world's most prestigious race, the Le Mans 24 Hours, as told in the forthcoming Hollywood movie Ford v. Ferrari. This updated edition of The Ford that Beat Ferrari tells the story of how that mission was eventually accomplished. Development of the GT40: how the prototype Ford GT emerged in 1964 from the previous year's Lola GT programme. The works teams and the GT40: the car's racing exploits in its earlier years, first with Ford Advanced Vehicles (1964), then Shelby American (1965) and Alan Mann Racing (1966). The big ones: this section of the book covers the GT40's evolution into the 7-litre monsters that brought enormous success, including the first two Le Mans victories with the Mark II (1966) and Mark IV (1967), before becoming outlawed by new restrictions on engine size. The Gulf years: against all expectations, the venerable GT40, now back to 5-litre power, raced on with John Wyer's crack JW Automotive Engineering outfit in the iconic blue and orange colours of Gulf, successes including two further Le Mans wins (1968 and 1969). The production line racer: the stories of the 68 privateers, big and small, who raced GT40s. Chassis and drivers: a data section giving resumés of type designations, chassis histories and all drivers who raced GT40s. The magic lives on: the book's concluding sections show surviving cars at differing stages in their later life and bring the story up to date with developments since the 2005 edition.

The hottest magician in years takes us behind-the-scenes of his hit A&E show and offers secret tips to 25 illusions you won't see anywhere else. Criss Angel is poised to take the magic world by storm. He had his first 1-hour special on ABC in '01, headlined Madison Square Garden's annual Halloween special a year later to an audience of 60,000, performed in front of 75,000 people in Times Square, had two subsequent 1-hour specials on the Sci-Fi channel, he's received countless magician awards, and he currently has a groundbreaking show on A&E called CRISS ANGEL MINDFREAK, the first weekly magic show in over 40 years, that consistently wins its timeslot. MINDFREAK - the book - will be an extension of the show, which uses a specific topic each week - like 'Buried Alive', 'Bullet Catch', 'Building Walk', or 'Levitation' - to delve into the history of each subject, and see if Criss can't break new ground by doing something no one has done before. We are also going to try and include secrets in the book - clues to be dissected by readers - that relate back to magic he will perform on the show, where the book will be heavily promoted.

This book takes the reader behind the scenes during the early decades of Corvette design, engineering, brand development and racing competition ...

[The Classic Corvette](#) Veloce Publishing Ltd

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} When the first Corvette was introduced to the public through the travelling caravan known as Motorama, everyone knew there was something special about it. Each subsequent model continued to strengthen that position. But how do you upgrade America's favorite sports car? Make it a special edition! Special edition Corvettes are the tip of the spear when it comes to the American auto manufacturers special models. Luminous cars such as the 1967 L88 convertible, 1969 aluminum block ZL1, and 2015 Z06 #001 have all commanded a million dollars or more. Modern dealer-tuned cars from Lingenfelter, Calloway, and Hennessey have carried the tradition of making a great Corvette even better. Extremely low mileage on 1978 Pace Cars indicate that people have thought of these cars as investments for nearly 40 years. Keith Cornett of Corvetteblogger.com compiles a murderer's row of special-edition Corvettes in this first-ever compilation on the subject. This book is an encyclopedia of information, as you will learn about some of the rarest Corvettes on the planet. It will serve as a guide if you're looking to add one of these special machines to your collection. Everything you've ever wanted to learn about collectible Corvettes is in Corvette Special Editions.
