Combat Talons in Vietnam is a personal account of the first use of C-130s in the Vietnam War. It provides an insider's view of crew training and classified missions for this technologically advanced aircraft. Many covert missions over North Vietnam were successful, but one night, John Gargus, a mission planner, oversaw an operation in which the aircraft-carrying eleven crewmembers--failed to return from a nighttime mission. For thirty years, a search for the missing aircraft remained in progress. In the late 1990s, the Combat Talon veteran community at Hurlburt Field in Florida, still uncertain of the full story, decided to dedicate a memorial to the lost crew. When wartime mission records were declassified, Gargus embarked on a long journey of inquiry, research, and puzzle-solving to reconstruct the events of that mission and the fate of its crew. He discovered that the wreckage of the plane had been found in 1992 and that the remains of the crew were being held in Hawaii. Through numerous Freedom of Information Act requests, interviews, and site visits, Gargus sought to answer the question of why it took so long to find the wreckage and, more importantly, why the special operations command units were left uninformed. By 2000, the remains were relocated to a common grave at Arlington National Cemetery at last providing a measure of closure to family, friends, and comrades.

Justification of the budget estimates, Navy, Defense agencies, and NATO Nuts & Volts MagazineNuts & VoltsAbsolute Beginner's Guide to Building Robots Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Between 1945 and 1990 the Western Allies mounted some of the most audacious and successful intelligence collection operations of the Cold War. Conducted in great secrecy, aircrews flew specially modified transport and training aircraft along the Berlin Air Corridors and Control Zone to gather intelligence on Soviet and East German military targets in the German Democratic Republic and around Berlin. The Air Corridors comprised three regulated airways for civil and military air traffic that connected West Berlin to West Germany. Operating under the guise of innocent transport and training flights, the pilots used their right of access to gather huge amounts of imagery for forty-five years. They also provided the western intelligence community with unique knowledge of the organisation and equipment used by Warsaw Pact forces. For the first time, using recently declassified materials and extensive interviews with those involved, Looking Down the Corridors provides a detailed account and analysis of these operations and their unique contribution to the Cold War.

This exciting exploration of Stephen King ' s digital writing maneuvers and electronic ventures on online platforms and e-readers unravels the author ' s latest writing techniques and justifies his unprecedented success in the new millennium. It investigates the latest additions to the Master of Horror ' s " toolbox " by studying King ' s media presence and writing oeuvre in the twenty-first century through online projects, such as his videogame Discordia. The book closely traces King ' s shifts from print to the digital as he crafts his stories to share with his constant readers. Its examination of King ' s re-vitalized Gothic sheds light on his shift towards new realizations that take into consideration the needs and tastes of the contemporary consuming public in a constant dialogue with their contemporary fears and anxieties. While exploring King ' s literary generic and technological crossovers, the book stresses the need for an encompassing theory that takes into account literary tradition, norms, and motifs adjusted according to the materialities and technological specificities of each medium in specific socio-cultural and economic contexts.

Environmental law has aesthetic dimensions. Aesthetic values have shaped the making of environmental law, and in turn such law governs many of our nature-based sensory experiences. Aesthetics is also integral to understanding the very fabric of environmental law, in its institutions, procedures and discourses. The Art of Environmental Law, the first book of its kind, brings new insights into the importance of aesthetic issues in a variety of domains of environmental governance around the world, from climate change to biodiversity conservation. It also argues for aesthetics, and relatedly the arts, to be taken more seriously in the practice of environmental law so as to improve our emotional and ethical capacities to address the upheavals of the
