Curriculum Development Oakamoor Publishing
With its focus on the application of theory to actual classroom practice, this book's treatment of the full spectrum of curriculum design and practice has set the standard for completeness for nearly two decades. Part I explores the historical roots of current curriculum issues and practices, emphasizing the assessment of leading efforts at reform. Part II offers a critique of changing concepts of curriculum, conflicting curriculum and educational rationales, and influences for and against change. In Part III, major crosscurrents in reform and reconstruction are discussed, including social crises, the "knowledge explosion", curriculum articulation, and emerging designs. Part IV focuses on curriculum research and improvement, paying particular attention to the roles of teachers, supervisors, administrators, and curriculum specialists in the process.

The Practice and Theory of School Improvement Springer

This volume offers 17 essays on the apocryphal/deuterocanonical books of Ben Sira (Ecclesiasticus) and Tobit. Four essays explore Tobit's connections with Genesis (Irene Nowell), Job (Anathea Portier-Young), Psalms (Stephen Ryan), and the New Testament (Vincent Skemp), with a fifth considering the medieval Hebrew and Aramaic Tobit texts (Loren Stuckenbruck and Stuart Weeks). Five further essays examine Ben Sira's links with Genesis (Maurice Gilbert), Exodus (Friedrich Reiterer), Kings (Pancratius Beentjes), Prophets (Leo Perdue), and Proverbs (Jeremy Corley). Seven more essays on Ben Sira refer to the patriarch Joseph (Robert Hayward), Ezra (Michael Duggan), fear of God (Renate Egger-Wenzel), Qoheleth (Edward Owens), First Enoch (Benjamin Wright), Letter of James (Núria Caldach-Benages), and Matthew's Gospel (James Aitken).

Handbook of Family Literacy Cambridge University Press

A man has lived on his own beside a wild, unforgiving coastline for many years. His companions are the birds, the land and the sea. From a choice made long ago, he keeps himself separate from the world of people and he gains a fierce pleasure from his environment. His solitude is broken by his discovery, one early morning on the flat sands of low tide, of a child washed up on the beach, but still alive. This is a novel of redemption, the story of a man experiencing the world as though for the first time.

Unexpected Joy at Dawn Routledge

Progressive Education, derived mainly from Anglo-American culture, has been the primary frame of reference for student-centered classroom change in developing countries for over 50 years. Yet in many developing countries, strong evidence shows that progressivism has not replaced teacher-centered formalistic classroom practice. Classroom Change in Developing Countries: From Progressive Cage to Formalistic Frame presents a robust case for why formalism should be the primary frame of reference for upgrading classroom teaching in developing countries. Theoretically rich yet grounded in practice, the book draws on case studies from Africa, China and Papua New Guinea to show how culturally intuitive formalistic teaching styles can induce positive classroom change. Synthesising research and evaluation literature on classroom change in developing countries, Guthrie examines some of the methodological flaws in the literature. The book considers the progressive cage, and looks at Confucian influences on teaching in China, progressive reform failures in both Sub-Saharan Africa and Papua New Guinea, as well as offering a critical take on some failings in comparative education. It examines the formalistic frame, addresses methodological issues in culturally grounded research and offers a model of teaching styles for basic classroom research. The book concludes by returning the focus back to teachers and considers the so-called teacher resistance to change. The book will be an essential purchase for academics and research students engaged in the fields of classroom teaching, teacher education and curriculum and will also be of interest to academics, aid officials, and decision-makers in developing countries.

Using Examinations to Improve Education John Wiley & Sons
Developmental and Clinical Issues in the Treatment of Children is the first volume to address the needs of practicing clinicians and other professionals who work in applied mental health settings. It represents the first interface of clinical child psychology, developmental psychopathology, specific child disorders, and contextual issues. This text's primary purpose is to bring these areas together to build upon the current knowledge base about children, child problems, and child treatment. In summary, this compendium integrates the major clinical and developmental issues involved in the "real" treatment of children. The contents of each chapter are relevant to the needs and concerns of practitioners, while based on findings from the empirical literature.

This book describes how to change the way in which educators conduct business in the classroom. Our current educational systems lack ways to reach today's learners in relevant, meaningful ways. The five approaches in this book inspire and motivate students to learn.

The authors provide in-depth descriptions into these overlapping approaches for experiential learning: active learning, problem-based learning, project-based learning, service learning, and place-based education. Each of these five approaches includes an element of student involvement and attempts to engage students in solving problems. The chapters are presented in a consistent, easy-to-read format that provides descriptions, history, research, ways to use the approach, and resources. This book will help educators transform their classrooms into dynamic learning environments.

This publication draws conclusions from IIEP's research into ethics and corruption in education. It defines the key concepts of corruption, transparency, accountability and ethics and identifies the main opportunities for corruption in education. It then looks at tools that can be used to assess corruption problems such as perception and tracking surveys. Lessons are drawn from strategies used worldwide to improve transparency and accountability in educational management.

Shift happens: Emerging technologies and globalization have resulted in political, social and cultural changes. These changes have a profound impact on all aspects of human life, including education. Yet while society has changed and continues to change, schools are slow to keep up. This book explores issues related to transforming and modernizing our educational systems, including the impact of societal shifts on education, the efforts at various levels to bring schools into the 21st century, the identification of 21st century skills, the reformation of the curriculum, the creation of alternative models of schooling, the innovative use of technology in education, and many others. It addresses questions like the following: Should schools systems adapt to better meet the needs of tomorrow's world and how should this be accomplished? How can society better prepare students for a changing and challenging modern world? What skills do students need to lead successful lives and become productive citizens in the 21st century? How can educators create learning environments that are relevant and meaningful for digital natives? How can the school curriculum be made more rigorous to meet the needs of the 21st century? This book encourages readers to transcend the limits of their own educational experience, to think beyond familiar notions of schooling, instruction and curriculum, to consider how to best structure learning so

that it will benefit future generations. It encourages a deeper analysis of the existing education system and offers practical insights into future directions focused on preparing students with 21st century skills.

Japan is rightly regarded as one of the most technologically advanced countries in the world, yet the development and deployment of Internet technology in Japan has taken a different trajectory compared with Western nations. This is the first book to look at the specific dynamics of Japanese Internet use. It examines the crucial questions: * how the Japanese are using the Internet: from the prevalence of access via portable devices, to the fashion culture of mobile phones * how Japan's "cute culture" has colonized cyberspace * the role of the Internet in different musical subcultures * how different men's and women's groups have embraced technology to highlight problems of harassment and bullying * the social, cultural and political impacts of the Internet on Japanese society * how marginalized groups in Japanese society - gay men, those living with AIDS, members of new religious groups and Japan's hereditary sub-caste, the Burakumin - are challenging the mainstream by using the Internet. Examined from a variety of interdisciplinary perspectives, using a broad range of case-studies, this is an exciting and genuinely cutting-edge book which breaks new ground in Japanese studies and will be of value to anyone interested in Japanese culture, the Internet and cyberculture.

Differentiated Instructional Strategies Routledge

Graduates face a world of complexity which demands flexibility, adaptability, self-reliance and innovation, but while the development of creativity is embedded in the English National Curriculum and in workplace training, the higher education sector has yet to fully recognise its importance. This book highlights how pressures such as quality assurance, peer review systems, demands for greater efficiency and increased research output are effectively discouraging innovation and creativity in higher education. It makes a bold case for the integration of creativity in higher education, drawing together contributors and research from around the world and explores valuable lessons learnt from those working in schools and professional organisations. Offering a wealth of advice on how to foster creativity on an individual and an institutional level, this book encourages lecturers to engage with the ideas and practice involved in helping students to be creative in all areas of their study.

of four volumes on Educational Change brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world. Many of these writers, whose chapters have been specially written for these books, have been investigating, helping initiate and implementing educational change, for most or all of their lengthy careers. Others are working on the cutting edge of theory and practice in educational change, taking the field in new or even more challenging directions. And some are more skeptical about the literature of educational change and the assumptions on which it rests. They help us to approach projects of understanding or initiating educational change more deeply, reflectively and realistically. Educational change and reform have rarely had so much prominence within public policy, in so many different places. Educational change is ubiquitous. It figures large in Presidential and Prime Ministerial speeches. It is at or near the top of many National policy agendas. Everywhere, educational change is not only a policy priority but also major public news. Yet action to bring about educational change usually exceeds people's understanding of how to do so effectively.

Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.
