For more than 35 years, the very best in baseball predictions and statistics The industry's longest-running publication for baseball analysts and fantasy leaguers, Ron Shandler's Baseball Forecaster, published annually since 1986, is the first book to approach prognostication by breaking performance down into its component parts. Rather than predicting batting average, for instance, this resource looks at the elements of skill that make up any given batter's ability to distinguish between balls and strikes, his propensity to make contact with the ball, and what happens when he makes contact—reverse engineering those skills back into batting average. The result is an unparalleled forecast of baseball abilities and trends for the upcoming season and beyond.

Are current testing practices consistent with the goals of the reform movement in school mathematics? If not, what are the alternatives? How can authentic performance in mathematics be assessed? These and similar questions about

tests and their uses have forced those advocating change to examine the way in which mathematical performance data is gathered and used in American schools. This book provides recent views on the issues surrounding mathematics tests, such as the need for valid performance data, the implications of the Curriculum and Evaluation Standards for School Mathematics for test development, the identification of valid items and tests in terms of the Standards, the procedures now being used to construct a sample of state assessment tests, gender differences in test taking, and methods of reporting student achievement.

From an expert in the field comes the definitive guide to managing breast cancer in the information age—a comprehensive resource for diagnosis, treatment, and peace of mind. The breast cancer cure rate is at an all-time high, and so is the information, to say nothing of the misinformation, available to patients and their families. Online searches can lead to unreliable sources, leaving even the most resilient patient feeling uneasy and uncertain about her diagnosis, treatment options, doctors, side effects, and recovery. Adding to a patient ' s anxiety is input from well-meaning friends and family, with stories, worries, and opinions to share, sometimes without knowing the details of her particular case, when in reality breast cancer treatment has gone well beyond a " one size fits all " approach. Elisa Port, MD, FACS, chief of breast surgery at The Mount Sinai Hospital and co-director of the Dubin Breast Center in Manhattan, offers an optimistic antidote to the ocean of Web data on screening, diagnosis, prognosis, and treatment. Inside you ' ll discover • the various scenarios when mammograms indicate the need for a biopsy • the questions to ask about surgery, chemotherapy, radiation, and breast reconstruction • the important things to look for when deciding where to get care • the key to deciphering complicated pathology reports and avoiding confusion • the facts on genetic testing and the breast cancer genes: BRCA-1 and BRCA-2 • the best resources and advice for those supporting someone with breast cancer From innovations in breast cancer screening and evaluating results to post-treatment medications and living as a breast cancer survivor, Dr. Elisa Port describes every possible test and every type of doctor visit, providing a comprehensive, empathetic guide that every newly diagnosed woman (and her family) will want to have at her side. Praise for The New Generation Breast Cancer Book " One book you need . . . If you ' re considering your options for treatment or know someone who is, this step-by-step guide, The New Generation Breast Cancer Book, is essential reading. A seventeen-volume compilation of selected AEF records gathered by Army historians during the interwar years. This collection in no way represents an exhaustive record of the Army's months in France, but it is certainly worthy of serious consideration and thoughtful review by students of military history and strategy and will serve as a useful jumping off point for any earnest scholarship on the war. --from Foreword by William A Stofft.
