The automotive industry underwent great change in the 1960s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1965. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate.

The fascinating story of a century-old automobile dynasty Fiat is one of the world's largest automakers, but when it made headlines by grabbing control of a bankrupt Chrysler in 2009 it was unknown in the U.S. Fiat ' s against-all-odds

swoop on Chrysler---masterminded by Sergio Marchionne, the Houdini-like manager who saved Fiat from its own near-collapse in 2005 – has made the automaker one of the most unlikely winners of the financial crisis. Mondo Agnelli is a new book that looks at the chain of unpredictable events triggered by the death of Gianni Agnelli in 2003. Gianni, the charismatic, silver-haired power broker and style icon, was the patriarch who had lead the company founded by his grandfather in 1899. But Gianni's own son had committed suicide. Without a mature heir, the dynasty and Fiat were rudderless. Backed by Gianni's closest advisors, his serious, shy, and determined grandson John plucked Marchionne from obscurity. Together, they saved the family company and, inadvertently, positioned Fiat as a global trailblazer when the global storm hit. A classic story of ingenuity and hard work, the book portrays a business dynasty that triumphed over adversity and family tragedy because of its own smarts, sweat, and ability to bend the rules A an engaging tale for those interested in the stories behind the economic crash, the book contains never-before reported material about how Fiat succeeded in making Chrysler profitable where both Daimler AG and Cerberus, its previous owners, had failed. A story for a wide audience, from car buffs, business readers, lovers of Italy, and anyone fascinated by the lifestyle of Europe's most glamorous industrial dynasty, this book tells the tale of how Fiat achieved the seemingly impossible -- turning around an American automotive icon everyone else had given up for dead.

In the early 1970s, Chrysler started working on a "magic wagon" -- a completely new passenger van that would fit into a normal garage. It was a daring project for a company that was strapped for cash. This book taps the people who created the minivans, with previously unpublished photos of the original clay models. It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives ten years before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been very different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The paperback is generously illustrated with full-color design studies and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an unqualified success story, but such was the case with Chrysler

and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were there to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for two generations. It's a story that showcases not only how the automotive industry can work at its best, but also the ways that the industry's prevalent groupthink mentality can stifle innovation." -- Larry Vellequette, Automotive News "I am amazed how complete you are, having not been on-site in the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused web site allpar.com; he also holds a Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 20 years.
