"This impressive, streamlined new field guide to plants of California deserts is based on The Jepson Manual and is truly a handbook to be carried in the field. It offers new introductory discussions, many new illustrations, revised user-friendly keys, updated distribution information, flowering times. . . and handsome color photos of many species. This marvelous book demonstrates that our deserts are not barren wastes but treasure houses filled with an abundance of floristic riches."--Robert Ornduff, author of Introduction to California Plant Life "This is a marvelously useful guide to the

plants of California's deserts, clearly-written and well-organized. An invaluable companion to those who delight in the unusual and beautiful plants of these scenic areas."--Peter H. Raven, Director, Missouri Botanical Garden "This much-needed volume incorporates new information about the status and range of many California desert plants. This book will facilitate access to information about our deserts, and will lead to increased respect and attention to them. We warmly welcome it."--Jake Sigg, President, California Native Plant Society *Emendations of the Seventh Edition of Gray's Manual. I.* Univ of California Press

A comprehensive guide to Michigan's wild-growing seed plants

A manual of English etymology Univ of California Press

"The manual of the flowering plants of Hawai'i is the first complete compendium of the flowering plants of the Hawaiian Archipelago since Hillebrand's classic Flora of the Hawaiian Islands, published a century ago. The Hawaiian Archipelago, the most isolated major island group in the world, has long been known for the remarkable diversity of its ecological environments and for the high level of endemism in its fauna and flora. From approximately 280 successful flowering plant colonists, at least 956 species of flowering plants have evolved, about 89 percent of which are endemic. The Hawaiian flora is so distinctive that it is assigned to its own floristic region by most phytogeographers. Authors Wagner, Herbst, and Sohmer, and more than fifty collaborating specialists, provide keys to and descriptions of the 146 families, 649 genera, and 1,817 species of native and naturalized plants, arranged alphabetically within the dicots and monocots. Each species is provided with its accepted scientific name, Hawaiian and English common names, nomenclatural and taxonomic synonyms, chromosome numbers if available, and geographical and ecological ranges, as well as notes on taxonomic problems and citation of relevant literature. Ethnobotanical information is also given for many species. Two hundred forty full-page plates illustrate more than half of the species and

nearly all genera. An index, literature cited section, and voucher information for the plants illustrated are included. The authors have also provided chapters on the project history and methods of preparation of the treatments and on the geology, climate, and vegetation of the Hawaiian Archipelago. They have evaluated available information concerning endangered native species and have compiled an accurate census of such plants. For many of the genera, the treatments presented here include changes and details usually given in revisions. The reevaluations have resulted in substantial changes in the taxonomy of many genera of Hawaiian plants. By taking this approach, the authors have provided the foundation and hypotheses for a new era in the systematic, evolutionary, and biogeographical study of this fascinating flora" -- Dust jacket.

A manual of the phanerogams and pteridophytes of western Texas Univ of California Press

"More information is packed into one volume that will be useful to a wider audience than any other manual of this kind yet published in the history of botany."--David L. Magney, The California Native Plant Society "A single work . . . simultaneously accessible to dedicated beginners and indispensable to professional botanists. . . . For the first time in one volume a user-friendly flora of the exceedingly diverse higher plants of California."--Mildred E. Mathias, editor of *Flowering Plants in the Landscape* "Allows amateurs and professionals alike to easily and accurately identify plant species. . . . A product that will contribute in a major way to the preservation of California's unique floral resource. Our gratitude and congratulations for a job well done."--Phyllis Faber, Editor, *Fremontia* "Sets new standards for excellence . . . and picks up beautifully on the contemporary idea that botanical work should be fully accessible to the general public as well as to scientists."--Peter H. Raven, Missouri Botanical Garden "Precise and accurate, a masterpiece of clarity and succinctness."--G. Ledyard Stebbins, University of California, Davis

New Manual of Botany of the Central Rocky Mountains (vascular Plants)

"California's extraordinary flora is described in contemporary detail in this handy volume, which should prove an inspiration to all of those interested in these plants, their habitats, and their importance to a state richer in botanical diversity than any other part of the United States. This is a thorough revision of an indispensable book."—Peter H. Raven, Missouri Botanical Garden "This second edition of *The Jepson Manual* is a monumental achievement! Far more than a simple update, the book has gone through a thorough revision, making it a must-have book for California plant enthusiasts—professional and lay alike."—Lucinda McDade, Rancho Santa Ana Botanic Garden "Biogeographers, vegetation ecologists, and practitioners of conservation and restoration will all welcome the second edition of *The Jepson Manual*. Many improvements in this second edition include major taxonomic name changes, more information on habitat/range/phenology, better keys, and new illustrations. The second edition is more user-friendly, accurate, and scientifically rigorous. And these improvements are exactly the kind of recent, authoritative, and trusted flora needed."—Michael G. Barbour, University of California, Davis
