A wry comic novel with an acerbic wit, *A Hero of Our Time* is a vicious takedown of superficial diversity initiatives and tech culture, with a beating heart of broken sincerity. Osman Shah is a

---

pitstop on his white colleague Olivia Robinson's quest for corporate domination at AAP, an edutech startup determined to automate higher education. Osman, obsessed by Olivia's ability to successfully disguise ambition and self-interest as collectivist diversity politics, is bent on exposing her. Aided by his colleague turned comrade-in-arms Nena, who loathes and tolerates him in equal measure, Osman delves into Olivia's twisted past. But at every turn, he's stymied by his unfailing gift for cruel observation, which he turns with most ferocity on himself, without ever noticing what it is that stops him from connecting to anyone in his past or present. As Osman loses his grip on his family, Nena, and everything he thought was essential to his identity, he confronts an enemy who may simply be too good at her job to be defeated. A Hero of Our Time cracks the veneer of well-intentioned race conversations in the West, dismantles cheery narratives of

progress through tech and “streamlined” education, and exposes the venomous self-congratulation and devouring lust for wealth, power, and property that lurks beneath.

ICD-10-CM Official Guidelines for Coding and Reporting - FY 2021 (October 1, 2020 - September 30, 2021) Univ of Wisconsin Press

Ensure full pay for services provided by your nurse practitioners, physician assistants, clinical nurse specialists, and other mid-level clinicians. Staffing nonphysician practitioners (NPPs) enables your practice to see more patients, but the revenue benefits depend on your team’s ability to navigate the complex set of NPP coding and billing rules. Do you know the guidelines that Medicare and other payers apply toward reimbursement of NPP services? Are you clear on the rules

for direct supervision? How about reciprocity? If you’re like most, you have more questions than answers. Getting incident-to billing right means 15% more in reimbursement. Getting it wrong could be considered fraudulent. With stakes this high, you need the Nonphysician Practitioner Reference Guide. This comprehensive resource provides expert guidance covering the scope of NPP coding and billing regulations. Understand the distinctions between shared visit and incident-to services and meet the troublesome requirements of audit-ready incident-to billing. Packed with authoritative tips, readers’ Q&A, and handy clip-and-save tools—including an incident-to audit checklist—you’ll master the reporting nuances of E/M services, prolonged services, virtual visits, and more. Shore up revenue for your mid-level practitioners with: Tips for accurate dual-provider coding Max out incident-to pay the right way and earn 100% of allowable revenue versus 85% Rely on split/shared visit coding in non-office settings Know how to avoid

---

substitute physician billing challenges Boost your signature know-how and avoid claim denials Watch incident-to claims when physician is out of office Get the facts on performing consults Learn the secret NPP guidelines for coding virtual visits Do you know the reciprocity rules when your physician leaves town? And much more! Clear up your NPP compliance confusion—and know exactly when you can bill service incidents to the physician—with the Nonphysician Practitioner Reference Guide.

Risk-adjustment practices consider chronic diseases as predictors of future health care needs and expenses. Correct and detailed documentation and compliant diagnosis coding are critical for proper risk adjustment. Risk Adjustment Documentation & Coding, 2nd Edition provides: Risk-adjustment parameters to improve documentation related to severity of illness

and chronic diseases. Code abstraction guidelines and recommendations to improve diagnostic coding accuracy without causing financial harm to the practice or health facility. Chronic disease ICD-10-CM coding summaries for quick reference and study. The impact of risk-adjustment coding (hierarchical condition category (HCC) coding) on a practice should not be underestimated: More than 75 million Americans are enrolled in risk-adjusted insurance plans. This population represents more than 20% of those insured in the United States. Insurance risk pools under the Affordable Care Act include risk adjustment. CMS has proposed expanding audits on risk-adjustment coding.

These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported.

The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.
