Many people modify their Harley-Davidson engines—and find the results disappointing. What they might not know—and what this book teaches—is that emphasizing horsepower over torque, the usual approach, makes for a difficult ride. Author Bill Rook has spent decades perfecting the art of building torque-monster V-twin Harley engines. Here he brings that experience to bear, guiding motorcycle enthusiasts through the modifications that make a bike not just fast but comfortable to ride. When anyone thinks of motorcycling, whether they are enthusiasts or only casually interested, the name Harley-Davidson immediately comes to mind. Harley-Davidson is among the oldest surviving motorcycle manufacturers; the company began in 1903 and continues to this day. As you can imagine, over the course of more than 100 years, the company has seen prosperous times as well as lean times, changes in focus and direction, evolution and revolution. All of that leads to a lot of company history and trivia. American Iron Magazine associate editor Tyler Greenblatt has compiled 1,001 Harley-Davidson facts into this single volume, with subjects ranging from the historic powertrains to pop culture to Harley-Davidson as a company and manufacturer. Facts begin with the early years, when a motorcycle was not much more than a bicycle with an engine attached, to the war efforts of World War I, when 15,000 were put into service. During the 1920s, Harley-Davidson grew into the largest manufacturer in the world, and that momentum helped carry it

through the Great Depression and into World War II. Postwar development and AMF ownership are also covered in detail, as well as the restructuring and revival of the brand in recent years. Whether you're a casual rider, racer, or restorer, Harley-Davidson enthusiasts will be sure to find something in this book for that next conversation with fellow hobbyists. This book will keep Harley-Davidson enthusiasts entertained for hours, and is a great edition to any motorcycling library. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}
