Geography of the World's Major Regions Oxford University Press

This reference work contains more than 15000 entries on political geography, political science, international studies, social sciences, military and strategic studies and ocean resources. The materials have been collected from more than 270 journals and periodicals, current geographical publications, the American Geographical Society Research Catalog and bibliographies of various political geography books. The available materials have been collected on political geography since 1945, while important materials from earlier periods have also been included. The book also includes theses and dissertations that enhance its usefulness.

Proceedings of the Royal Geographical Society and Monthly Record of Geography Heinemann

A valuable collection of papers by eminent explorers and scientists, compiled for the benefit of the 1875 British Arctic Expedition.

Review Current Pricing Policies at the Bureau of the Census and the Potential Effect of Increased User Fees Packt Publishing Ltd

This book is part of Packt's Beginner's Guide series. Written in a friendly tone, the book starts at the very beginning with a blank Moodle page and you are taken step by step through the most useful features of Moodle, helped with many illustrative screenshots. This book is for regular, non-technical teachers of pre-teen or early teenage children. It assumes no prior knowledge of Moodle and no particular expertise on the web. Classroom assistants may also find this book a very useful resource. We will assume that you have an installation of Moodle managed by somebody else, so you are responsible only for creating and delivering course content.

Los Angeles Educational Research Bulletin GMB Publishing Ltd Exposing the history of racism in Canada ' s classrooms Winner of the prestigious Clio-Quebec, Lionel-Groulx, and Canadian History of Education Association awards In School of Racism, Catherine Laroche demonstrates how Quebec ' s school system has, from its inception and for decades, taught and endorsed colonial domination and racism. This English translation of the award-winning book extends its crucial lesson to readers across the country, bridging English- and French-Canadian histories to deliver a better understanding of Canada ' s past and present identity. Using postcolonial, antiracist, and feminist theories and methodologies, Laroche examines late-nineteenth and early-twentieth-century classroom materials used in Quebec ' s public and private schools. Many of these textbooks, and others like them, made their way into curricula across Canada. Laroche ' s innovative analysis illuminates how textual and visual representations found in these archives constructed Indigenous, Black, Arab, and Asian peoples as " the Other " while reinforcing the collective identity of Quebec, and Canada more broadly, as white. Uncovering the origins and persistence of individual and systemic racism against people of colour, Laroche shows how Otherness was presented to—and utilized by—young Canadians for almost a century. School of Racism names the ways in which Canada ' s education system has supported and sustained ideologies of white supremacy—ideologies so deeply embedded that they still linger in school texts and programming today. The book offers new insights into how Canadian and Qu é b é cois concepts of nationalism and racism overlap, helps educators confront racism in their classrooms, and deepens urgent discussions about race and colonialism throughout Canada.

Geography for Avery Hill Springer

This report makes the point that in both Russia and China it is politics " and not market or commercial considerations " that largely drive energy relationships with each other and the outside world. " For both countries, energy and energy security is regarded as a strategic asset and/or objective that are at risk from outside forces. " The conditions that each state has attached to their energy policies ironically preclude the kind of easy cooperation seen in other strategic and political issues between Moscow and

Beijing. In both Central and Northeast Asia, Russia has blocked Chinese efforts to realize its version of energy security, yet it has not been able to come up either with the resources or means for a coherent policy of supplying China with reliable quantities of energy that would lead China away from non-Russian producers. The under-fulfilment of the potential for Russia to supply China will continue and continue as well to be a source of strain in their relationship. Legal Geography Routledge

Annotation American Empire challenges our deepest assumptions about the rise of American globalism in the twentieth century and puts geography back into the History of what is called the American Century.

A Selection of Papers on Arctic Geography and Ethnology Cambridge University Press

Volume one examines how an immense diversity of ethnic and religious groups ultimately created a set of distinct regional societies. Volume two emphasizes the flux, uncertainty, and unpredictability of the expansion into continental America, showing how a multitude of individuals confronted complex and problematic issues.

Patents and Cartographic Inventions IAP

The last half century has witnessed two landmark events in medical history. The 1970s saw euphoria about the defeat of one of humankind's oldest disease scourges with the global eradication of smallpox. To set against this, the 2020s are experiencing the pandemic ravages of new viral diseases, of which COVID-19 is currently the most potent. But it is only the latest of a succession of threats. A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics. This resource focuses initially on the local scale of doctors' practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent. Such local area studies raise two questions. First, how and where do epidemic diseases emerge and second, why do more diseases appear to be emerging now? To approach such questions implies a shift in spatial gear from painting epidemics with a fine-tipped local brush to an expanded palette on which doctors' practices and small islands are replaced by regional and global populations. Simultaneously, time bands are extended backwards to the origins of civilization and forwards into the twenty-first century. It eventually leads to a consideration of global pandemics - both historical (for example, plague, cholera and influenza) and contemporary (HIV/AIDS and COVID-19) and examines the ways the spread of infection can be prevented. All chapters are extensively illustrated with full-colour diagrams and maps - some of which are in colour for the first time. Bringing together the authors' collective 150 years of experience in research, mapping, and writing on spatial aspects of medical history, this is an invaluable resource for anyone interested in the spread, control, and eradication of epidemic and pandemic diseases.

American Empire Routledge

" ' Teaching the Humanities and Social Sciences 6E ' prepares teachers to develop and implement programs in the humanities and social sciences learning area from F-10. It successfully blends theory with practical approaches to provide a basis for teaching that is engaging, inquiry-based and relevant to students ' lives."--Publisher's website.

The Importance of Place: Geographical Indications as a Tool for Local and Regional Development Routledge

This new key textbook for introductory courses in human geography provides first and second-year undergraduates with a comprehensive thematic approach to the changing human geography of the UK at the end of the twentieth and beginning of the twenty-first century. Covering local, regional, national, European and global issues, it also explores in some detail topics which are part of the lived experience of undergraduates themselves, such as crime, unemployment, social exclusion and AIDS. User-friendly textbook features include: * chapter introductions, summaries and important theoretical principles * up-to-date further reading and key on-line sources * case studies, examples and revision questions.

Instruction in the Social Studies Walter de Gruyter GmbH & Co KG

"Heinemann Geography for Avery Hill" matches the requirements of the specification for the Avery Hill (OCR/WJEC B) GCSE. This volume contains all four of the student books which match the syllabus units, using case studies, promoting issues-based learning and developing decision-making skills.

2014 LEEP Event, Editorial & Promotional Calendar Springer

Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject ' s expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link assessment to making progress in geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to ' global learning ' ; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help support shape your own research and writing. Debates in Geography Education is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their practice, and Education Studies students considering in-depth subject teaching.

A History of the Development of the Course of Geography in the New York City High Schools (1898-1953). OECD Publishing

This work explains the course of international politics from the rebirth of the German Empire to the rise of China, with particular, though not exclusive, reference to spatial relationships.

Teaching Humanities and Social Sciences Yale University Press

This book explores the potential benefits and disadvantages of geographical indication (GIs) registration schemes, analyzing the utility of GI registrations for the development and promotion of regional economies, both in national and international markets. The book draws on the van Caenegem, Cleary & Drahos Australian Provenance Report, along with the valuable empirical data collected in connection with it. The book situates the rural development question in an international context, presenting several case studies from Italy, France and Morocco, New Zealand and Australia. The book contains various chapters focused on comparing regulatory structures in various relevant jurisdictions and drawing on other countries ' experiences. It contains significant contributions from industry actors with extensive experience in regional branding initiatives and GI-related policy issues. Progressive in structure, the book starts from the ' big picture ' level before moving down to the local and concrete scale. Geographical indications of Australian products are vital both in domestic and overseas markets by accurately representing the origin and quality of niche agricultural products. Thus, with a particular focus on Australia, the book promotes the assessment of geographical indications as potential regional assets that will help producers develop local quality indicators that will serve as public goods for successive generations of producers.

Scottish Geographical Magazine Taylor & Francis

There ' s no book like this one for educators interested in issues-centered teaching. More than 40 experts have contributed articles offering comprehensive coverage of the field of social issues education. In addition to a full examination of objectives and methods, contributors show how social issues can be taught as part of history, geography, the social sciences, and global and environmental studies. The challenges of assessment, curriculum, and effective teacher education are fully explored. With its teaching ideas and useful resource section, this book is an indispensable addition to your library! Contributors include: Shirley Engle, Anna Ochoa-Becker, Jack Nelson, Carole Hahn, Byron Massialas, Jeff Passe, Jesus Garcia, Gloria Ladson-Billings, Merry Merryfield,

Patricia Avery, Sam Totten, Bill Wraga, Walter Parker, and James Shaver.

reactions to, those who were and remain, literally, on the very edge of European civilisation.

Journal of the United States Artillery Cengage AU

This book explores the US patent system, which helped practical minded innovators establish intellectual property rights and fulfill the need for achievement that motivates inventors and scholars alike. In this sense, the patent system was a parallel literature: a vetting institution similar to the conventional academic-scientific-technical journal insofar as the patent examiner was both editor and peer reviewer, while the patent attorney was a co-author or ghost writer. In probing evolving notions of novelty, non-obviousness, and cumulative innovation, Mark Monmonier examines rural address guides, folding schemes, world map projections, diverse improvements of the terrestrial globe, mechanical route-following machines that anticipated the GPS navigator, and the early electrical you-are-here map, which opened the way for digital cartography and provided fodder for patent trolls, who treat the patent largely as a license to litigate.

Political Geography SAGE Publications Limited

This collection explores the heterogeneous places we have traditionally been taught to term 'islands.' It stages a conversation on the very idea of 'island-ness', thus contributing to a new field of research at the crossroads of law, geography, literature, urban planning, politics, arts, and cultural studies. The contributions to this volume discuss the notion of island-ness as a device triggering the imagination, triggering narratives and representations in different creative fields; they explore the interactions between legal, socio-political, and fictional approaches to remoteness and the 'state of insularity,' policy responses to both remoteness and boundaries on different scales, and the insular legal framing of geographical remoteness. The product of a cross-disciplinary exchange on islands, this edited volume will be of great interest to those working in the fields of Island Studies, as well as literary studies scholars, geographers, and legal scholars.

Notes on the Physical Geography and Meteorology of the South Atlantic
Routledge

Including ten new chapters on nature, globalization, development, and risk and a new section on practicing geography, this is a completely revised and updated edition of the bestselling, standard student resource. The Second Edition of Key Concepts in Geography explains the key terms – space, time, place, scale, landscape - that define the language of geography. It is unique in the reference literature as it provides - in one volume – concepts from both human geography and physical geography; especially relevant now that environment is so critical to our understanding of geography.

Soviet Geography Profile Books

SHORTLISTED FOR THE ONSIDE NONFICTION BOOK OF

THE YEAR 2018 The islands off the coast of Ireland have long been a source of fascination. Seen as repositories of an ancient Irish culture and the epitome of Irish romanticism, they have attracted generations of scholars, artists and filmmakers, from James Joyce to Robert O'Flaherty, looking for a way of life uncontaminated by modernity or materialism. But the reality for islanders has been a lot more complex. They faced poverty, hardship and official hostility, even while being expected to preserve an ancient culture and way of life. Writing in her 1936 autobiography, Peig Sayers, resident of Blaskets island, described it as 'this dreadful rock'. In 1841, there were 211 inhabited islands with a combined population of 38,000; by 2011, only 64 islands were inhabited, with a total population of 8,500. And younger generations continue to leave. By documenting the island experiences and the social, cultural and political reaction to them over the last 100 years, *On the Edge* examines why this exodus has happened, and the gulf between the rhetoric that elevated island life and the reality of the political hostility towards them. It uncovers, through state and private archives, personal memoirs, newspaper coverage, and the author's personal travels, the realities behind the "dreadful rocks", and the significance of the experiences of, and
