Is 'sustainable development' a charade sold to an increasingly misled public? This book

presents a wide-ranging, penetrating critique of sustainability and what it actually means. The author argues that despite the rhetoric of socially and environmentally sustainable development and the ever-increasing number of legislative environmental policies, the real issues such as consumption, population growth and equity are either sidestepped or manipulated in international policy and law. Analyzing the main areas of concern - economic growth, market structure, trade, aid, debt, security and sovereignty - he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by

sustainability.

A fresh take on the Manitoba

schools question and the

Conservative Coup that toppled

Canada's fifth prime minister.

When Mackenzie Bowell became

Canada's fifth prime minister in

December 1894, everyone —

including Bowell — expected the

job would involve nothing more

than keeping the wheels on the

Conservative wagon until a spring

election. Plans for a quiet

caretakership were dashed in

January 1895 when the courts

ruled that the Manitoba

government had violated Roman

Catholics' constitutional rights

by abolishing the provincial

separate school system. Catholics

in Quebec demanded that Bowell

force Manitoba to restore the

schools, while Ontario Protestants

warned him to keep his hands off.

Backed into a corner, Bowell tried

three times to negotiate a

compromise with the Manitoba government over the course of 1895, but to no avail. By January 1896, seven of Bowell's cabinet ministers had had enough. Convinced that Bowell had tarnished the Conservative brand, the caballers forced the prime minister to resign and make way for a new leader, who they believed could revive party fortunes in time for the coming election—the old Warhorse of Cumberland, Sir Charles Tupper. Ultimately, the coup didn't matter. Tupper and his conspirators pleaded their case in Parliament and on the hustings, but nothing could stand in the way of Wilfrid Laurier and his Liberals' historic rise to power in the June 1896 election. A Very Canadian Coup brings fresh sources and new perspectives to bear on the life and times of Canada's fifth prime minister and his Sixth Ministry.

The Charter of Fundamental
Rights of the European

Union is the most developed
and comprehensive legally

binding human rights
instrument in the social field

of the European Union. It is
becoming increasingly

important and is the first
instrument that includes both

civil and political rights on one
hand and social rights on the
other. Despite this, the Court

of Justice of the European
Union has only rarely dealt

with fundamental social
rights. In this context,

employment rights need to be
examined in this new rights

framework. Following on
from previous volumes setting

out links between European
labour law and fundamental

social rights (as enshrined in
relevant UN, ILO and

Council of Europe
instruments), in this book the

ETUI Transnational Trade
Union Rights (TTUR) Expert

Network examines the
justiciability of social rights

and critically analyses the
effectiveness of those rights

embodied in the EU Charter.
Thus, this book completes the

trilogy of ETUI TTUR books
on fundamental social rights

at European level following

the publication, also by Hart Publishing, of The European Convention of Human Rights and the Employment Relation (2013) and The European Social Charter and the Employment Relation (2017).
