Originally published in 1985, Urbanisation in China is based on extensive original research and fieldwork, considers the whole problem of urbanisation in China. Starting with an outline of the pre-communist legacy, the author traces population changes and urban growth throughout the communist period, assesses policies aimed at restricting urban growth and contrasts the reality of urban China with the image the authorities have tried to project. The policy changes that occurred following the death of Mao are analysed and concludes with a consideration of likely developments up to the end of the century.

In 2001, the London Stock Exchange will be 200 years old, though its origins go back a century before that. This book traces the history of the London Stock Exchange from its beginnings around 1700 to the present day, chronicling the challenges and opportunities it has faced, avoided, or exploited over the years. Throughout, the history seeks to blend an understanding of the London Stock Exchange as an institution with that of the securities market of which it was - and is - such an important component. One cannot be examined satisfactorily without the other. Without a knowledge of both, for example, the causes of the 'Big Bang' of 1986 would forever remain a mystery. However, the history of the London Stock Exchange is not just worthy of study for what it reveals about the interaction between institution and market. Such was the importance of the London Stock Exchange that its rise to world dominance before 1914, its decline thereafter, and its renaissance from the mid-1980s, explain a great deal about Britain's own economic performance and the working of the international economy. For the first time a British economic institution of foremost importance is studied throughout its entire history, with regard to the roles played and the constraints under which it operated, and the results evaluated against the background of world economic progress.

Israel is a tiny country. From tip to toe, it stretches 260 miles long but is only 60 miles at its widest point. Since the days of the British mandate, the question of "defensible borders" for the Jewish state has always been problematic. Yet considering the larger picture of what has happened in the

Middle East over the last 25 years -- the peace treaties with Egypt and Jordan, the weakening of Syria as a result of the collapse of the USSR, the smashing of Iraq by the U.S. -- Israel is, militarily speaking, stronger than ever before. The greatest remaining threats are terrorism and guerilla warfare; and those, this book argues, are best dealt with territorial concessions. Martin van Creveld's *Defending Israel* is a compact, incisive study that is certain to draw attention.

Published to coincide with the centennial celebration of U.S. Navy Aviation, this book chronicles Navy aviation from its earliest days, before the Navy's first aircraft carrier joined the fleet, through the modern jet era marked by the introduction of the F-18 Hornet. It tells how naval aviation got its start, profiles its pioneers, and explains the early bureaucracy that fostered and sometimes inhibited its growth. The book then turns to the refinement of carrier aviation doctrine and tactics and the rapid development of aircraft and carriers, highlighting the transition from propeller-driven aircraft to swept wing jets in the period after WW II. Land-based Navy aircraft, rotary-wing aircraft and rigid airships, and balloons are also considered in this sweeping tribute.

The renowned Irish historian delivers "an excellent scholarly reevaluation" of the 1916 Easter Rebellion and the turbulent decade that followed (*Library Journal*). On Easter Monday of 1916, the Irish Republican Brotherhood launched an armed uprising against British rule that would continue for six days. But Easter Rising was only the beginning of an ongoing revolutionary struggle. In *A Nation and Not a Rabble*, Diarmaid Ferriter presents a fresh look at Ireland from 1913-1923, drawing from newly available historical sources as well as the testimonies of the people who lived and fought through this extraordinary period. Ferriter highlights the gulf between rhetoric and reality in politics and violence, the role of women, the battle for material survival, the impact of key Irish unionist and republican leaders, as well as conflicts over health, land, religion, law and order, and welfare.

For anyone seeking a diverse range of perspectives on globalisation in the Asia-Pacific region, this collection of highly readable essays is a good place to start. Focusing on individual countries, the chapters examine the specific modalities of global integration and the responses of different sections of society in each country. The authors address questions of major importance for democratic societies, such as: the connection between globalisation and the rise of religious extremism; whether globalisation is in reality a new form of imperial preference; who the winners and losers are. These are complemented by three short case studies dealing with Indonesia's unrealised potential, foreign investment in China and patterns in the movement of people between Hong Kong and the mainland. The essays provide a rich source of thought-provoking analysis of the complex cultural and political responses arising from both opportunities provided by globalisation and its more negative impacts. Melanie Beresford, Macquarie University, Australia *Globalization in the Asian Region* draws confident ragged lines across disciplines, themes and the conventional boundaries of scholarship. The range of material in the anthology is astounding. The diversity and admixture of political positions and approaches is confronting. Contemporary Asia is thus mapped without overgeneralizing a homogenous whole. Paul James, RMIT University, Australia This collection of thoughtful essays provides a reliable picture of the dynamic and often ironic operation of globalization in Asia today and challenges individuals to believe that as communities we have a choice in how we respond and contribute to globalization. The editors highlight the multifaceted nature of globalization and bring to the fore its supraterritoriality. A dozen detailed studies make good on these claims from analyses of American militancy since 9-11, terrorism, and poverty, to case studies on Malaysia, Indonesia, India, Australia, New Zealand, Japan, and China. These essays make clear the interactive nature of globalization as various economic, cultural, and political forces pour into Asian societies while the impact of their responses from exports to currency fluctuations to migration flows to transnational religious movements in turn reshape the selfsame globalization process. Timothy Cheek, University of British Columbia, Canada Bringing together contributors from both the university sector and business-centered research institutions, this comprehensive volume offers diverse perspectives on the impacts and consequences of globalization in different parts of the Asian region. Each chapter offers a substantial account of globalization within a particular nation-state or area in the region. Different understandings underpin the chapters. Some contributors perceive globalization as progress in the form of economically driven processes that have made nations mutually dependent in unprecedented and complex ways. Others emphasize the uneven outcomes of globalization, as well as the stakes for economic growth and social order in the global climate of deepening political and religious divisions since September 2001. General and specialist readers alike will gain an appreciation of the myriad emphases placed on globalization within different nations and from various vantage points. The book showcases diverse styles of discourse and serves to greatly broaden the scope of what can be discussed under the rubric of globalization within a single volume.

The first major study of the Great Leap Forward, this seminal volume has now been translated into English for a wider audience. Like no other work, it suggests compelling political and social answers to questions that have long plagued scholars: How could a party with such a successful rural base launch a movement so divorced from reality— especially in the countryside? Why was the movement pressed to the point of social chaos and economic collapse, giving rise to arguably the greatest famine in human history? Utilizing a wealth of primary material, Jean-Luc Domenach focuses on the central China province of Henan, which emerged as a national model of the Great Leap and was one of the most devastated by its failure. The author's documentary sources enable him to illuminate the development of provincial and local political life as well as to gauge popular reactions to the dictates of the center. Domenach presents a lucid analysis of the setbacks in agriculture in 1956 and 1957, the rise of economic corruption, and the launch of the CCP rectification campaign in 1957. Despite the enormous impact of the Great Leap on Chinese politics and economics in the decades that followed, it has proven immensely difficult to research. Domenach's contribution thus stands out as an original and important work on the period.

This significant contribution to the study of the live and recorded broadcasting of stage plays focuses on National Theatre Live a decade after its launch in 2009. Assessing livecasting through the concepts of spectacle, materiality and engagement, it examines the role played by audiences in livecasting. Illustrated by in-depth analyses of recent NT Live shows, including *A Midsummer Night's Dream* (2019), *Antony and Cleopatra* (2018) and *Small Island* (2019), the book is complemented by insights from practitioners involved in the making of the livecasts. Finally, livecasting is contextualized within recently emerged forms of Covidian (virtual) theatre during the pandemic in order to offer some thoughts on the future of the genre of theatrical performance. Combining lively analyses of recent theatre performances with auto-ethnographic accounts, Heidi Lucja Liedke turns to 20th-century thinkers such as Walter Benjamin and Bertolt Brecht in order to understand livecasting's place in a continuum of developments taking place on the borders of media, film and performance for the past 100 years. As well as embedding livecasting in its historical context of 19th-century electrophone technology, Liedke assesses its position in contemporary discourses on the meaning of theatre for spectators in the pre- and post-pandemic moment, and points towards the form's future.

Globalization in the Asian Region Naval Institute Press

In recent years, the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional–National Economic Problem brings attention to the highly centralised, top down governance structure that the UK deploys, and demonstrates that it is less than ideally placed to rectify these inequalities. The 'North-South' divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

This book explores the world of Nigerian universities to offer an innovative perspective on the history of development and decolonisation from the 1930s to the 1960s. Using political, cultural and spatial approaches, the book shows that Nigerians and foreign donors alike saw the nation's new universities as vital institutions: a means to educate future national leaders, drive economic growth, and make a modern Nigeria. Universities were vibrant places, centres of nightlife, dance, and the construction of spectacular buildings, as well as teaching and research. At universities, students, scholars, visionaries, and rebels considered and contested colonialism, the global Cold War, and the future of Nigeria. University life was shaped by, and formative to, experiences of development and decolonisation. The book will be of interest to historians of Africa, empire, education, architecture, and the Cold War.

Russian nationalism, previously dominated by 'imperial' tendencies - pride in a large, strong and multi-ethnic state able to project its influence abroad - is increasingly focused on ethnic issues. In 2014, Russia's annexation of Crimea and the subsequent violent conflict in Eastern Ukraine utterly transformed the nationalist discourse in Russia. This book provides an up-to-date survey of Russian nationalism as a political, social and intellectual phenomenon by leading Western and Russian experts in the field of nationalism studies. It includes case studies on migrantophobia; the relationship between nationalism and religion; nationalism in the media; nationalism and national identity in economic policy; nationalism in the strategy of the Putin regime as well as a survey-based study of nationalism in public opinion.
