Past Papers & 4 Online Tests 6th Edition Disha Publications This paper identifies leading indicators of fiscal crises based on a large sample of countries at different stages of development over 1970-2015. Our results are robust to different methodologies and sample periods. Previous literature on early warning systems (EWS) for fiscal crises is scarce and based on small samples of advanced and emerging markets, raising doubts about the

robustness of the results. Using a larger sample, our analysis shows that both nonfiscal (external and internal imbalances) and fiscal variables help predict crises among advanced and emerging economies. Our models performed well in out-of-sample forecasting and in predicting the most recent crises, a weakness of EWS in general. We also build EWS for low income countries, which had been overlooked in the literature. Proceedings Disha Publications
