New York Times bestselling author Tana French, author of the forthcoming novel *The Searcher*, is "the most important crime novelist to emerge in the past 10 years" (The Washington Post) and "inspires cultic devotion in readers" (The New Yorker). "Required reading for anyone who appreciates tough, unflinching intelligence and ingenious plotting." —The New York Times Now airing as a Starz series. In the "compelling?" (The Boston Globe) and "pitch perfect?" (Entertainment Weekly) follow-up to Tana French's runaway bestseller *In the Woods*, Cassie Maddox has transferred out of the Dublin Murder Squad—until an urgent telephone call brings her back to an eerie crime scene. The victim looks exactly like Cassie and carries ID identifying herself as Alexandra Madison, an alias Cassie once used as an undercover cop. Suddenly, Cassie is back undercover, to find out not only who killed this young woman, but, more importantly, who she was. The Likeness is a supremely suspenseful story exploring the nature of identity and belonging.

This book will serve as a key resource for all clinicians working in orthopedics, sports medicine, and rehabilitation for the sport of tennis. It provides clinically useful information on evaluation and treatment of the tennis player, covering the entire body and both general medical and orthopedic musculoskeletal topics. Individual sections focus on tennis-related injuries to the shoulder, the elbow, wrist, and hand, the lower extremities, and the core/spine, explaining treatment and rehabilitation approaches in detail. Furthermore, sufficient sport science information is presented to provide the clinical reader with extensive knowledge of tennis biomechanics and the physiological aspects of training and rehabilitation. Medical issues in tennis players, such as nutrition and hydration, are also discussed, and a closing section focuses on other key topics, including movement dysfunction, periodization, core training, and strength and

conditioning specifics. The expansive list of worldwide contributors and experts coupled with the comprehensive and far-reaching chapter provision make this the highest-level tennis medicine book ever published.

"First published in 1925, this book outlined its author's concept of "ley lines," supposed pre-Roman pathways consisting of aligned stone circles, standing stones, and prehistoric mounds, used for trading and ceremonial purposes during the Neolithic era. Based on his surveys of the Anglo-Welsh border country, Alfred Watkins believed that in ancient times the country was crisscrossed by a network of straight-line travel routes, with prominent features of the landscape used as navigation points. Watkins's theories have intrigued and inspired generations of readers, from historians to hill walkers, and from amateur archeologists to new-age occultists. This new edition, with a substantial introduction by Robert Macfarlane, and retaining Watkins's original atmospheric black-and-white photographs, introduces a classic antiquarian text to a 21st-century audience. It will appeal to all who treasure the history, the contours, and the mystery of ancient landscapes." -- from Amazon.com.

Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific

disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, CDL Study Guide Book Crestline Books

it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

An easy way to help young girls see God's promises and how they can rely on His love in their daily lives. The promise verses in this book are selected from the best-selling International Children's Bible® to offer comfort and encouragement when a girl is feeling afraid, lonely, worried, angry, dissatisfied, discouraged, sad, rebellious, impatient, or sick . . . and when they need reassurance of God's protection, love, forgiveness, help . . . and that He listens when they pray. It's a great way for children to hide God's Word in their hearts. Sample text: Monsters. Spiders. Being alone. Do any of these things make you feel afraid? When you start to feel fear, hold on tight to these words: God promises to take your fear away! "So don't worry, because I am with you. Don't be afraid, because I am your God. I will make you strong and will help you. I will support you with my right hand that saves you." Isaiah 41:10

Ending a toxic relationship can sometimes make us feel like we are going insane. Because we are so enmeshed with the other person, we feel nothing but fear, doubt, confusion, shame and even guilt when we consider terminating the relationship. Although we can hear a little voice inside our heads urging us to move forward, all too often our worries overwhelm us and cause us to stay stuck. We no longer know whose thoughts or feelings are in our heads. All we can feel is fear. If you are contemplating ending a relationship you know in your heart must end, but are struggling with crippling negative emotions, Lisa's story is just the right dose of inspiration you will need as you begin facing your new roads ahead. No stranger to heartache, Lisa bravely ended her dysfunctional marriage and took her three small children with her. With nothing to cling to but hope, Lisa courageously learned to navigate her way through unknown terrains, and eventually found the will to even love again.

Donny Petersen feels honored to share the wealth of his motorcycle knowledge and technical expertise.

This book is the partial product of a conference on concussion in athletics held at the Pennsylvania State University, April 29-30, 2004. For a number of reasons it seemed timely to hold such a conference as well as to condense our current understanding of mechanisms, predispositions, and latest developments in evaluation and managements of sport-related concussions in a single book format. Despite dramatic advances in medicine, traumatic brain injury, commonly know as concussion, is still one of the most puzzling and least understood injuries facing the sport medicine world today. There still no universal agreement assigning the level of severity the sport-related concussions nor there is any treatment besides the passage of time. Medicines' inability to fully understanding concussion, has led us to question when it is truly safe to return an athlete to full sport participation so threat for risk of re-injury is minimized. The need for a multidisciplinary approach to understanding the spo- related concussions stem from recent evidence that there are long-lasting residual behavioral, psycho-social and neural disabilities that are often overlooked using current research methods. The notion of transient and rapid symptoms resolution is misleading since symptoms resolution is frequently not indicative of injury resolution. There are no two traumatic brain injuries alike in mechanism, symptomology, or symptoms resolution. Most grading scales are based on loss of consciousness, and post-traumatic amnesia, both of which occur infrequently in sport-related mild traumatic brain injuries.

In The Harley-Davidson and Indian Wars, author Allan Girdler takes you on a colorful tour of the men and machines that competed to dominate the American motorcycle industry. This book chronicles the legendary machines such as the Knucklehead and the Four, as well as motorcycles like the Hummer and the Model CZ whose times came and went or, perhaps, never came at all. The racing history is also told with a flourish, from the days of total-loss oiling, wooden race tracks, and high mortality rates to the cataclysmic times of Class C racing, when roaring V-twin -powered beasts were manhandled on dirt tracks, asphalt, and through the nastiest terrain the country has to offer. The Harley-Davidson and Indian Wars tells the story of these two makers, from the days when Harley-Davidsons were built in the Davidson family's back yard to the tragic demise of the Indian Motorcycle company.
