Attitudes and Attitude

Change Longman

This book is a comprehensive treatment of the professionalization and institutionalization of the academic discipline of geography in Europe and North America, with emphasis on the 20th century and the last quarter of the 19th. No other book has ever attempted coverage of this sort. It is relevant to geographers, practitioners of the social and earth sciences, and historians of science and education.

For the first time, this volume provides a definitive collection of Gloria Ladson-Billings' groundbreaking concept of Culturally Relevant Pedagogy (CRP). After repeatedly confronting deficit perspectives that asked, "What's wrong with 'those' kids?", Ladson-Billings decided to ask a different question, one that fundamentally shifted the way we think about teaching and learning. Noting that "those kids" usually meant Black

students, she posed a new question: "What is right with Black students and what happens in classrooms where teachers, parents, and students get it right?" This compilation of Ladson-Billings' published work on Culturally Relevant Pedagogy examines the theory, how it works in specific subject areas, and its role in teacher education. The final section looks toward the future, including what it means to re-mix CRP with youth culture such as hip hop. This one-of-a-kind collection can be used as an introduction to CRP and as a summary of the idea as it evolved over time, helping a new generation to see the possibilities that exist in teaching and learning for all students.  An exploration of dreams as a spiritual source of healing and inner guidance for your health and well-being • 2018 Nautilus Silver Award • Shares stories--confirmed by pathology reports--from subjects in medical research projects whose dreams diagnosed illness and helped heal their lives • Explores medical studies and ongoing research on the diagnostic power of precognitive dreams, including Dr. Burk's own medical research • Includes an introduction to dream journaling and interpretation techniques
 Your dreams can provide inner guidance filled with life-saving information. Since ancient Egypt and Greece, people have relied on the art of dreaming to diagnose illness and

get answers to personal life challenges. Now, dreams are making a grand reappearance in the medical arena as recent scientific research and medical pathology reports validate the diagnostic abilities of precognitive dreams. Are we stepping back into the future as modern medical tests show dreams can be early warning signs of cancer and other diseases? Showcasing the important role of dreams and their power to detect and heal illness, Dr. Larry Burk and Kathleen O'Keefe-Kanavos share amazing research and true stories of physical and emotional healings triggered by dreams. The authors explore medical studies and ongoing research on the diagnostic power of precognitive dreams, including Dr. Burk's own research on dreams that come true and can be medically validated. They share detailed stories--all confirmed by pathology reports--from subjects in medical research projects whose dreams diagnosed illness and helped heal their lives, including Kathleen's own story as a three-time breast cancer survivor whose dreams diagnosed her cancer even when it was missed by her doctors. Alongside these stories of survival and faith, the authors also include an introduction to dream journaling and interpretation, allowing the reader to develop trust in their dreams as a spiritual source of healing and inner guidance.

"Never before, in the entire history of the American theater, has so much of the truth of Black people's lives been seen on the stage," observed James Baldwin shortly before *A Raisin in the Sun* opened on Broadway in 1959. This edition presents the fully restored, uncut version of Hansberry's landmark work with an introduction by Robert Nemiroff. Lorraine Hansberry's award-winning drama about the hopes and aspirations of a struggling, working-class family living on the South Side of Chicago connected profoundly with the psyche of Black America—and changed American theater forever. The play's title comes from a line in Langston Hughes's poem "Harlem," which warns that a dream deferred might "dry up/like a raisin in the sun." "The events of every passing year add resonance to *A Raisin in the Sun*," said The New York Times. "It is as if history is conspiring to make the play a classic."

Teaching and Learning Geography

This book makes a case for the mother tongue as the medium of education for the first 12 years of the child's life. It describes Nigeria's 6-Year Primary Project, which taught experimental groups of students in their native Yoruba in varying degrees for their first 6 school years, beginning in 1970. The book shows how the mother-tongue education program was planned, organized, and implemented. Chapter 1 traces the historical background of mother-tongue education, describing educational policy and the primary school system under British rule,

and the changes made thereafter. Chapter 2 describes plans for the project including initial goals and funding. Chapters 3 and 4 discuss curriculum development and production, describing how panels developed materials for mathematics, science, social studies, Yoruba, and English instruction. Chapter 5 describes teacher preparation, including workshops and on-the-job training. Chapter 6 describes instructional programs and objectives for each subject. Chapter 7 examines problems encountered during the project. Chapter 8 offers a comprehensive evaluation of the project, including methodology and longitudinal achievement test results (from the five sample groups) that compare several variables, including urban and rural settings. Chapter 9 offers observations and recommendations for other countries, noting literacy-rate improvement and enhancement of the instructional language itself. (TES)

This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The

book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

Kecia Ali delves into the many ways the Prophet's life story has been told from the earliest days of Islam to the present, by both Muslims and non-Muslims. Emphasizing the major transformations since the nineteenth century, she shows that far from being mutually opposed, these various perspectives have become increasingly interdependent.

Kids ask the darndest things . . . and here are the answers—all in one helpful book! Anyone who has ever been a kid, raised a kid, or spent any time with kids knows that asking questions is a

critical part of growing up. Kids have curious minds and they come up with some very interesting questions. But the truth is adults don't always know the answers. The Handy Answer Book for Kids (and Parents) comes to the rescue. Written with a child's imagination in mind, this easy-to-understand book is a launching pad for curious young minds and a life raft for parents at wits end. It addresses nearly 800 queries with enough depth and detail to both satisfy the curiosity of persistent young inquisitors and provide parents with a secure sense of a job well done. It'll equip every parent for those difficult, absurd, or sometimes funny questions from their kids, such as Is there life on Mars? Do rivers ever dry up? Why are there wars? Is there such a thing as a funny bone? Why do dogs bark? Why is the sky blue? Why do people have to grow old? Why do people speak different languages?

The two books, Oral English 1 and Oral English 2, are unique publications in the field of spoken English for English learners at the college or similar level. They're unique in three important ways: First, the books treat all the popular topics, thirty in total, from fun topics like sports to serious topics like politics. Each topic is covered in an unprecedentedly comprehensive way, using various approaches ranging from key words to games. Second, the books can be used as class textbooks, in which case they have more than enough material for a whole academic year. They can also be used for self-study and as reference books. Third, the books are very user-friendly: they present content in a logical format, use clear and helpful illustrations, and provide hints and answers to questions. The two books are the result of more than a decade of research and teaching oral English to non-native speakers. Readers will find the books not only educational, but also very informative and quite entertaining.

The secrets behind China's

extraordinary educational system — good, bad, and ugly Chinese students' consistently stunning performance on the international PISA exams—where they outscore students of all other nations in math, reading, and science—have positioned China as a world education leader. American educators and pundits have declared this a "Sputnik Moment," saying that we must learn from China's education system in order to maintain our status as an education leader and global superpower. Indeed, many of the reforms taking hold in United States schools, such as a greater emphasis on standardized testing and the increasing importance of core subjects like reading and math, echo the Chinese system. We're following in China's footsteps—but is this the direction we should take? Who's Afraid of the Big Bad Dragon? by award-winning writer Yong Zhao offers an entertaining, provocative insider's account of the Chinese school system, revealing the secrets that make it both "the best and worst" in the world. Born and raised in China's Sichuan province and a teacher in China for many years, Zhao has a unique perspective on Chinese culture and education. He explains in vivid detail how China turns out the world's highest-achieving students in reading, math, and science—yet by all accounts Chinese educators, parents, and political leaders hate the system

and long to send their kids to western schools. Filled with fascinating stories and compelling data, *Who's Afraid of the Big Bad Dragon?* offers a nuanced and sobering tour of education in China. Learn how China is able to turn out the world's highest achieving students in math, science, and reading Discover why, despite these amazing test scores, Chinese parents, teachers, and political leaders are desperate to leave behind their educational system Discover how current reforms in the U.S. parallel the classic Chinese system, and how this could help (or hurt) our students' prospects

Attitudes - cognitive representations of our evaluation of ourselves, other people, things, actions, events, ideas - and attitude change have been a central concern in social psychology since the discipline began. People can - and do - have attitudes on an infinite range of things but what are attitudes, how do we form them and how can they be modified? This book provides the student with a comprehensive and accessible introduction to the basic issues in the psychological study of attitudes. Drawing on research from Europe and the USA it presents up-to-date coverage of the key issues that

will be encountered in this area, including attitude formation and change, functions of attitudes, attitude measurement, attitudes as temporary constructs, persuasion processes and prediction of behaviour from attitudes.

Cpce Practice Questions: Cpce Practice Tests & Exam Review for the Counselor Preparation Comprehensive Examination
HarperCollins
"This third edition of Ira M. Lapidus's classic *A History of Islamic Societies* has been

substantially revised to incorporate the insights of new scholarship and updated to include historical developments in the first decade of the twenty-first century. Lapidus's history explores the beginnings and transformations of Islamic civilizations in the Middle East and details Islam's worldwide diffusion to Africa, Spain, Turkey and the Balkans, Central, South and Southeast Asia, and North America, situating Islamic societies within their global, political, and economic contexts. It accounts for the impact of European imperialism on Islamic societies and traces the development of the modern national state system and the simultaneous Islamic revival from the early nineteenth century to the present. This book is essential for readers seeking to understand Muslim peoples."--Publisher information.

CPCE Practice Questions are the simplest way to prepare for the CPCE test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve

success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our CPCE Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our CPCE Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

CONNECTING LIVES

AND LEARNING is a project dedicated to connecting learning to student lives, connecting teachers with the latest middle years research, and better connecting primary and secondary schools to keep students at school longer. Based in Adelaide's lower socio-economic northern urban fringe, the project helps teachers use students' everyday experience and expertise to develop new ways of teaching and learning that involve students in intellectually challenging tasks. This book tells the stories of real teachers, in real classrooms, making real attempts for change, and not always succeeding. It is a book about teachers making a difference in difficult times and tough places. But most importantly, this book reaffirms that being an educator is inherently about adopting socially just practices, building community capacity and contributing to a more socially sustainable world.
