return to teaching with materials. The a textbook for the first time in seven years. The language is both accessible and informal yet the text goes a long way in debunking some of the typical jargon that may alienate students just getting into the field, or trying it out for the first time. The illustrations (the text is full of them) coupled with the stories reinforce the fundamental information being conveyed. -- John Paul Devlin, Associate Professor of Theatre at Saint Michael's College What a great idea! Thank heavens someone is doing this for students at that impressionable age. That has been one of my mantras - education of teachers and students on the use of scenic

teachers don't have enough time in college to learn and do everything they have to teach. Most get thrown into the theatre area by default and struggle with designing/building/painting the scenery. -- Jenny Knott, Rosco Stagecraft Fundamentals is beautifully illustrated throughout, and the profusion of color on every page gives this textbook the appearance of a coffee table book. The writing is clear and personal, which should be very appealing to students. Rita Carver covers all aspects of theatre production from scenery, to lighting, to an actor's makeup. Her close ties to the New York theatre scene gives this book a

special insight into the professional world, one that goes well beyond what is found in most college textbooks. -- John Holloway, Professor in the Theatre Department at the University of Kentucky and President of the International Association of Theatrical stage Employees (IATSE) Local 346. I can't thank you enough for Stagecraft Fundamentals. I have been teaching stagecraft since 1976 and you have saved me from the nightmare of writing a text to suit my class needs..After two semesters with your text, I have found that I had more time to develop the skills necessary within the classroom than

before. The humor that you have infused in the book has enticed my students to read on. That alone makes this text invaluable. --Meta Lasch, Assistant Professor, West Liberty University Canyoneering, 2nd DIANE Publishing (Yamaha Products). Sound reinforcement is the use of audio amplification systems. This book is the first and only book of its kind to cover all aspects of designing and using such systems for public address and musical performance. The book features information on both the audio theory involved and the practical

applications of that theory, explaining everything from microphones to loudspeakers. This revised edition features almost 40 new pages and is even easier to follow with the addition of an index and a simplified page and chapter numbering system. New topics covered include: MIDI, Synchronization, and an Appendix on Logarithms. 416 Pages. West Country Cruising Companion Simon and Schuster Fair winds and fine cruising is author Chris Doyle's wish for

readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and Doyle addresses them by

geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged

rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore

accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type. The 50-Gun Ship Causey Enterprises, LLC The only guide to Southeast Asia that covers the entire length and breadth of a region frequently visited by round-the-world sailors, many of whom leave Australia to head west. This 2008 edition concentrates on the most

frequented routes and includes the most popular stops. There are hundreds of possible anchorages, the most popular of which are usefully summarised in tables.

Introductory sections cover planning and the last part of the book deals with more general topics including advice on provisioning and the problems that are often faced by cruisers. Stephen Morgan and Elaine Davies first arrived in the region over 30 years ago. They

work in Hong Kong- Stephen Davies as Director of the Hong Kong Maritime Museum and Elaine Morgan as a writer and editor. While this pilot is aimed at yachtsmen and indeed was surveyed from the Davies/ Morgan yacht, it is just as relevant to the commercial or military mariner. The part of the world described in this work is one of the most interesting on our planet. Culturally, scenically, climatically and commercially- it has everything.

This excellent book - now in its second edition, describes it all very enticingly. Set to the usual high standard of the Imray pilots that precede it, this one is spiced up by the wit and anecdotes the authors are so good at.

In developing countries, traditional fishermen are important food contributors, yet technological information and development assistance to third-world nations

often focuses on agriculture and industrial fishing, without addressing the needs of independent, small-scale fishermen. This book explores technological considerations of small-scale, primitive fishing technologies, and describes innovative, relatively inexpensive methods and tools that have already been successfully applied in developing countries. It offers practical information about all aspects of small-scale fishing, including boat

design and construction, fishing methods and gear, artificial reef construction and fish aggregating devices, techniques for coastal mariculture, and simple methods for processing and preserving fish once they are caught. Fisheries Technologies for Developing Countries is illustrated throughout with photographs of the devices and construction methods described in the text. [Stagecraft Fundamentals](#) Hal Leonard

Corporation Canvas for Cruisers is a complete guide to sewing for boats. With 768 illustrations and 81 photos, it is the only canvas book you will need. Starting with information about fabrics, notions and the tools you will need to get going, a detailed description of sewing techniques follows - such as how to sew different types of seams, installation of zippers, piping, hems, patches and reinforcing, binding edges and making patterns. Not only are these details described and illustrated, the reason why is explained. These

important details are not covered in the other books. The book continues then, with how-to instructions for many projects inside and outside the boat. All types of covers to protect the boat and its equipment from sun and rain, followed by larger projects such as biminis and dodgers, awnings and sail covers. A separate section on cushions explains all you need to know about designing and constructing practical, comfortable and durable interior and exterior cushions that will stand up to harsh conditions. Also included are many interior

projects to organize and beautify your interior space - storage bags, bedding, curtains, screens. The last section covers repairs - to sails, and canvas - and how to prevent the problem from re-occurring. Canvas for Cruisers DIANE Publishing First published in 1988 as West Country Cruising, Mark Fishwick's definitive sailing guide for the ever-attractive coastline of Dorset, Devon, Cornwall and the Isles of Scilly combines a skilful blend of pilotage and cruising information, with historical insight and suggestions of where to eat and what to do ashore. For those who plan to head west, this book

is more than essential reading – it will enhance your enjoyment and prove to be a worthy and much used addition to the ship's library. Those already in the west will find themselves regularly thumbing its pages. Share Mark Fishwick's passion for this region which combines with his in-depth knowledge from a lifetime cruising these waters to create a text which will inspire and inform you. It is enhanced with colour charts and detailed photography, including spectacular aerial shots of ports, harbours and anchorages, many taken in 2020. This latest, ninth, edition is fully updated for publication and further updates are provided every Spring

on the Fernhurst Books' website. More than one satisfied reader has aptly described the book as "the perfect on-board companion".
