cant get my 3.0 mercruiser to start. wont run. but fires up.
backfires I Bought my boat this summer used it is a 1987
searay deville, with a 3.0 mercruiser. and alpha one outdrive ..I
drove it all this summer with no problems at all. Infact it
always started 1st time.. this year I replaced the plugs . all
new bellows, and all fluids were changed.

The Mercruiser Key Switch has three terminals on
the back. One is a large Red wire which is the main
positive feed. Another wire will be Purple which is
"ignition". This feeds the gauges and keeps the engine
running. The third lead is Yellow/Red and it is what
activates the starter slave solenoid to crank the
engine.
Mercruiser engine won't crank or start. My engine won't
...
MerCruiser Starters. Seventy years ago Mercury Marine
combined a racing car engine and an outboard to create a
marine propulsion system more powerful than any
outboard available at that time, the stern drive.
Advantages of a stern driven system as compared against
outboards include higher available horsepower.

MerCruiser Starters | Wholesale Marine

The electrical connections for a MerCruiser starter motor are made on the solenoid. The solenoid is attached to the top of the starter and sends electrical current to the starter when the ignition switch is turned on. Mercury marine has changed starter and solenoid designs many times over the years. Refer to your ...

My mercruiser 120/140 hp motor will not start. It gets ...

I will assume that the Ignition switch has no power to it. (easily confirmed with a 12 v bulb tester) and the gauges do not move when the switch is turned on/off.. The typical arrangement is for the ignition switch power to come from the battery cable to the starter and than go to a circuit breaker on top of the engine .
