I posted here as you seem to be better equipped to

answer questions in the XR200 class motors. I am considering mounting a Lifan 197cc (62.2 stroke x 63.5 bore) into my big wheel (21/18) CRF150 chassis due to cost of the 250 cc from CRF150 build. The motor is a bolt in affair and I gain e-start under this scenario and can recoup the total motor cost with the sale of my 150 motor.

WITH A 140CC
LIFAN ENGINE*
The second one
comes with a
22mm carb. I have
a 26mm Mikuni I
tried on my X18
110cc, it was to big.
A 24 or 26mm
would probably
work on that 140cc
engine, the one has
bigger valves and
ports.

ENGINE. Single cylinder, 4-stroke, 2 valves, air cooled, 125cc. **LIFAN - Replacement Engines & Parts - Outdoor Power**

... Well you can put a 141cc BBK on a 125cc motor so If thats what you mean by modded than the 141cc would be slightly faster. But a stock 125cc will be better than a stock engine but not as good as a 140cc stock engine. But yes, theoretically it is possible to make a 125cc faster than a 140cc maybe even a 150cc but I might

be pushing it.

SECONDS!!!!!!!!!!
i am thinking about getting a new 140cc motor for my pit bike but cant decide on the YX or the Lifan. let me hear all the pros and cons about both, like power output, reliability, and performance upgrades. by the way its gotta be the 4 up tranny, its the only way to go.?

The Lifan engine thread | Adventure Rider

Great info,thank you! I already welded up a straight pipe,and had no

power/speed increase from it. I'll try a 22mm carb like you suggested. Maybe that and the pipe together will give me a tad more. I'd love to see a 212cc predator engine on one of these Phatmoto bikes instead of that 79cc Lifan engine.
