I posted here as you seem to be better equipped to answer questions in the XR200 class motors. I am considering mounting a Lifan 197cc (62.2 stroke x 63.5 bore) into my big wheel (21/18) CRF150 chassis due to cost of the 250 cc from CRF150 build. The motor is a bolt in affair and I gain e-start under this scenario and can recoup the total motor cost with the sale of my 150 motor.

Great info,thank you! I already welded up a straight pipe,and had no power/speed increase from it. I'll try a 22mm carb like you suggested. Maybe that and the pipe together will give me a tad more. I'd love to see a 212cc predator engine on one of these Phatmoto bikes instead of that 79cc Lifan engine.

Well you can put a 141cc BBK on a 125cc motor so If thats what you mean by modded than the 141cc would be slightly faster. But a stock 125cc will be better than a stock engine but not as good as a 140cc stock engine. But yes, theoretically it is possible to make a 125cc faster than a 140cc maybe even a 150cc but I might be pushing it.
