Shattering the Illusion is the first book to gather and comparatively analyze policies addressing child sexual abuse complaints in a selection of religious institutions in Canada. Although there is a substantial body of literature regarding Christianity and sexual abuse, very little of it focuses on religious institutions in Canada and their respective policies.

In the foreword, Tracey J. Trothen summarizes the Cornwall Inquiry, out of which this book arose. She then examines the Roman Catholic Church, The United Church of Canada, the Anglican Church, the Mennonite Church, Islam, and the Canadian

Unitarian Council/Unitarian Universalist Association, describing in detail the evolution and particular content of policies and procedures that address child sexual abuse complaints directed at paid and volunteer faith community representatives and/ or leaders. She identifies differences and common themes among the approaches taken by the institutions and provides a summary table for an accessible comparative overview. Child sexual abuse is not new, but the emergence of policies to address abuse complaints within religious institutions is. This book identifies significant and shared causal factors behind the emergence of policy and reviews their content carefully. This review will serve as a significant tool for furthering the development of such policies.

This book introduces the fundamental concepts and practical simulation techniques for modeling different aspects of operating systems to study their general behavior and their performance. The approaches applied are object-oriented modeling and process interaction approach to discrete-event simulation. The book depends on the basic modeling concepts and is more specialized than my previous book: Practical Process Simulation with Object-Oriented Techniques and C++, published by Artech House, Boston 1999. For a more detailed description see the Web location: <http://science.kennesaw.edu/~jgarrido/mybook.html>. Most other books on performance modeling use only analytical approaches, and very few apply these concepts to the study of operating systems. Thus, the unique feature of the book is that it concentrates on design aspects of operating systems using practical simulation techniques. In addition, the book illustrates the dynamic behavior of different aspects of operating systems using the various simulation models, with a general hands-on approach.

Nonprofit Organizations "O'Reilly Media, Inc."

Want to make a splash on YouTube? Even go viral? You've come to the right place. This book is written by two veteran 'Tubers who live their art and know what they're talking about -- especially Alan Lastufka, a.k.a. "fallofautumndistro," who has over

13,000 YouTube subscribers and over 4 million views. Alan and co-author Michael W. Dean show you how to make a quality video, and how to optimize, encode, upload, and promote it. This book can't promise you'll be rich and famous, but it can tell you how to make great video art, and what you need to do to get your work seen. You'll learn about: Storytelling and directing Shooting, editing, and rendering Creating your very own channel Broadcasting user-generated content Re-broadcasting commercial content Cultivating a devoted audience Fitting into the YouTube community Becoming a success story Join Alan, who makes part of his living from YouTube, and Michael, a successful filmmaker, author, and D.I.Y. art pioneer. They'll take you from the basics of gear to making it big on YouTube, with a focus on networking and interaction. You'll also sit in on informative interviews with YouTube stars LisaNova, Hank Green (vlogbrothers), WhatTheBuckShow, nalts, and liamkylesullivan. Alan and Michael understand viral marketing -- and they know what it takes to get your work on everyone's YouTube radar. And, once you read this book, so will you.

A Framework for Providing Reusable Enterprise Data Services Greenwood
The study and application of service learning as a pedagogy has become widespread. *Service-Learning in Physical Education and Other Related Professions: A Global Perspective* demonstrates how faculty in physical education and other related professions have designed, implemented, assessed, and conducted action research involving service-learning as a teaching and learning method, both locally and globally, as a means of both serving the community and enriching the lives of their students. This text is broken down into three parts: •Part I provides a definition of service learning, examines the parameters that have been explored in physical education and higher education in general, and the integration of standards to ensure high-quality service-learning. •Part II focuses on the pedagogical frameworks in which service-learning thrives and explores how the model specifically meets national standards and best practices. It also explores the emerging role of research as a measurement tool of the effectiveness of service learning. •Part III explores a variety of programs from around the globe that utilize service-learning in their pedagogical framework, and provides the nuts and bolts of what they have done

and their accomplishments.

"This practical text helps student teachers develop their confidence, understandings and skills so that they can effectively and authentically teach arts in primary and middle school classrooms. Delivering Authentic Arts Education outlines the true nature of arts education and its importance in the curriculum, emphasising the arts as forms of creative activity, meaning-making and expression in a cultural context. Chapters discuss how to recognise and build on your existing artistic abilities and pedagogical skills, how to encourage children's creativity, how to lead arts appreciation experiences, and the general principles of planning and assessment. They then examine the five arts areas: dance, drama, media arts, music and visual arts. The final part of the text contains sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry. Practical tips,

classroom 'snapshots', starter ideas and suggestions for online resources show you the links between theory and practice so you can develop arts education experiences that are purposeful, stimulating and engaging for everyone"--Publisher's summary. Invitation to Holistic Health Jones & Bartlett Learning The Definitive Guide to SOA: Oracle® Service Bus, Second Edition targets professional software developers and architects who know enterprise development but are new to enterprise service buses (ESBs) and service-oriented architecture (SOA) development. This is the first book to cover a practical approach to SOA using the BEA AquaLogic Service Bus tool. And it's written from the "source"—BEA Systems AquaLogic product lead Jeff Davies. This book provides hands-on information to developing SOA-driven applications with ESBs as central components. It also gives strategic guidance on SOA planning, web service life-cycle management, administration of an ESB, and security considerations. Author Jeff Davies is careful to cut through theory and get straight to demonstrating successful use of the product.

If you want to learn how to breed, raise, and prepare show hogs for pig shows, then check out HowExpert Guide to Show Pigs. This guide is an information-dense piece of text that is a step-by-step guide for raising show pigs from farrow to table. In the first section of the book, you will discover everything there is to

know about picking a sow and boar to produce a litter of pigs that will be able to stand the test of showing. Whether it's for meat or a high-quality, well-mannered show hog, this book will help you make informed decisions. Additionally, you will receive information and tips on breeding your sow and then maintaining her well-being throughout the sow's life. Even while she is laboring, you will have everything there is to know about birthing a litter of pigs and setting them up for success with castrations, vaccinations, and feed diets. In the second section of the book, the content will primarily focus on how to prepare the show hog for the ring. Complete with training tips, tools, supplements, and product suggestions, as well as information about maintaining a clean area. This book will guide you through the show pig process from birth, all the way up till they are in the show ring and off to the auction. Additionally, for hogs raised for the freezer, you will be informed about how to monitor their progress and determine when they are ready and what you will be able to harvest from a complete meat-rearing hog. For anyone looking to dive into the world of pig agriculture and diversify their skill-set, this is the beginner's guide to getting a hog business started. Check out HowExpert Guide to Show Pigs if you want to learn how to breed, raise, and prepare show hogs for pig shows! About the Author Keiren Cook is a young and avid writer passionate about raising quality hogs for the youth interested in agriculture. She started in the hog business as a freshman in high school when she showed her first

hog at the county fair. From there, her love for hogs has grown into a thriving business, where for the last six years, she has built up a reputation for breeding and producing high-quality meat and show hogs for the youth in her community. Over those six years, she has been in many experiences and situations, which has prepared her to write an information-dense "How-To" book about raising this breed of livestock. HowExpert publishes how to guides by everyday experts.
