Richard Lamb, one of the few Italian-speaking officers in the British Army during World War II, has relied in part on newly opened Italian archives to present a surprising and unprecedented history of the war in Italy from Mussolini's fall until the final victory.

Chronicling an unbroken sequence of Nazi infamies, Lamb reveals how German troops massacred thousands of surrendering Italians in the Aegean islands, deported Italian Jews to Auschwitz, and

slaughtered Italian hostages and POWs. Had it not been for Mussolini's frenzied attempts to protect his countrymen, Italy would have been treated even worse than Poland. Lamb answers important and controversial questions, such as why the Allies did not land unopposed in Italy before the Germans poured over the Brenner Pass, and why Pope Pius XII did not take a stronger stand on behalf of Jews and the victims of the Ardeatine massacre. He details Anthony Eden's opposition to an aid for Italian partisans, and the disastrous order from the War Office that British POWs should stay in their camps. He

unfolds the extraordinary stories of the Cossack settlement in the Friuli, the attempted annexation of northern Italy by de Gaulle and Tito, the contributions of the Royalist Army to the Allied cause, the Italian civilians who helped Allied POWs escape, and the German generals who failed to obey Hitler's order to "scorch" all of Northern Italy. War in Italy will long remain the most complete account ever published of one of the most terrible dramas of World War II.

America, Incorporated  
Imaginary beasts have figured prominently in literary works ever since the ancient world, when these myths were first formulated. But the nineteenth century witnessed the rise of science, the discovery of geological findings that challenged the biblical myth of creation, and the birth of Darwin's theory of evolution. Since then, monsters have evolved from supernatural creatures to natural ones endowed with exceptional size, strength, or intelligence. This book explores both literary and cinematic texts that are especially explicit in their Darwinian portrayal of monstrous beasts, though these creatures

retain an archaic mythological quality. The myth of Leviathan and Behemoth, for instance, is as central to *Jaws* as it is to *Moby-Dick*; indeed, *Jaws* inherits the myth directly from *Moby-Dick*, as does *King Kong*. These and other monster tales, such as *The Creature from the Black Lagoon* and *Grendel*, keep the ancient myth alive and relevant by recasting it in the context of biological and cultural evolution. There is a pattern of alternating bestialization and anthropomorphism in many monster tales, suggesting that these images are being displayed in repeated attempts to define who we are in relation to animals. Thus the more beastly the monster, the

more insistently we erect the old paradigm of the Ladder of Being, placing ourselves on a higher and separate rung; but the more human-like the creature, the more readily we shift to the paradigm of the Tree of Life, in which all creatures are more closely related. Since the matter of distinctions between species also involves questions of race, the monster myth is often conscripted to serve racist agendas. But more often than not, the myth has an anti-racist subtext that undercuts the hierarchy. The closing chapters of the volume consider the notion of artificial evolution in works such as *The Island of Dr. Moreau*, and human-machine interaction in *Gravity's Rainbow*. As fables of identity,

---

monster tales dramatize our anxieties and fears about our own animal nature and provide a means of coming to terms with our evolution.
