American Cars, 1973-1980 Haynes Manuals N. America, Incorporated  
Since the 1950s, Dodge has produced a series of

charismatic performance cars that have given the company a unique reputation among American car makers. The original Charger and Challenger and the more recent Viper and Caliber SRT are outstanding examples of the company's commitment to cars of high performance and aggressive styling. Peter Grist's pictorial history of these typically American machines gives a fascinating insight into their ancestry and evolution and celebrates the huge impact they have made on the road and on the track. His account is an exciting introduction that will appeal to everyone who is interested in American automobile history. When the first Dodge performance cars were conceived in the early 1950s, they were a brave step for a company that was

well known for its dependable styling experiments and saloons and pickups. Peter Grist describes this change of direction and the radical new thinking that resulted in the creation of the innovative Dodge Hemi V8 of 1953. This remarkable engine provided the power for the first sporting Dodges and led to the race-bred D-500 series of 1956, the first Dodge Muscle car. But Dodge's reputation for creating big, potent, sporting cars was really consolidated in the 1960s and early 1970s the muscle-car era when the Dart, Charger and Challenger were so successful on the road, the race track and drag strip. The book features these historic cars and the drivers who have raised Dodge to a pre-eminent position over the last 50 years. Featuring illustrations of Dodge's

concept cars, which had such a strong effect on their production models, from the first Dodge concept the 1954 Firearrow up to the most recent Challenger and Hornet. The book brings together an evocative collection of over 200 photographs and adverts that offer a unique look at ALL of Dodge's fast cars in one book. this is an entertaining and informative guide to the Dodge tradition which will be essential reading for Dodge enthusiasts and for everyone who enjoys their cars at full speed.

The Street Fighters  
True muscle cars make no apologies. They had one primary job: get the driver from Point A to Point B as fast as law, and the driver's driving ability, would allow. They started off in the early 1960s as mid-size sedans and coupes stuffed with oversized engines - Bel Airs, Catalinas, and Tempests - and it wasn't long before crazy hi-po machines came in all shapes in sizes. Mustangs, Camaros, Chargers, Chevelles, 4-4-2s, Gran Sports ... they all had one thing in common: big engines, and big performance. In Nothin' But Muscle,

you'll find 199 of the greatest American performance cars ever built. From the earliest 1964 GTO, to the Shelby-built muscle/racers of the late-â€™ ~ 60s, to the ferocious Buicks of the 1980s and 500-plus-hp Viper and Corvette rocketships of today. 1970 Maximum Muscle

“ Just what is a Muscle Car? ” Road Test magazine asked in June 1967. The answer:

“ Exactly what the name implies. It is a product of the American car industry adhering to the hot rodder ’ s philosophy of taking a small car and putting a BIG engine in it. . . . The Muscle Car is Charles Atlas kicking sand in the face of the 98 horsepower weakling. ”

Unconcerned with such trivial details as comfort and handling, the vintage American muscle car was built for straight-line speed

and quickly became the ride of choice for power-hungry racers and serious gearheads. In a country where performance was measured in brute force, a quarter mile at a time, the muscle car was the perfect machine. In the intervening years, these down-and-dirty, high-performing beauties have earned their place in the automotive pantheon. As prized by collectors and aficionados as they are by denizens of garages and drag strips, classic muscle cars now fetch upwards of a million dollars at auctions and feature in any story of America ’ s automotive glory days.
