Crime, Shame and Reintegration is a contribution to

general criminological theory. Its

approach is as relevant to professional burglary as to episodic

Braithwaite argues that some societies have higher crime rates than others because of their different processes of shaming wrongdoing. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the

offender, it can be an extraordinarily powerful, efficient and just form of social control. Braithwaite identifies the social conditions for such successful shaming. If his theory is right, radically different criminal justice policies are needed - a shift away from punitive social control toward greater emphasis on

moralizing social control. This book will be of interest not only to criminologists and sociologists, but to those in law, public administration and politics who are concerned with social policy and social issues. This text maintains the tradition established in previous volumes in that it is catered both to the educational public and the university student, providing fresh research and valuable information concerning relevant topics from

social and educational backgrounds. Authored by a selected group of experts, members of the “ Human Development ” research group, the essays investigate key topics such as leadership, arts, education, pedagogy, linguistics, psychology and sports. The contributors, based at the Catholic University of Murcia, Spain, consider a number of social issues and challenges pertinent to,

and present in, contemporary life.

Johannes Buchmann is internationally recognized as one of the leading

figures in areas of computational number theory, cryptography and information security. He has published numerous scientific papers and books spanning a very wide spectrum of interests; besides R&D he also fulfilled lots of administrative tasks for instance building up and directing his research group CDC at Darmstadt, but he also served as the Dean of the Department of Computer Science at TU Darmstadt and then went on to become Vice President of the university for six years (2001-2007). This

festschrift, published in honor of Johannes Buchmann on the occasion of his 60th birthday, contains contributions by some of his colleagues, former students and friends. The papers give an overview of Johannes Buchmann's research interests, ranging from computational number theory and the hardness of cryptographic assumptions to more application-oriented topics such as privacy and hardware security. With this book we celebrate Johannes Buchmann's vision and achievements.
