The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

Workshop Manual: M.R. 156

'I could have done with a copy of Ad Astra in December 2015!'

–Tim Peake 'A wonderful, wise and witty guide for space

explorers everywhere.' – Richard Osman 'A must read both for

intrepid space explorers and misty-eyed dreamers. Now, to

space!' – Hannah Fry 'Few people are more knowledgeable,

celebratory and witty about space travel than Dallas Campbell.'

– Adam Rutherford Need some space? For almost all human

history we've been firmly rooted to the Earth. And, sure, it's got

some good things going for it: nice views, friendly inhabitants,

good coffee. Air. But what if you want to get off? Whether you've

got itchy feet and need a bit of a break, or you're looking for a

complete change of scene, this book has all the information

you'll need to leave, with FREE expert advice from the men and

woman who can actually make it happen. Do I need a passport?

How do I know if I have the right stuff? Can I take my dog? What

spacesuit do I need? Where am I going to go? What am I going

to eat? As well as being a deeply impractical guide to getting off

the planet, this is an eclectic and beautifully illustrated mix-tape

of space travel stories – both real and imagined. From the

migrating lunar geese that flew us to the moon in the 1600's, to

Elon Musk's wild plan to get humans to Mars en masse in the

future; from the history of early rocket science to the Soviet

tortoises that secretly won the space race. A collection for

anyone who has looked up in wonder at the stars... And then

wondered how to get there. 'The next best thing to actually

heading off into space.' – Jim Al-Khalili 'Few people are more

knowledgeable, celebratory and witty about space travel than

Dallas Campbell.' – Adam Rutherford 'If, like me, you dream of

going into space, this is definitely the place to start the journey.'

– Dan Snow 'A must have volume for astronauts and armchair

astronauts alike.' – Helen Sharman OBE 'Funny, factual and

beautiful.' – Shaun Keavney 'Read it, make notes, and be

ready when the day comes.' – Helen Czerski
