Where Willows Grow Merwan Pub  
Organized in 1870 at Buffalo, N.Y., as the result of an effort to close the saloons on Sunday. Its founder, Gyrus K. Porter, had for many years been actively identified with the Freemasons, Odd-

---

Fellows, and Sons of Temperance, and so acquired the experience necessary to frame a ritual for an organization which should be educational and uplifting in its character. An active interest was taken in the movement, which subsequently became a secret fraternal benefit society, with a benefit fund, from which, on satisfactory evidence of the death or total disability of a beneficiary member, a sum not exceeding \$5,000 should be paid to the family, orphans, dependents, or persons having an insurable interest in his life. The Supreme Council, or law-making body of the order, was organized at Buffalo, February 16, 1870. During its earlier years the order endeavored to unite all to labor morally, socially, and religiously for the promotion of the cause of temperance, and in this regard maintained a local organization and confined its efforts to purely local work. At a meeting of the Supreme Council, January 15, 1877, a

revised constitution, including the benefit system, was adopted, and the society reorganized. From the date of its reorganization its growth was marked, and has kept pace with the ever-widening influence of the fraternal system. The formation of the order, while undoubtedly inspired by, was not the result of any disruption of other temperance orders. It came into the fraternal world with a special work to perform, and claims to be "the only strictly total abstinence order that has successfully combined its temperance principles with its beneficiary work." During twenty years the stream of benefits, which appeared small at its beginning, has steadily increased, until over \$5,000,000 has been disbursed in the United States and Canada. Its membership is composed of both men and women, who enjoy equal rights and privileges. Its government is vested in a Supreme Council, which meets biennially, composed of

---

the incorporators of the order and officers and representatives from Grand Councils. Grand Councils are formed in any State or territory where a sufficient number of Select Councils have been organized, and when so formed have jurisdiction in its State or territory, except in the beneficiary department. Select Councils are the subordinate or working bodies of the members. An influential branch exists in the Dominion of Canada, which has a separate beneficiary jurisdiction. A union has been formed with the Swedish American branch of the Templars of Temperance, and the beneficiary department is managed as one in the United States. An emergency or reserve fund is a feature in both the United States and Canada. The strength of the order in the United States and Canada, and in the Scandinavian branch, exceeds 20,000 members in the beneficiary department and about 30,000 social members.

The number of Grand Councils in the United States is seven, and in Canada five. The order does business in twenty-seven States, aims to furnish insurance at actual cost, and "has no deaths from intemperance." Its plans have been improved by experience, and as its record inspires confidence its prospects are bright for continued success.

Some colds are like mice, timid and annoying; others like dragons, accompanied by body aches and deep misery. In *AH-CHOO!*, Jennifer Ackerman explains what, exactly, a cold is, how it works, and whether it's really possible to "fight one off." Scientists call this the Golden Age of the Common Cold

---

because Americans suffer up to a billion colds each year, resulting in 40 million days of missed work and school and 100 million doctor visits. They've also learned over the past decade much more about what cold viruses are, what they do to the human body, and how symptoms can be addressed. In this ode to the odious cold, Ackerman sifts through the chatter about treatments-what works, what doesn't, and what can't hurt. She dispels myths, such as susceptibility to colds reflects a weakened immune system. And she tracks current research, including work at the University of Virginia at Charlottesville, a world-renowned center of cold research studies, where the search for a cure

continues.

century volume on Angel Magic. With editor Adam McLean's concise and illuminating observations, *A Treatise on Angel Magic* constitutes one of the most important links between John Dee and the late 19th century schools of occult-*The Golden Dawn*, *Aurum Solis*, and the O.T.O founded by Aleister Crowley. McLean distinguishes this edition from many other books in this field in that he does not present merely one viewpoint on western esoterica and the study of Angel Magic but encompasses all of the important thinking on these topics present in medieval times and those of the Renaissance. Rich with charts and explanatory diagrams, *A Treatise on Angel Magic* is a primary source work in hermetics. This volume is a great bringing together of several seminal texts not available anywhere else. McLean transcribes and preserves in its entirety one of the most important occult manuscripts in the British Library, Harley 6482, which includes wondrous sections of the Schemhamphoras, the hierarchies of fallen angels, rapturous Images of the Mansions of the Moon, evocation of the Nature Spirits, and John Dee's Enochian system of Angel conjuration. This volume concludes with Dr. Rudd's *Treatise on the Nine Hierarchies of Angels and their conjuration to visible appearance*. This book is an outstandingly complete source work on Angel Magic, and the correspondence and symbolism essential to the practice of angelology. Book jacket.

Residential design provides a rich testing ground for architectural innovation. Intimate scales and specific programs inspire distinctive homes, and comparatively small budgets are catalysts for exploring nontraditional materials. Modern Shoestring proves that building a contemporary house can be affordable and shows how constraints actually stimulate the most creative design solutions. Eighteen residential projects are presented, with emphasis on the goals of the owners, the site, and the cost in the design process. Collections determine floor plans, observatories are built for starry rural nights, and found and industrial materials such as highway construction remnants, laboratory counters, plastic water bottles, and discarded chalkboards keep costs low while imbuing structures with character. These ingenious designs range in cost from \$50 to \$220 per square foot and represent geographical settings from Los Angeles to Anchorage to East Hampton.

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser ' s philosophy. The growing importance of Althusser ' s philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called ' Ideological State Apparatuses ' , law is at the

forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser ' s ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

It was *Life* and *Time* magazines that turned a local story from Tucson, Arizona, into a national abomination. Reporters came from all over, to be sure, but on March 4, 1966, *Life* printed an ominous photo of the desert landscape where three girls had disappeared and the story of Charles Howard Schmid, Jr., or "Smitty," became international news. He had been arrested four

---

months earlier on November 11, just after marrying a fifteen-year-old girl whom he'd met on a blind date. The article was published even before the juries in two separate trials had decided his fate. Dubbed "The Pied Piper of Tucson," for his ability to get girls to fall for him, he stood five feet, four inches tall, but added three more inches by padding his stack-heeled cowboy boots with rags and tin cans. He also dyed his reddish-brown hair black, used pancake make-up, whitened his lips, and applied a fake mole to his left cheek—a "beauty" mark. Arrogant and narcissistic, he came from a wealthy family, so he used the niceties he could buy to impress young high school girls. He adopted the droopy-eyed look associated with Elvis, his idol, and acquired a rock musician's mystique. His

tiny house on his parents' property was the scene of many parties. Tucson society was not merely shaken by the murders of three of their young women but by what the details of those murders revealed about its adolescent population—sex clubs, drinking parties, blackmail, cover-ups for murder, and even connections with the crime underworld. Parents suddenly became more strict, more aware now that their kids weren't safe and maybe weren't even behaving properly. When kids looked to someone like Charles Schmid for answers, there was something terribly wrong. Ah-Choo! National Geographic Books Gill's tarot pack is based on the structure of "The Tree of Life".
