How to Rebuild the Small-Block Ford
Veloce Publishing

This is the history, development and
application of piston aero engines,
from those used in the Wright
Brother's pioneering aircraft at the
beginning of the century to the small
machines which power microlights
today. In addition to listing the various
engines it also discusses the principles
involved in the working and evolution
of these power plants. The book
includes details of new families of

engines being developed at the present time as well as suggestions as to what the future might hold.

The Legend of Briggs & Stratton
Whitehorse Press

A cruciform biaxial test specimen was used to test the effect of biaxial load on the yield of aluminum-lithium alloy 2195.

Fifteen cruciform specimens were tested from 2 thicknesses of 2195-T8 plate, 0.45 in. and 1.75 in. These results were compared to the results from uniaxial tensile tests of the same alloy, and cruciform biaxial tests of aluminum alloy 2219-T87. Johnston, W. M. and Pollock, W. D. and Dawicke, D. S. and Wagner, John A. Fifty Shades of Chicken
Haynes Publications

American Motorcyclist magazine, the official journal of the American Motorcyclist Association, tells the stories of the people who make

motorcycling the sport that it is. It's available monthly to AMA members. Become a part of the largest, most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800-AMA-JOIN.

Better for the Break
Haynes Publishing
For the first half of the 20th century Great Britain led the world in motorcycle design and production, exporting its products to countries in every section of the globe. However, as the second half of the century began in 1960 this once great industry commenced what was to be a terminal decline. During the 1960s and '70s Britain still manufactured a wide range of machines, but a combination of poor management, lack of investment, foreign competition (notably from Japan), and the arrival of the small, affordable car transpired to effectively sound the death knell of the British motorcycle by the end of the 1970s.

Popular Mechanics CarTech Inc
Several ceramic parts have already proven their suitability for serial application in automobile engines in very impressive ways, especially in Japan, the USA and in Germany. However, there is still a lack of economical quality assurance concepts. Recently, a new generation of ceramic components, for the use in energy, transportation and environment systems, has been developed. The efforts are more and more system oriented in this field. The only possibility to manage this complex issue in the future will be interdisciplinary cooperation. Chemists, physicists, material scientists, process engineers, mechanical engineers and engine manufacturers will have to cooperate in a more intensive way than ever

before. The R&D activities are still concentrating on gas turbines and reciprocating engines, but also on brakes, bearings, fuel cells, batteries, filters, membranes, sensors and actuators as well as on shaping and cutting tools for low expense machining of ceramic components. This book summarizes the scientific papers of the 7th International Symposium "Ceramic Materials and Components for Engines". Some of the most fascinating new applications of ceramic materials in energy, transportation and environment systems are presented. The proceedings shall lead to new ideas for interdisciplinary activities in the future.

Plane Speaking Motorbooks International "Kollin's Goes to the Candy Store," tells the story of a young girl who adventures through a magical candy store, stuffing her cart with goodies to buy. Through her journey, she meets sour candy people, climbs a chocolate mountain, and gets trapped in a bubble-gum bubble. In the end, she gets a basic understanding of opportunity cost as she must make the decision of what candy she truly wants. This book is great for creating a financial literacy foundation with your children and teaching them to understand why we cannot buy everything we want.

Motor Trend McGraw-Hill Education TAB En nostalgisk beskrivelse af begivenheder og højdepunkter i flyvningens historie.

Popular Mechanics Motorbooks Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You

feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Field Guide to Trains Voyageur Press (MN)

Engine-tuning expert A. Graham Bell steers you through the various modifications that can be made to coax maximum useable power output and mechanical reliability from your two-stroke. Fully revised with the latest information on all areas of engine operation, from air and fuel, through carburation, ignition, cylinders, porting, reed and rotary valves, and exhaust systems to cooling and lubrication, dyno tuning and gearing.

The ultimate guide for train lovers, Field Guide to Trains is fully loaded with pictures and fun facts on all the machines that ride the rails
Ping-Pong Art and Literary Journal of the Henry Miller Library 2012

The greatest small engines in the world are manufactured by Briggs & Stratton. From the informal partnership Stephen F. Briggs and Harold M. Stratton formed in 1908, Briggs & Stratton has evolved into an industry leader whose name is synonymous with the lawn mower engines it pioneered. The Legend of Briggs & Stratton, 208 pages, is filled with 125 color and 145 black & white images covering Briggs & Stratton's fascinating history.

Riding in the Zone

Dripping Thighs, Sticky Chicken Fingers, Vanilla Chicken, Chicken with a Lardon, Bacon-Bound Wings, Spatchcock Chicken, Learning-to-Truss-You Chicken, Holy Hell Wings, Mustard-Spanked Chicken, and more, more, more! Fifty chicken recipes, each more seductive than the last, in a book that makes every dinner a turn-on.

"I want you to see this. Then you'll know everything. It's a cookbook," he says and opens to some recipes, with color photos. "I want to prepare you, very much." This isn't just about getting me hot till my juices run clear, and then a little rest. There's pulling, jerking, stuffing, trussing. Fifty preparations. He promises we'll

start out slow, with wine and a good oiling . . . Holy crap. "I will control everything that happens here," he says. "You can leave anytime, but as long as you stay, you're my ingredient." I'll be transformed from a raw, organic bird into something—what? Something delicious. So begins the adventures of Miss Chicken, a young free-range, from raw innocence to golden brown ecstasy, in this spoof-in-a-cookbook that simmers in the afterglow of E.L. James's sensational Fifty Shades of Grey trilogy. Like Anastasia Steele, Miss Chicken finds herself at the mercy of a dominating man, in this case, a wealthy, sexy, and very hungry chef. And before long, from unbearably slow drizzling to trussing, Miss Chicken discovers the sheer thrill of becoming the main course. A parody in three acts—"The Novice Bird" (easy recipes for roasters), "Falling to Pieces" (parts perfect for weeknight meals), and "Advanced Techniques" (the climax of cooking)—Fifty Shades of Chicken is a cookbook of fifty irresistible, repertoire-boosting chicken dishes that will leave you hungry for more. With memorable tips and revealing photographs, Fifty Shades of Chicken will have you dominating dinner.

Build Your Own Electric Motorcycle
The Kawasaki Triples Bible covers the entire production of three cylinder two-strokes from 1967 to 1980, featuring a year by year breakdown of bike specs, including

the KH250, 350 S2, KH400, H1 500 and H2 750 models. Illustrated with hundreds of archive photographs and period adverts, plus personal memories from some of the racers and tuners who got the best from the fearsome H1 500 and H2 750 machines of the 60s and 70s, this is an invaluable resource for any collector or restorer of these fabulous motorcycles. With information provided by Kawasaki Museum, acknowledged experts such as Rick Brett and Dave Marsden, and lifelong Kawasaki triples owners, it defines the enduring appeal of the models. It also contains excellent tips on spares, tuning, rebuilds etc., and captures the very essence of what made the Kawasaki triples the most rebellious, kick-ass two-strokes of their time.
