Across Great Divides, true stories of life at Sydney Cove will appeal to all readers, young, old and in-between, who love to be immersed in a good read, while learning new things. The stories will no doubt make you wonder, what would I have done? Across Great Divides, true stories of life at Sydney Cove, brings to life the diverse experiences of people living in the precarious circumstance of Australia's first penal colony. The stories are relayed through a non-fiction narrative which shows how convict men saw and seized the possibilities of their new position. It portrays the situation of convict women and their relationships with military men. The stories demonstrate the varied responses of participants to their unique situation: some succeeded beyond their imagination, some failed disastrously. The stories also give voice to the dilemma of the Aboriginal people challenged by the unexpected arrival of a completely alien race of white people to their land: Bennelong and his difficult to ignore wife, Barangaroo, dealt with their new circumstances in a way they felt would best benefit themselves and their people. On the other hand, the young warrior Pemulwuy had his own ideas about how the white invaders should be confronted. Boorong and Nanberry, two native children taken separately into the homes of white settlers in the aftermath of a devastating epidemic, went on to have fickle yet enduring relationships with their white guardians. The stories in Across Great Divides, true stories of life at Sydney Cove give the different perspectives of military men who had volunteered for a tour of duty in the remote colony. Marine officers Watkin Tench, William Dawes, George Johnston, Philip Gidley King, and Captain John Hunter left valuable links to past times through their diaries, letters and journals. Arthur Phillip, the colony's first governor, also wrote letters which give us insight into the dilemmas plaguing his mind.

During the late eighteenth century, a musical – cultural phenomenon swept the globe. The English square piano—invented in the early 1760s by an entrepreneurial German guitar maker in London—not only became an indispensable part of social life, but also inspired the creation of an expressive and scintillating repertoire. Square pianos reinforced music as life's counterpoint, and were played by royalty, by musicians of the highest calibre and by aspiring amateurs alike. On Sunday, 13 May 1787, a square piano departed from Portsmouth on board the *Sirius*, the flagship of the First Fleet, bound for Botany Bay. Who made the First Fleet piano, and when was it made? Who owned it? Who played it, and who listened? What music did the instrument sound out, and within what contexts was its voice heard? What became of the First Fleet piano after its arrival on antipodean soil, and who played a part in the instrument's subsequent history? Two extant instruments contend for the title 'First Fleet piano'; which of these made the epic journey to Botany Bay in 1787–88? *The First Fleet Piano: A Musician's View* answers these questions, and provides tantalising glimpses of social and cultural life both in Georgian England and in the early colony at Sydney Cove. The First Fleet piano is placed within the musical and social contexts for which it was created, and narratives of the individuals whose lives have been touched by the instrument are woven together into an

account of the First Fleet piano's conjunction with the forces of history. View 'The First Fleet Piano: Volume Two Appendices'. Note: Volume 1 and 2 are sold as a set (\$180 for both) and cannot be purchased separately.

Boswell's Life of Johnson Routledge

Now in one definitive volume, *Botany Bay and the First Fleet* is a full, authentic account of the beginnings of modern Australia. In 1787 a convoy of eleven ships, carrying about 1400 people, set out from England for Botany Bay, on the east coast of New South Wales. In deciding on Botany Bay, British authorities hoped not only to rid Britain of its excess criminals, but also to gain a key strategic outpost and take control of valuable natural resources. According to the conventional account, it was a shambolic affair: under-prepared, poorly equipped and ill-disciplined. Here, Alan Frost debunks these myths, and shows that the voyage was in fact meticulously planned – reflecting its importance to Britain's imperial and commercial ambitions. In his examination of the ships, passengers and preparation, Frost reveals the hopes and schemes of those who engineered the voyage, and the experiences of those who made it. The culmination of thirty-five years' study of previously neglected archives, *Botany Bay and the First Fleet* offers new and surprising insights into how Australia came to be.

A stark and intriguing portrayal of life for the youngest convicts who populated the Australian colonies more than two hundred years ago. At the age of seven, children in eighteenth-century Britain were tried in court like adults. For crimes such as picking pockets or stealing clothes, they could be sentenced to death by hanging or transported to the then-perilous and isolated colonies of Australia. Life in the colonies was often as difficult and dangerous as the poverty from which many of the convicts came, but the dreaded sentence of transportation could also present opportunities. In a fascinating volume filled with historical photos and drawings, today's young readers can consider anecdotes of youthful prisoners from long ago, whose new lives on the shores of Australia ran the gamut from the boy who became the first person hanged on its soil to the girl whose photo is now on the twenty-dollar note. Back matter includes a glossary, bibliography, index, and web resources.

Varieties of English in Writing BoD – Books on Demand

This volume is concerned with assessing fictional and non-fictional written texts as linguistic evidence for earlier forms of varieties of English. These range from Scotland to New Zealand, from Canada to South Africa, covering all the major forms of the English language around the world. Central to the volume is the question of how genuine written representations are. Here the emphasis is on the techniques and methodology which can be employed when analysing documents. The vernacular styles found in written documents and the use of these as a window on earlier spoken modes of different varieties represent a focal concern of the book. Studies of language in literature, which were offered in the past, have been revisited and their findings reassessed in the light of recent advances in variationist linguistics.

The Routledge Handbook of World Englishes constitutes a comprehensive introduction to the study of World Englishes. Split into six sections with 40 contributions, this Handbook discusses how English is operating in a wide range of fields from business to popular culture and from education to new literatures in English and its increasing role as an international lingua franca. Bringing together more than 40 of the world's leading scholars in World Englishes, the sections cover historical perspectives, regional varieties of English from across the world, recent and emerging trends and the pedagogical implications and the future of Englishes. The Handbook provides a thorough and updated overview of the field, taking into account the new directions in which the discipline is heading. This second edition includes up-to-date descriptions of a wide range of varieties of English and how these reflect the cultures of their new users,

including new chapters on varieties in Bangladesh, Uganda, the Maldives and South Africa, as well as covering hot topics such as translanguaging and English after Brexit. With a new substantial introduction from the editor, the Handbook is an ideal resource for students of applied linguistics, as well as those in related degrees such as applied English language and TESOL/TEFL.

We are in the midst of yet another global crisis in capitalism. In the UK, we have the most right wing and ideologically driven government since Thatcher; a ruthless cabal of millionaires intent on destroying the welfare state. In the US, President Obama, whose initial record did not live up to the expectations of many on the Left, is increasingly driven by right-wing republicanism and other corporate interests. At the same time, there are developments in Latin America, in particular Venezuela, which are heralding the dawn of a new politics, and recovering the voice of Marx, but with a twenty-first century socialist focus, thus giving hope to the lives of millions of working people throughout the world. This is why the world media is intent on discrediting President Hugo Chávez; and insisting that ordinary people have to pay the cost of the crisis in capitalism. The Arab Spring and the Occupy movement also show signs of an anti-capitalist movement in embryo. In Greece, perhaps more than anywhere else in Europe (even France), the austerity-stricken working-classes are pushing for real existing socialism. It is therefore not surprising that the ruling class of Greece is increasingly supporting the neo-Nazi, fascist Golden Dawn party threatening civil war should they lose power as a class. Now is a prescient time to bring twenty-first century socialism to the educational institutions of the world, to teach Marx across the curriculum and across the globe. Through this volume our goal was to contribute to the literature by concretely demonstrating the practical implications of Marx's theory to curriculum. However, while this book provides concrete examples of how Marx can and has informed a revolutionary critical education, it is not intended to be prescriptive. That is, the chapters should not be read as a how to guide, but they should be taken as inspiration for new, creative approaches to Teaching Marx and interpreting and posing *The Socialist Challenge*.

How to Write History that People Want to Read IAP

In a single leather-bound volume of 238 unlined pages of parchment, Surgeon Arthur Bowes Smyth describes his two-and-a-half year journey with the First Fleet from Portsmouth in England to the new colony in Australia and back. He is a frank, articulate and observant writer, and his diary, a treasure of the National Library of Australia, covers life at sea, stopovers in the slave port of Rio de Janeiro and the tropical paradise of Tahiti, and three months of early settlement in Australia. As surgeon to more than 100 convict women on the *Lady Penrhyn*, Bowes Smyth gives an insight into the plight of these women, sentenced to transportation, and their children. Their voyage was marked by seasickness, miscarriage, infant deaths, a diet of salted meat and dry hardtack biscuits, and cruel punishment from thumb screws to gagging and flogging with a cat-o'-nine-tails. When they finally set foot on Australian soil, their travails did not end, being set upon by drunken sailors and crew in a 'scene of debauchery and riot'. Bowes Smyth also describes medical incidents that would make a modern reader squirm, from extracting a 'jigger worm' from his own foot to a scurvy outbreak which resulted in bleeding noses, contracted muscles, emaciated bodies and swollen, blackening limbs. There are moments of high drama when mountainous seas threaten to overturn the ship or when passengers fall overboard, as well as calm days at sea spotting porpoises, whales, seals and all manner of sea birds. Upon finally reaching Botany Bay, Bowes Smyth describes 'the joy which possessed every breast upon so long wished for an event'. He details early encounters with Aboriginal people and the struggles in setting up the new colony, which was plagued from the outset by food shortages, outbreaks of disease and crop failures. He also describes the promiscuity and lax morals of the convicts with typical flair, declaring their audacity 'not to be equalled amongst a set of villains in any other part of the globe'. In *First Fleet Surgeon*, author David Hill brings to life the voyage of the *Lady Penrhyn* and the early months of settlement at Port Jackson (modern-day

Sydney) through Bowes Smyth ' s colourful language and frank anecdotes. Each chapter includes a page of Bowes Smyth ' s handwritten diary entries accompanied by a full transcript, and is richly illustrated with paintings, lithographs and maps from the National Library of Australia ' s collection. Information boxes on subjects such as eighteenth-century medical knowledge, brewing beer on board, and a surgeon ' s typical day provide context to Bowes Smyth ' s story.

Convicted Candlewick

A unique history of Australia retold through the extraordinary lives of Peter Bradley ' s three ancestors: a father, son and grandson. James Bradley was a First Fleet convict found guilty of stealing a white linen handkerchief worth two shillings, and sentenced to seven years transportation to Australia. Joseph Bradley worked his life in the most dangerous occupation of the time — whaling — and despite his parents being uneducated and illiterate went on to write a journal about his experiences, rich in history and insight. Roland Bradley was a man of unionism and politics, and like his father and grandfather took up the fight against the rich and powerful through his involvement with the early Maritime union. In 1894, he wrote an account of surviving the shipwreck of the SS Kanahooka, which forced its inhabitants to wander the wilderness of North Queensland for 18 days. Following the early struggles of a fledgling colony to nationhood, *Convicted* is an engrossing and highly imaginative retelling of the story of one family, entwined with the history of this country from the landing of the First Fleet in 1788.

A young astronomer in colonial Australia faces tragedy on the ground in this follow-up to the award-winning *The Secret River*— “ A triumph. Read it at once ” (The Sunday Times, UK). A stunning follow-up to her Commonwealth Writers ' Prize-winning book, *The Secret River*, Grenville ' s *The Lieutenant* is a gripping story of friendship, self-discovery, and the power of language set along the unspoiled shores of 1788 New South Wales, Australia. As a boy, Daniel Rooke was an outsider. Ridiculed in school for his intellect and misunderstood by his parents, he finds a path for himself in the British Navy—and in his love for astronomy. As a young lieutenant, Daniel joins a voyage to Australia. And while his countrymen struggle to control their cargo of convicts and communicate with nearby Aboriginal tribes, Daniel constructs an observatory to chart the stars and begin the work he prays will make him famous. Out on his isolated point, Daniel becomes involved with the local Aborigines, forging an intimate connection with one girl that will change the course of his life. But when his compatriots come into conflict with the indigenous population, Daniel must turn away from the stars and declare his loyalties on the ground.

Grassland-Invertebrate Interactions: Plant Productivity, Resilience and Community Dynamics Univ of California Press

An extraordinary narrative history of the First Fleet, by the bestselling author of *The Forgotten Children*. Never before or since has there been an experiment quite as bold as this. Set against the backdrop of Georgian England with its peculiar mix of elegance, prosperity, progress and squalor, the story of the First Fleet is one of courage, of short-sightedness, of tragedy but above all of extraordinary resilience. It is also, of course, the story of the very first European Australians, reluctant pioneers who travelled into the unknown - the vast majority against their will - in order to form a colony by order of the King's government. Separated from loved ones and travelling in cramped conditions for the months-long journey to Botany Bay, they suffered the most unbearable hardship on arrival on Australian land where a near-famine dictated that rations be cut to the bone. But why was the settlement of New South Wales proposed in the first place? Who were the main players in a story that changed the world and ultimately forged the Australian nation? How did the initial skirmishes with the indigenous population break out and how did the relationship turn sour so quickly? Using diaries, letters and official records, David Hill artfully reconstructs the experiences of these famous and infamous men and women of history, combining narrative skill with an eye for detail and an exceptional empathy with the people of the past.

The Life of Samuel Johnson, L.L. D. Routledge

De mens is een bijzondere apensoort. Onze hersenen zijn complex, onze lichamen een technisch wonder, we kunnen kennis overdragen aan volgende generaties. En onze capaciteiten nemen nog altijd toe. Toch hebben we ook gebreken: onze kinderen worden extreem kwetsbaar geboren, we zijn vatbaar voor ziektes en we zitten vol psychologische vooroordelen en defecten in onze genetica en biochemie. In *Corpus* onthult Lewis Dartnell hoe die biologische vermogens en tekortkomingen het verloop van onze geschiedenis ingrijpend hebben bepaald en hoe de evolutie van het menselijk lichaam invloed heeft gehad op de ontwikkeling van culturen en samenlevingen. We zien hoe endemische ziektes Napoleons droom van een wereldrijk verwoestten, hoe een ter ziele gegaan gen leidde tot de opkomst van de maffia en waarom Columbus weigerde te geloven dat hij Amerika had ontdekt.

Natural and anthropogenic grasslands such as prairies, meadows, rangelands, and pastures cover more than 40% of the planet ' s surface and provide a wealth of ecological services. Grasslands alone store one third of the global carbon stocks and grass roots, through their specific architectures, ensure water cycling and prevent the erosion of fertile topsoil. In addition, grasslands are of vital importance for human food production as vast areas of rangelands and pastures provide feed for livestock. Pastoral legumes mobilize atmospheric nitrogen and improve fertility of arable soils. Not least, grasslands are an essential genetic resource. The three major crop species that feed half of the global population have been bred from wild grasses. Ancestors of our contemporary turf cultivars, common components of urban landscapes and

recreation spaces, originated from wild grasslands. Although natural and managed grasslands represent pivotal ecosystems, many aspects of how they function are poorly understood. To date, most attention has focused on grassland primary producers (i.e. forage plants) and mammalian grazers but invertebrates are likely to play an equally, if not more important role in grassland ecosystem functioning. In Australian pastures, for example, the biomass of root-feeding scarab beetles can often exceed that of sheep and plant damage caused by invertebrates is sometimes equivalent to an average dairy cow ' s grass consumption. Indeed, grasslands are one of the most densely populated ecosystems with invertebrates being probably the most important engineers that shape both plant communities and the grassland as a whole. In a rapidly changing world with increasing anthropogenic pressure on grasslands, this Research Topic focuses on: 1. How grassland habitats shape invertebrate biodiversity 2. Impacts of climate change on grassland-invertebrate interactions 3. Plant and invertebrate pest monitoring and management 4. Plant-mediated multitrophic interactions and biological control in grasslands 5. Land use and grassland invertebrates 6. Plant resistance to invertebrate pests Given the increasing demand for food and land for human habitation, unprecedented threats to grasslands are anticipated. Resilient to some extent, these key ecosystems need to be better comprehended to guarantee their sustainable management and ecosystem services.

As the title of this book suggests, how we understand, perceive and experience democracy may have a significant effect on how we actually engage in, and with, democracy. Within the educational context, this is a key concern, and forms the basis of the research presented in this volume within a critical, comparative analysis. The Global Doing Democracy Research Project (GDDRP), which currently has some 70 scholars in over 20 countries examining how educators do democracy, provides the framework in which diverse scholars explore a host of concerns related to democracy and democratic education, including the impact of neoliberalism, political literacy, critical engagement, teaching and learning for and about democracy, social justice, and the meaning of power/power relations within the educational context. Ultimately, the contributors of this book collectively ask: can there be democracy without a critically engaged education, and, importantly, what role do educators play in this context and process? Why many educators in diverse contexts believe that they are unable, dissuaded and/or prevented from doing thick democratic education is problematized in this book but the authors also seek to illustrate that, despite the challenges, barriers and concerns about doing democracy in education, something can, and should, be done to develop, cultivate and ingratiate schools and society with more meaningful democratic practices and processes. This book breaks new ground by using a similar empirical methodology within a number of international contexts to gage the democratic sentiments and actions of educators, which raises a host of questions about epistemology, teacher education, policy development, pedagogy, institutional cultures, conscientization, and the potential for transformational change in education.

Museums and the Working Class is the first book to take an intersectional and international approach to the issues of economic diversity and class within the field of museum studies. Bringing together 16 contributors from eight countries, this book has emerged from the significant global dialogue concerning museums ' obligation to be inclusive, participate in meaningful engagement and advocate for social change. As part of the push for museums to be more accessible and inclusive, museums have been challenged to critically examine their power relationships and how these are played out in what they collect, whose stories they exhibit and who is made to feel welcome in their halls. This volume will further this professional and academic debate through the discussion of class. Contributions to the book will also reinforce the importance of the working class — not only in collection and exhibition policy, but also for the organisational psychology of institutions. *Museums and the Working Class* is essential reading for scholars and students of museum, gallery and heritage studies, cultural studies, sociology, labour studies and history. It will also serve as a source of honest and research-led inspiration to practitioners working in museums, galleries, libraries, archives and at heritage sites around the world.

The author of the magnificent bestselling account of the First Fleet returns to early Sydney to tell the story of the years that followed as it's never been told before. The British plan to settle Australia was a high-risk venture. We now take it for granted that the first colony was the basis of one of the most successful nations in the world today. But in truth, the New World of the 18th century was dotted with failed colonies, and New South Wales nearly joined them. The motley crew of unruly marines and bedraggled convicts who arrived at Botany Bay in 1788 in leaky boats nearly starved to death. They could easily have been murdered by hostile locals, been overwhelmed by an attack from French or Spanish expeditions, or brought undone by the Castle Hill uprising of 1804. Yet through fortunate decisions, a few remarkably good leaders, and most of all good luck, Sydney survived and thrived. Bestselling historian David Hill tells the story of the first three decades of Britain's earliest colony in Australia in a fresh and compelling way. 'David Hill captures Australia's past in a very readable way.' The Weekly Times
