In a single leather-bound volume of 238 unlined pages of parchment, Surgeon Arthur Bowes Smyth describes his two-and-a-half year journey with the First Fleet from Portsmouth in England to the new colony in Australia and back. He is a frank, articulate and observant writer, and his diary, a treasure of the National Library of Australia, covers life at sea, stopovers in the slave port of Rio de Janeiro and the tropical paradise of Tahiti, and three months of early settlement in Australia. As surgeon to more than 100 convict women on the Lady Penrhyn, Bowes Smyth gives an insight into the plight of these women, sentenced to transportation, and their children. Their voyage was marked by

seasickness, miscarriage, infant deaths, a diet of salted meat and dry hardtack biscuits, and cruel punishment from thumb screws to gagging and flogging with a cat-o' -nine-tails. When they finally set foot on Australian soil, their travails did not end, being set upon by drunken sailors and crew in a ' scene of debauchery and riot ' . Bowes Smyth also describes medical incidents that would make a modern reader squirm, from extracting a ' jigger worm ' from his own foot to a scurvy outbreak which resulted in bleeding noses, contracted muscles, emaciated bodies and swollen, blackening limbs. There are moments of high drama when mountainous seas threaten to overturn the ship or when passengers fall overboard, as well as calm days at sea spotting porpoises, whales, seals and all manner of sea birds. Upon finally reaching Botany Bay, Bowes Smyth describes ' the joy which possessed every breast upon so long wished for an event ' . He details early encounters with Aboriginal people and the struggles in setting up the new colony, which was plagued from the outset by food

---

shortages, outbreaks of disease and crop failures. He also describes the promiscuity and lax morals of the convicts with typical flair, declaring their audacity ‘ not to be equalled amongst a set of villains in any other part of the globe ’ . In *First Fleet Surgeon*, author David Hill brings to life the voyage of the *Lady Penrhyn* and the early months of settlement at Port Jackson (modern-day Sydney) through Bowes Smyth ’ s colourful language and frank anecdotes. Each chapter includes a page of Bowes Smyth ’ s handwritten diary entries accompanied by a full transcript, and is richly illustrated with paintings, lithographs and maps from the National Library of Australia ’ s collection. Information boxes on subjects such as eighteenth-century medical knowledge, brewing beer on board, and a surgeon ’ s typical day provide context to Bowes Smyth ’ s story.

As the title of this book suggests, how we understand, perceive and experience democracy may have a significant effect on how we actually engage in, and with, democracy. Within the educational context, this is a key concern, and forms the basis of the research presented in this volume within a critical, comparative analysis. The Global Doing Democracy Research Project (GDDRP), which currently has some 70 scholars in over 20 countries examining how educators do democracy, provides the framework in which diverse scholars explore a host of concerns related to democracy and democratic education, including the impact of neoliberalism, political literacy, critical engagement, teaching and learning for and about democracy, social justice, and the meaning of power/power relations within the educational context. Ultimately, the contributors of this book collectively ask: can there be democracy without a critically engaged education, and, importantly, what role

do educators play in this context and process? Why many educators in diverse contexts believe that they are unable, dissuaded and/or prevented from doing thick democratic education is problematized in this book but the authors also seek to illustrate that, despite the challenges, barriers and concerns about doing democracy in education, something can, and should, be done to develop, cultivate and ingratiate schools and society with more meaningful democratic practices and processes. This book breaks new ground by using a similar empirical methodology within a number of international contexts to gauge the democratic sentiments and actions of educators, which raises a host of questions about epistemology, teacher education, policy development, pedagogy, institutional cultures, conscientization, and the potential for transformational change in education.

We are in the midst of yet another global crisis in capitalism. In the UK, we have the most right wing and ideologically driven government since Thatcher; a ruthless cabal of millionaires intent on destroying the welfare state. In the US, President Obama, whose initial record did not live up to the expectations of many on the Left, is increasingly driven by right-wing republicanism and other corporate interests. At the same time, there are developments in Latin America, in particular Venezuela, which are heralding the dawn of a new politics, and recovering the voice of Marx, but with a twenty-first century socialist focus, thus giving hope to the lives of millions of working people throughout the world. This is why the world media is intent on discrediting President Hugo Ch á vez; and insisting that ordinary people have to pay the cost of the crisis in capitalism. The Arab Spring and the Occupy movement also show signs of an anti-capitalist movement in embryo. In Greece, perhaps more than anywhere else in Europe (even France), the austerity-stricken working-classes are pushing for real existing socialism. It is therefore not surprising that the ruling class of Greece is increasingly supporting the neo-Nazi, fascist Golden Dawn party threatening civil war should they lose power as a class. Now is a prescient time to bring twenty-first century socialism to the educational institutions of the world, to teach Marx across the curriculum and across the globe. Through this volume our goal was to contribute to the literature by concretely demonstrating the practical implications of Marx ' s theory to curriculum. However, while this book provides concrete examples of how Marx can and has informed a revolutionary critical education, it is not intended to be prescriptive. That is, the chapters should not be read as a how to guide, but they should be taken as inspiration for new, creative approaches to Teaching Marx and interpreting and posing The Socialist Challenge.

This volume is concerned with assessing fictional and non-fictional written texts as linguistic evidence for earlier forms of varieties of English. These range from Scotland to New Zealand, from Canada to South Africa, covering all the major forms of the English language around the world. Central to the volume is the question of how genuine written representations are. Here the emphasis is on the techniques and methodology which can be employed when analysing documents. The vernacular styles found in written documents and the use of these as a window on earlier spoken modes of different varieties represent a focal concern of the book. Studies of language in literature, which were offered in the past, have been revisited and their findings reassessed in the light of recent advances in variationist linguistics.

A stark and intriguing portrayal of life for the youngest convicts who populated the Australian colonies more than two hundred years ago. At the age of seven, children in eighteenth-century Britain were tried in court like adults. For crimes such as picking pockets or stealing clothes, they could be sentenced to death by hanging or

transported to the then-perilous and isolated colonies of Australia. Life in the colonies was often as difficult and dangerous as the poverty from which many of the convicts came, but the dreaded sentence of transportation could also present opportunities. In a fascinating volume filled with historical photos and drawings, today's young readers can consider anecdotes of youthful prisoners from long ago, whose new lives on the shores of Australia ran the gamut from the boy who became the first person hanged on its soil to the girl whose photo is now on the twenty-dollar note.

Back matter includes a glossary, bibliography, index, and web resources.

The Sydney Wars tells the history of military engagements between Europeans and Aboriginal Australians – described as ‘this constant sort of war’ by one early colonist – around the greater Sydney region. Telling the story of the first years of colonial Sydney in a new and original way, this provocative book is the first detailed account of the warfare that occurred across the Sydney region from the arrival of a British expedition in 1788 to the last recorded conflict in the area in 1817. The Sydney Wars sheds new light on how British and Aboriginal forces developed military tactics and how the violence played out.

Analysing the paramilitary roles of settlers and convicts and the militia defensive systems that were deployed, it shows that white settlers lived in fear, while Indigenous people fought back as their land and resources were taken away. Stephen Gapps details the violent conflict that formed part of a long period of colonial strategic efforts to secure the Sydney basin and, in time, the rest of the continent. ‘A powerful and cogent contribution to one of the most contentious aspects of Australian history: the war between British settlers and the First Nations. The fine detailed research will mean that we will have to radically reassess our understanding of the history of the first thirty

years of settlement.’ —Henry Reynolds

Australian English is perhaps best known for its colourful slang, but the variety is much richer than slang alone. This collection provides a detailed account of Australian English by bringing together leading scholars of this English variety. These scholars provide a comprehensive overview of Australian English’s distinctive features and outline cutting-edge research into the variation and change of English in Australia. Organised thematically, this volume explores the ways in which Australian English differs from other varieties of English, as well as examining regional, social and stylistic variation within the variety. The volume first explores particular structural features where Australian English differentiates itself from other English varieties. There are chapters on phonetics and phonology, socio-phonetics, lexicon and discourse-pragmatics as these elements are core to understanding any variety of English, especially within the World Englishes paradigm. It then considers what are arguably the most salient aspects of variation within Australian English and finally focuses on historical, attitudinal and planning aspects of Australian English. This volume provides a thorough account of Australian English and its users as complex, diverse and worthy of study. Perhaps more importantly, this volume’s scholars provide a reimagining of Australian English and the paradigm through which future scholars may proceed.

It is a little known fact that eleven African American convicts arrived in Australia on the First Fleet in 1788. Two of these ex-slaves were the author's ancestors. In extensively researched poems, award-winning writer Judy Johnson vividly portrays scenes from her black forebearers' lives, both before transportation and afterwards, in the fledgling colony of New South Wales. *Dark Convicts* uncovers a little known aspect of Australian colonial history, told from the unique vantage point of a descendant. During the late eighteenth century, a musical-cultural phenomenon swept the globe. The English square piano—invented in the early 1760s by an entrepreneurial German guitar maker in London—not only became an indispensable part of social life, but also inspired the creation of an expressive and scintillating repertoire. Square pianos reinforced music as life's counterpoint, and were played by royalty, by musicians of the highest calibre and by aspiring amateurs alike. On Sunday, 13 May 1787, a square piano departed from Portsmouth on board the *Sirius*, the flagship of the First Fleet, bound for Botany Bay. Who made the First Fleet piano, and when was it made? Who owned it? Who played it, and who listened? What music did the instrument sound out, and within what contexts was its voice heard? What became of the First Fleet piano after its arrival on antipodean soil, and who played a part in the instrument's subsequent history? Two extant instruments contend for the title 'First Fleet piano'; which of these made the epic journey to Botany Bay

in 1787–88? *The First Fleet Piano: A Musician's View* answers these questions, and provides tantalising glimpses of social and cultural life both in Georgian England and in the early colony at Sydney Cove. The First Fleet piano is placed within the musical and social contexts for which it was created, and narratives of the individuals whose lives have been touched by the instrument are woven together into an account of the First Fleet piano's conjunction with the forces of history. *View 'The First Fleet Piano: Volume Two Appendices'*. A unique history of Australia retold through the extraordinary lives of Peter Bradley's three ancestors: a father, son and grandson. James Bradley was a First Fleet convict found guilty of stealing a white linen handkerchief worth two shillings, and sentenced to seven years transportation to Australia. Joseph Bradley worked his life in the most dangerous occupation of the time – whaling – and despite his parents being uneducated and illiterate went on to write a journal about his experiences, rich in history and insight. Roland Bradley was a man of unionism and politics, and like his father and grandfather took up the fight against the rich and powerful through his involvement with the early Maritime union. In 1894, he wrote an account of surviving the shipwreck of the *SS Kanahooka*, which forced its inhabitants to wander the wilderness of North Queensland for 18 days. Following
