This expanded twelfth edition of the bestselling guide to style is based on the Economist's own updated house style manual, and is an invaluable companion

for everyone who wants to communicate with the clarity, style and precision for which the Economist is renowned. As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed out in the guide include: *Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down. Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Answers sometimes are" (Oscar Wilde).

Flaunt means display, flout means disdain. If you flout this distinction you will flaunt your ignorance Forgo means do without; forego means go before.

Fortuitous means accidental, not fortunate or well-timed. Times: Take care. Three times more than X is four times as much as X. Full stops: Use plenty. They keep sentences short. This helps the reader.

Originally published in 1988, this book analyses the effect of public boarding school on those boys who grew to manhood under its influence. With access to over 2000 letters written by parents to the Head Master and governors of Ellesmere College in the period 1929-50, it raises issues about the construction of masculinity in the mid-twentieth century. The author demonstrates from these candid letters the concerns of a small group of parents bringing up their sons: their aspirations, plans, fears and problems. She shows how parents' plans changed, sometimes very dramatically, due to the Second World War, and demonstrates the differences between social groups as diverse as clergy, widows and farmers in bringing up their sons. The author also presents fascinating and elusive evidence about the sons themselves and the effects of their schooling on their models of masculinity, sexuality and attitudes to women. This book places the particular concerns of a relatively small group within the much wider contexts of education, social and gender structure.
