1984 Cognella Academic Publishing Wetlands are a vital part of the landscape and ecology of the United States, providing food and shelter for species ranging from the beautiful wood duck to the tiny fairy shrimp. These areas provide critical habitat for fish and wildlife, protect communities from flooding, and recharge groundwater supplies—yet they continue to be destroyed at an alarming rate. A detailed analysis of wetlands management, Wetland Drainage,

Restoration, and Repair is a comprehensive guide to the past, present, and future of wetland recovery in the United States. The book includes a historical overview of wetland destruction and repair over the past two hundred years and also serves as a unique resource for anyone, from novice to engineer, interested in the process of wetland restoration. Author Thomas R. Biebighauser draws from his own vast experience in building and repairing more than 950 wetlands across North America. Included are numerous

photographs and case studies that highlight successes of past projects. Detailed, step-by-step instructions guide the reader through the planning and implementation of each restoration action. Biebighauser also provides a number of effective strategies for initiating and improving funding for wetlands programs. Wetland Drainage, Restoration, and Repair is essential reading for all who care about and for these important ecosystems. Busted Tractors and Rusty Knuckles: Norwegian Torque Wrench Techniques

In 1947 Vaino J. Holopainen

(Waino) and Roy E. Handy Jr. of the small town of Hubbardston, Massachusetts developed the world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry lead to the development of twenty-six major backhoe related break-through designs, including

the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave

Willens, two engineers from Central Massachusetts, wanted to capture this fascinating history before it was lost to time. *Farm Tractors, 1975-1995* Mitchell Beazley Written as a sequel to *The Agricultural Tractor 1855-1950* by R. B. Wetland Drainage, Restoration, and

Repair Haynes Manuals Shows how to build five complete sheds. With detailed coverage of materials options and construction techniques. Vintage Ford Tractors Voyageur Press Henry Lasoski, an officer in the Polish army, was there on the first day of World War II, thrusting his bayonet awkwardly into a German soldier hours after Hitler ' s army invaded his homeland in 1939. And Jacques Smith was there on the last, a member of the honor guard aboard the USS Missouri in Tokyo Bay when the Japanese signed the documents of surrender in 1945. From start to finish, this chronicle of fifty-

three personal testimonies illuminates the Second World War in a way no mere accumulation of facts can. In a journalistic tour de force, Elizabeth Mullener over the course of twelve years found eyewitnesses to virtually every major event of World War II, and she found them all in one American city—New Orleans. Some are natives of the city and some are not, a testament to the upheaval of war and its power to scatter people around the globe. The people she writes about are not grand heroes or prime movers. They are young men shaking in their foxholes, young women stitching up wounded soldiers, and children facing a

world gone topsy-turvy. And they saw it all. They witnessed the London Blitz and the siege of Stalingrad; the attack on Pearl Harbor and the Bataan Death March; the battle of Iwo Jima and the Nuremberg trials; the Normandy invasion and parties at the USO. Their memories are powerful. Harold Eck recalls sharks grazing his legs as he treaded water for four days after the USS Indianapolis sank in the Pacific Ocean. Anthony DeLucca saw bodies stacked like cordwood at Buchenwald. Christine Strevinsky slid a knife through the neck of a Nazi commandant at the age of nine. Frank Rosato played “ The Missouri Waltz ” for

Harry Truman at Potsdam. All poignantly related through Mullener ' s graceful and compelling prose, the episodes in War Stories provide an unusually intimate history of World War II and a direct, visceral connection to the central event of the twentieth century.
