There are two kinds of classic car buffs: those who have restored an old car, and those who want to. For anyone who has looked at a rusty heap in a field and seen only the gleaming new machine it once was, the urge is powerful, but also intimidating. Restoration can be a difficult, expensive, and--especially for the novice--mysterious undertaking. Dave Floyd, an enthusiast with a lifelong love for the great cars on the road in his youth, is one who answered the call. In this book he traces every step of restoring a long-neglected 1948 Chrysler New Yorker to its original glory, all on a real-world budget and in the spare hours left by a full-time job. Every task, every discovery, every obstacle, every triumph and frustration comes through in a detailed account that is part diary, part practical guide, part love story. Told with great charm, his story is inspiring to any prospective old-car hobbyist, and a special treat for Chrysler devotees.

Automotive Service Digest

In 1948, the Ford Motor Company restyled its pickup line and identified each model with an F designation, from F-1 for their half-ton to F-8 for their three-ton. The fresh design of the F-Series quickly won the hearts of thousands of pickup buyers and, with only minor tweaks and updates, the basic design remained through the 1956 model year. That classic era of Ford pickups is captured in this color history devoting one chapter to each year in the F-Series first nine years. Featured are interviews with retired Ford designers and engineers, period advertisements, technical details, and sidebars highlighting little-known and interesting facts about this revolutionary era in pickup design. Modern color photography of restored pickups and archival black-and-white photos are accompanied by engineers' original drawings and artists' renderings.
