EJ ' Ted ' Cutting was not only Aston Martin ' s most successful Chief Race Car Design Engineer, but was also an innovator with influential force on the worldwide automotive industry. Originating from a limited edition hardback version, this eBook was produced in celebration of the 60th anniversary of Aston Martin winning the World Sports Car Championship for Britain with the all-conquering DBR1 designed, engineered and created by Ted himself. Rather than a traditional

biography of his life, Ted wanted his book to be rather less scripted and informal; it was therefore initially adapted from a number of recorded conversations between himself and Aston Martin Heritage Trust members Stuart Bailey and Brian Joscelyne - the title being an obvious choice considering this! In addition to the in-depth telling of a legendary period in British motorsport by a man at the centre of it all, the book also sees Ted clarify a number of details which have in the past been incorrectly reported. Unusually it also contains all his published documents and access to a 90 minute video of his unique lecture on ' Racing Astons ' to further endorse his story. Although the original hardback edition of this book was produced only in a limited run, Ted ' s wish was to make the complete book available to a much wider audience, now possible through the internet; as an engineer always working at the cutting edge of technology, he would appreciate the benefits of information sharing in the digital age. As well as being of interest to fans of Aston Martin and of motorsports in general, the book is a compelling read for any

student of automotive design and engineering; after all, progress is about standing on the shoulders of giants - and in the field of race car design, few individuals ever reach the colossal heights achieved by Ted Cutting.

See the golden age of racing through hundreds of famed motorsports photographer Louis Klemantaski's greatest images, including many that have never been previously published. The next best thing to attending a race in person is the opportunity to relive it through high-quality photography. Most images merely document the event--rare are those photographs that capture the event. These are the photos that fans turn to again and again. Louis Klemantaski inserted himself into the action - whether that meant standing just off-course in a corner, roaming the paddock and infield, or riding shotgun in a Mille Miglia race car. In the process, he captured some of the most iconic images in motorsports, preserving these exciting events for all time.

Louis Klemantaski is one of history's greatest motorsports photographers. The immediacy and excitement his images evoke are unsurpassed. He worked during what is often considered racing's golden era, that period

immediately just prior to WWII through the early 1970s when the sport was still the province of passion and daring, before huge budgets and massive sponsorship forever changed its tenor. Klemantaski's subjects spanned road racing, Grand Prix, and F1 competition.

Klemantaski: Master Motorsports Photographer is the only book in print devoted to the photographer's full body of work. Hundreds of the best Klemantaski images have been collected to provide the only opportunity to own and enjoy his key work in a single volume. No racing or photography fan will want to miss this book!
