"Get one before one gets you!" Motion Performance's catchy sales pitch for builder Joel Rosen's Phase III Specialty Muscle Cars sums up the escalating performance scene in the late 1960s. Special edition muscle cars were essential to keep pace. Joel and other independent car builders (such as Carroll Shelby, George Hurst, Dick Harrell, Mr. Norm, and Jim Wangers) did what the factories couldn't do: take the muscle car and turn it into a tire-burning monster. Although the Pontiac GTO established the muscle car category in 1964, a host of corporate safety restrictions restrained factories from offering turn-key race cars off the showroom floor. Independent car builders enhanced appearance and amplified performance in an attempt to do what the manufacturers wouldn't. Motion Performance issued a written guarantee: Phase III cars would run 11.5 at 120 mph down the quarter-mile! Some of the most iconic nameplates in automotive history were applied in this era with names that included Cheetah, Black Panther, Royal Bobcat, Super Hugger, Manta Ray, Super Snake, Deuce, Fast Track, and The Machine. How did manufacturers stealthily promote these special edition muscle cars as "halo cars" while pretending not to endorse them? What happened to these innovators when factories assimilated their ideas? It's all covered inside. Muscle car historian Duncan Brown takes us through these special edition muscle cars, their creators, and the behind-the-scenes forces that shaped these wild beasts into legends that left a lasting legacy.

The independent automakers who had survived the depression of the 1930s had flexibility and enough capital from the war to be the first to launch all-new models for a car starved nation. So lucrative was the American post-war car market that new automobile companies were also formed to cash in on the pent-up demand for new cars. This is their story told through text and the use of contemporary brochures, period literature, factory photos, road test info and over 90 new, unpublished color photos of restored examples to relate the importance of these historic vehicles.

While building big horsepower has become easier, putting that power down to the pavement is still quite a challenge. Getting great "bite" involves a lot more than sticky tires and a smoky burnout. The suspension system is being put to work in a way it was never designed to operate. A better understanding of exactly what is happening to the suspension when the car launches from a standing start will assist you in maximizing your car's effectiveness on the street or at the track. In How to Hook and Launch: Traction Mods for the Street & Strip, author Dick Miller explains the physics behind what gets a car moving from a standing start, and how to best harness the various powers at

work. Getting the rear tires to really bite and gain maximum traction is divided into several small steps, and Miller walks you through each phase of the launch. Today's enthusiasts face a wide range of potential traction improvements, from softer tires and basic bolt-ons to complete or partial chassis replacements. Most opt for something in-between, where some well-engineered components are chosen to replace the factory equipment and offer a greater capability and range of adjustment. It is this range of upgrades where Miller spends most of his time, explaining what the parts and pieces do, and how to use them to their highest potential.

When thinking of a manufacturer's racing involvement, AMC is not a manufacturer that immediately comes to mind. Yet even from the very beginning of American motorsports, the companies that became AMC had some serious involvement in motorsport. From the early Nash and Hudson models all the way through the muscle car era, AMC had direct involvement in racing. The success of Nash and Hudson in early NASCAR racing, AMC Javelins in Trans-Am racing, and AMC's involvement with Mark Donahue and Roger Penske in both their Trans-Am and 1970s NASCAR teams prove that AMC was "in it to win it." The History of AMC Motorsports from veteran racing journalist Bob McClurg covers it all, from a Nash-American Motors corporate history, the first years of NASCAR, the 1960s efforts that included Trans-Am and drag racing Super Stock programs, to the Craig Breedlove land speed record efforts when 106 world records were shattered and covered by Hot Rod magazine. And let's not forget the 1970s Trans-Am championships with Donahue and Penske, and finally the NASCAR success with Bobby Allison in the always-curious looking Matador, which is also covered here. Never before has a single volume chronicled the events that encompass AMC racing history. Whether a hardcore racing history fan or a casual enthusiast of the AMC street offerings, The History of AMC Motorsports provides a unique showcase vital to every enthusiast's library.

Organized by year (and summarizing the market annually), it provides a yearly update on each make’s status and production figures, then details all models offered for that year.
