As the muscle car wars developed in the early 1960s, auto manufacturers scrambled to find catchy marketing campaigns to entice the buying public into their dealerships. General Motors, Ford, and Chrysler, with all their divisions, as well as AMC and Studebaker, inevitably sank billions of dollars into one-upmanship in an effort to vie for the consumer's last dollar. Automotive writer Diego Rosenberg examines the tactics and components used by manufacturers in waging war against one another in the muscle car era. Manufacturers poured millions into racing programs, operating under the principle of "Win on Sunday, Sell on Monday." Cars were given catchy nicknames, such as The GTO Judge, Plymouth Roadrunner, Cobra, and Dodge Super Bee. Entire manufacturer lines were given catchy marketing campaigns, such as Dodge's Scat Pack, AMC's Go Package, and Ford's Total Performance. From racing to commercials to print ads, from dealer showrooms to national auto shows, each manufacturer had its own approach in vying for the buyer's attention, and gimmicks and tactics ranged from comical to dead serious. *Selling the American Muscle Car: Marketing Detroit Iron in the 60s and 70s* takes you back to an era when options were plentiful and performance was cheap. You will relive or be introduced to some of the cleverest marketing campaigns created during a time when America was changing every day.

This colorful book captures some of the most beautiful and rare scale models of American Ford, Edsel, Lincoln, and Mercury cars and light trucks from the classic 1930-69 period. During the last thirty years, a small number of builders have devoted themselves to making, by hand, model cars in scale. Often limited to only a few hundred pieces, these unusual and expensive models have flawless finishing and astounding detail. For the first time ever in one source, the author has assembled hundreds of high-resolution color photographs from his and others' private collections, and from the builders themselves. Read about the history of these Ford replicas, the cars they are modelled upon, and learn where you can get them. This book is a must read for people who enjoy scale models and Ford Motor Company cars.

Great collector cars are still out there--just waiting to be found! Sadly, there is very little reality in reality TV. That wouldn't be so bad except for the fact that these shows are the only TV shows for the barn-find collector car aficionado. *Barn Find Road Trip* is the antidote to all the manufactured collector "reality" shows. It's a real-world, barn-find banzai run in which auto archaeologist Tom Cotter, his car collector pal Brian Barr, and photographer Michael Alan Ross embarked on a 14-day collector-car-seeking adventure with no predetermined destinations. It's barn-find freestyle! Roaming the Southeast, they documented their day-to-day car search in photos and through stories and interviews. This trip is absolutely real and the same kind of junket any gearhead with the skills, knowledge, and time can undertake. Cotter and company hit the road in Cotter's 1939 Ford Woody, the kind of car that opened doors and started the conversations that revealed where interesting cars were squirreled away. The result? The discovery of over 1,000 collector cars and some of the most amazing barn-find stories Cotter has yet unearthed, all accompanied by Ross' evocative photography. If you love stories of automotive adventure, this is the book for you!

Details how to select, install, and calibrate high-performance aftermarket brake systems specifically for your classic muscle car. Other brake system books cover all cars and all applications, but this book is dedicated to muscle cars only! With this volume, you can follow detailed, thorough, step-by-step procedures to install systems on a variety of popular muscle cars from Ford, Chrysler, and General Motors. As a result, you will have a car with brakes on par with the handling and horsepower of modified cars today. Many 1960s and 1970s muscle cars still carry the outdated and rudimentary OEM drum or underpowered stock disc/drum brake systems. These hinder handling agility and stopping performance, and they are a subpar safety system. Muscle cars are meant to be driven aggressively, and the brake system needs to match the performance of the drivetrain. The fundamentals of system design, operation, and component function are clearly explained so you understand all principles, equipment, and available kits. With this knowledge, you can select the best brake system for your car and application. However, selecting the right equipment is just the first step. This book delivers detailed step-by-step instructions and photos so you can confidently install an aftermarket high-performance brake system, such as a kit from Wilwood, Baer, CCP, and others on a variety of muscle cars. Covered are aftermarket brake conversions

for factory size 14- to 15-inch wheels as well as installs for 16- to 20-inch wheels. You are shown how to select individual components and install master cylinders, steel-braided brake lines, calipers, rotors, and proportioning valves. Whether you're driving a high-performance street, Pro Touring, autocross, drag racing, or road racing car, these brake system installs dramatically increase performance and safety.
