The Chevrolet Camaro set out to be competition for the Ford Mustang. Of all the contenders the crown of the king of the 'ponycars' it was this little light-weight champion that delivered the knockout blow. It came out of the factory dressed in racing stripes and powered by 375-hp 396-ci V-8. The Mustang's aging design and lacked being able to comfortably fit the huge powerplants that Ford offered was its glass jaw. The first generation of the Camaro became a hit with the youth, to the drag racers, to mothers heading to the grocery store. It even cast a spell on a witch, when Samantha on TV's Bewitched loaded Tabitha up and drove out of the driveway of 1164 Morning Glory Circle in a pale blue 1967 Camaro convertible. It would also flex its muscles at the Indy 500 as a pace car in 1967 and again in 1969, where one of the best-looking paint jobs to come from the factory, was created. Even today, at any general car show, the Camaro will be the star of the show.

This brings us to this guide which lists thousands of interchanges that will fit your classic 1967-1981 Camaro. This guide covers everything from the engine and transmission to sheet metal and glass, and also trim and nameplates. In 1969, the Camaro with the SS package took Chevy Camaro performance and styling to another level. First, the Camaro carried updated sheet metal for an aggressive and eye-catching appearance, and the ultra-high-performance 427 big-block engines were available for the first time. As history proved, 1969 was the pinnacle of performance and styling for the first-generation Chevy Camaro. Author and muscle car expert Robert Kimbrough provides a comprehensive examination of the all-time classic 1969 Camaro SS in Volume No. 4 of CarTech's In Detail series. He delves into the design, manufacturing, and equipment of Chevrolet's premier pony car. For the first time in its history, the 1969 Camaro SS had a full slate of high-performance small-blocks as well as big-blocks to conquer the competition on the street and track. The engines included the 350, 375-hp 396, and 425-hp COPO 427 Camaros. The Camaro SS made such an impression, that it became the Indy 500 Pace Car once again in 1969. All In Detail Series books include an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, and an in-depth study of all hardware and available options, as well as an examination of where the car is on the market today. Also included is an appendix of paint and option codes, VIN and build-tag decoders, as well as production numbers.

Camaro Special Editions: 1967-Present Motorbooks

The COPO Camaros, Chevelles, and Novas of the 1960s and early 1970s were the ultimate high-performance GM muscle cars. While few knew about this back channel program at the time, it is now recognized as the origin of GM's top muscle cars. Dedicated Chevy racers and car owners were determined to compete head-to-head with Mopar and Ford at the racetrack and on the street. But in order to do so, they needed to circumvent the corporate ban on racing and resolve the restriction of 400-ci engines in intermediate vehicles. Don Yenko and some other creative individuals recognized the loophole in the COPO (Central Office Production Order) system at General Motors. The COPO program was designated for fleet vehicles such as taxicabs, but at the peak of the muscle car wars it was used to build the ultimate high-performance Chevy muscle cars. Some horrific on-track accidents compelled General Motors to drop out of racing, yet GM did not want to allow Chrysler and Ford to steal the glory on Sundays while they stood on the sidelines. As a result, GM inconspicuously ran the Chevy racing and high-performance program through back channels, and COPO was integral part of the program. Don Yenko became the COPO muscle car program chief architect and champion. He ordered the Corvair through the COPO program and created the Corvair Stinger to mount a SCCA road race campaign. From these humble beginnings, the road map for creating the ultimate Camaros, Chevelles, and Novas was established. Factory Camaro V-8s came equipped with the 350 small-block or 396 big-block, which had to compete with the Mustang Cobra Jets and Mopar Wedge and Hemi cars.

In response, building the big-block Camaro through the COPO program was devised. At the factory, Camaros were fitted with the 396 engines and shipped to dealers where the 427s were installed in the cars. From 1967 to 1969, the factory and dealers installed eight different 427 engines, including the all aluminum ZL1 427. Later on, others used the road map to build COPO Novas and Chevelles to similar spec, with similar results. The COPO performance car program did not end with these muscle cars. Yenko even ordered several hundred Vegas through the COPO program, so they could be fitted with turbochargers and raced in SCCA competition. Chevy muscle car aficionado and author Matt Avery retraces the history of the COPO program and the creation of these premier muscle cars. He has scoured archives and tracked down owners and personnel involved in the program to deliver a comprehensive story and complete guide to the COPO cars. The COPO muscle car and racing program produced a storied and remarkable journey, and author Matt Avery captures all these facets in this entertaining and revealing history.

Big Book of Camaro Data, 1967-1973 CarTech Inc

Camaro: Fifty Years of Chevy Performance chronicles the first fifty years of Chevrolet's iconic Camaro through fascinating photography, history, and commentary about this legendary pony car. The early 1960s saw American auto manufacturers desperately trying to sell cars to the emerging baby-boom market. Chevrolet attained some success with its sporty Corvair Monza. Ford responded first with a sportier Falcon, then with its grand-slam, home-run pony car, the Mustang. At first, Chevrolet hesitated to abandon the technologically advanced Corvair, but when it finally entered the pony car market in 1967, its new Camaro instantly became one of the most iconic cars of the classic muscle-car era. When muscle cars went dormant for a generation, it was once again the classic pony cars that jump-started American performance. The battle that raged between Camaro and Mustang in the 1980s rejuvenated the US auto industry's interest in high-performance muscle cars. The Camaro lost its way in the 1990s, with Chevrolet pursuing technological advances and Ford pursuing classic American muscle. As was the case in the 1960s, Ford's muscular pony car trounced Chevrolet's technologically advanced sporty car in the race that mattered most: showroom sales. The Mustang thrived while the Camaro left the scene. Fortunately, that departure was only temporary. Chevrolet introduced a twenty-first-century Camaro in 2010, and it has become one of Chevrolet's most popular models. With stunning photography from author Mike Mueller and never-before-seen archival photography from partner General Motors, Camaro: Fifty Years of Chevy Performance chronicles the Camaro's rich history, from the early attempts to reach the youth market in the 1960s, through the potent and turbulent years of the classic muscle-car era, the resurgence of muscle in the 1980s, the sad decline of the 1990s, and the triumphant rebirth of the new car in this new millennium.
