(Information & normal  
repairs) The 9.5 hp,  
shown below was built  
from 1964 to 1973,  
which was a the first  
of the low profile  
motor series, and is  
not a sleek looking  
motor in my opinion,  
with a squatty  
oversized motor cover  
and upper housing  
sitting on a standard  
lower unit.

I have a 1967  
Evinrude Sportwin  
9.5 hp which I  
believe has an  
exhaust leak and I  
was looking for  
some help on the  
matter. This motor  
is new to me and  
this is my first  
time working on  
this particular  
model. I have a  
running post on the  
matter on another  
forum but it has  
fallen through the  
cracks to the  
knowledgeable  
members.

The Evinrude model  
numbers started in

1965 as 5502 or  
5502S, this  
apparently equated  
to the first number  
as 5 hp, second  
number of 5,  
referring to 1965  
and then I have not  
figured out the  
other 2 or 3 except  
possibly a model  
distinction as  
there could have  
also been a 5 hp  
motor made in 1955.
