When the first Corvette was introduced to the public through the travelling caravan known as Motorama, everyone knew there was something special about it.

Each subsequent model continued to strengthen that position. But how do you upgrade America's favorite sports car? Make it a special edition! Special edition Corvettes are the tip of the spear when it comes to the American auto manufacturers special models. Luminous cars such as the 1967 L88 convertible, 1969 aluminum block ZL1, and 2015 Z06 #001 have all commanded a million dollars or more. Modern dealer-tuned cars from Lingenfelter, Calloway, and Hennessey have carried the tradition of making a great Corvette even better. Extremely low mileage on 1978 Pace Cars indicate that people have thought of these cars as investments for

nearly 40 years. Keith Cornett of Corvetteblogger.com compiles a murderer's row of special-edition Corvettes in this first-ever compilation on the subject. This book is an encyclopedia of information, as you will learn about some of the rarest Corvettes on the planet. It will serve as a guide if you're looking to add one of these special machines to your collection. Everything you've ever wanted to learn about collectible Corvettes is in Corvette Special Editions.

Corvette, 1968-1982 : Parts Interchange Manual Detroit Iron

Some of the most coveted Corvettes among collectors

are the breakthrough Sting Rays built from 1963 to 1967. Subsequently, second-generation 'Vettes are also frequently the subjects of restoration projects. This interchange manual advises owners of mid-year Corvettes as to which parts can be swapped across model years, as well as which parts from other Chevrolets can be used in their cars. An ideal, all-inclusive reference for owners who want to modify their cars at a nominal cost while expanding their modification options.

Paul M. Fritz's love affair with Corvettes began in 1963, when the local owner of a 1963 Saddle Tan fuel-injected coupe would park his Corvette next to the bank in Schuylkill Haven, Pennsylvania, on Friday nights for all. A few years later, though, he bought a 1966

Sunfire Yellow, 427 cubic inch, 425 horsepower Corvette Coupe, which he's owned for forty-seven years. For much of that time, however, the car was in storage, as he enlisted in the Navy in October 1969 and spent a lot of time overseas. It came out of storage in November 1998, and a full-body, off-the-frame

restoration began at The Vette Shop in Warminster, Pennsylvania. The restoration followed the process of the National Corvette Restorers Society, and the Corvette went on to win the society's Top Flight Award, The Zora Arkus-Duntov Mark of Excellence Award. living in the moment, and celebrate the special bond between a man and his beloved car with *The Life of a 1966 Corvette*.
